US remains firmly opposed to Bonn's Soviet talks plan

By Lionel Barber in Washington

THE US will not compromise on its opposition to West Ger-man plans for early East West negotiations on short-range nuclear missiles, according to a senior US official.

After talks at the weekend between Mrs Margaret Thatcher, the British Printe Minister, and Mr Helmit Kohl, the West German Chancellor, agreement on the issue still seemed no closer, although German officials said they believed Mrs Thatcher would back down from her opposition before the Nato summit later

this month in order to avoid a public display of disanity. : However, the US is admantly opposed to early negotiations on short-range weapons, even if it means letting division sur-face within the Nato alliance, the official said. His comments indicate that Washington is firmly aligned with the UK in

While there is little public anxiety in Washington over the rift, officials seem to have been taken aback by West Germany's new assertiveness in pushing for early negotiations. President Bush has largely refrained from public com-

ment, citing his pre-occupation with the still-unfinished strategic review of US foreign policy. In his absence, other officials, notably Mr Dick Cheney, Defence Secretary, have begun to speak out.

Mr Cheney caused a diplo-matic flap at the weekend by saying in a television interview he believed Mr Mikhail Gorba-chev, the Soviet leader, would

line taken by Bonn opposing an early commitment on new short-range weapons, and requesting early talks on reducing stocks of such mis-siles of less than 500km range. A West German official said yesterday that Mrs Thatcher had an interest in seeing that chev, the Soviet leader, would fail in his efforts to re-struc-ture Soviet society. However, Mr Bush later made clear that the US, while firm abont modernising short-range missiles, wished Mr Gorbachev well in his perstroika programme. the Brussels summit succeeded since it would represent an important international debut

common view.

perestroika programme. The senior US official acknowledged West European kaenness to hear President for President Bush. The official admitted that finding a compromise would not ba simple. However, he stressed that Bonn's line in Bush's views on the future of Europe and arms control. favour of early talks on reduc-

However, he said, short-range weapons were not susceptible to negotiation. "It would deflect attention from our conventional arms proposals

Lubbers faces crisis over pollution plan

By Laura Raun in Amsterdam

THE Netherlands' Christian Democrat-Liberal Government faced one of the most serious crises in its seven-year history last night over a proposed National Environment Plan. The Liberal Party, junior

partner in the governing coalition, is threatening to submit a parliamentary motion of no confidence today unless the proposed plan is modified. Mr Ruud Lubbers, the Dutch Prime Minister, spent yester-day urgently trying to defuse the crisis through consultations and a letter to Parliament carefully explaining the Envi-

ronment Plan. The right-of-centre Liberals vehemently object to proposed tax increases which would belp pay for the sweeping 20-year plan aimed at slashing pollu-plan aimed at slashing pollu-tion by up to 90 per cent. Mr Joris Voorboeve, parliamen-tary whip of the Liberal Party, is expected to request an emergency debate this evening on

financing of the plan. The opposition Labour Party has gleefully promised to sup-port the Liberals in a no-confi-dence motion. If the Government falls early elections would be held in September.

General elections are sched uled for May 1990 and the centre-right administration would lose its governing majority if elections were beld now, according to one recent public opinion poll.

The Amstsrdam Stock Exchange lost 2.4 per cent yes-terday with private investors selling heavily. But overall market sentiment leansd toward the view that the Liberals were "threatening rather than intending" a government collapse, according to one

stock broker. The Liberal Party, which has long lobbied for lower taxes, objects to the proposed abolish-ment of tax deductions for car commuting and increases in petrol excise duties. These are two of a number of possible tax increases designed to raise around Fl 3bn (£833m) under

"the polluter pays" policy. Annual spending under the plan is forecast to soar to FI 7.3bn by 1994. Another FI 3bn is expected to come from industry and ultimately consumers in the form of higher product prices. The Government intends to

conference in London. spend only around FI 700m.

Thatcher turns blind eye to German public opinion

The British PM's stance on missiles risks inflaming anti-military feeling, reports David Marsh

A SKED on her way out of Sun-day's press conference with Chancellor Helmut Kohl wbether she believed West Germany would remain a member of Nato, Mrs ignore a growing aversion in German public opinion to talk of new weapons. It is a strategy in line with her reputation as the Iron Lady – an image which makes Mrs Thatcher ths focus both of adulation and mystification among ordinary Germans. Sev-eral thousands clustered to see her in

would remain a member of Nato, Mrs Margaret Thatcher, the British Prime Minister, replied in ber most queenly fashion: "Good heavens, yes." During her talks with Mr Kohl in the village of Deidesbeim, in south-west Germany, Mrs Thatcher none the less seemed to be doing her best to make continued German acceptance of Nato's military stance as difficult as possible. Mrs Thatcher is trying to convince the Germans that Nato armaments decisions make necessary a firm com-

decisions make necessary a firm commitment to deploying new short-range nuclear weapons in the Federal Republic. Mrs Thatcher is choosing to

updating the ageing Lance missiles and on Bonn's insistence on "early" talks to ont stocks of short-range weapons in East and West. The dispute has exposed a serious breakdown in diplomatic communications between London and Bonn.

The row between Britain and Ger-

many centres on the Federal Repub-lic's refusal to consider before 1992

Britisb officials appear last year to have over-interpreted ambig-uous remarks from Mr Kohl indicating he could push through an early decision on modernising the Lance missiles. Britain also seems to have underestimated the skill of Mr Hans-Dietricb Genscher, the Foreign Minister, in winning acceptance for his line on nuclear disarmament.

Bonn officials, for their part, have blamed Mrs Thatcher's press spokes-man for whipping up what looked like an anti-German campaign in the Brit-

an anti-German campaign in the Brit-ish press last week. The nationalistic tunes of the argu-ments marshalled by Mrs Thatcher and Mr Kohi clearly risk undermining the principles of collective security holding together the Alliance. On Sunday, Mrs Thatcher under-lined that removal of short-range weapons from Germany would make incovering the Nato nolicy of "flexi-

weapons from Germany would make inoperative the Nato policy of "flexi-ble response" to respond to potential Warsaw Pact aggression. In this case, Nato would have no choice but to revert to a "tripwire" strategy, under which conventional attack would be met with massive retailation.

Mr Kohl responded that he had reality.

responsibility towards his own people pointing out that short-range weapons of less than 500km range automatiof less than 500km range automati-cally affected the Germans more than anyone else. The Chancellor said his "Germans" included people on both-sides of the East-West German border. By making life difficult for Mr Kohl, Mrs Thatcher indirectly is playing into the hands of the opposition Social Democratic Party. Mr Kohl pointed out that the SPD was leaving

Social Democratic Party. Mr Kohl pointed out that the SPD was leaning towards elimination of all short-range missiles in Europe. He clearly implied that, if the centre-right coalition did not survive the general election in December next year, an SPD-led gov-enment would be in place – and Mrs Thatcher's nichtmare of removal of Thatcher's nightmare of removal of all short-range weapons could become

East-West journalists urge visa reforms By Edward Mortimer In London

Deidesheim on Sunday and after-wards at the press conference Mrs Thatcher thanked them for their

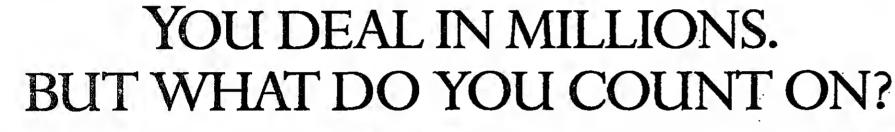

"homage". Mrs Thatcher's policy on the Ger-mans, however, also risks inflaming anti-military feeling. It could, there-

fore, end up prompting rather than hindering the outcome which she said on Sunday would be "disastrous" for Nato - removal of all land-based

nuclear weapons from Germany.

pressed in public, comes mainly from the diplomats of the Nato countries, who fear that relaxing visa restrictions on journalists would give access to the West to people who are not solely journalists. Journalists from two neutral countries, Austria and Switzer-land, have also so far declined

to back the draft proposals. The journalists who have signed the proposals will meet today to decide their next move

A demonstrator shot in Istanbul yesterday in clashes between May Day demonstrators and the security forces.

SAVAGE fighting between protesters and security forces left one dying and about 35 people injured in Istanbul yesterday, writes Jim Bodgener in Ankara. The conflicts raged as banned May Day . stations turned into demonstrations against a massive polic-ing presence in different parts of the city. More than 400 demon-strators were detained. Celebrating worker solidarity on May Day has been proscribed since the 1980 millitary coup. The ugliest violence yesterday erupted in the city's business centre as work-ers marched towards Taksim chanting May Day slogans. The 18-year-old demonstrator shot in the head yesterday was later coupled to a life support machine, but he was not expected by doctors to live. Immediate condemnation of alleged police brata-lity came from human rights and opposition party figures.

Jackson may run for Mayor of Washington

By Lionel Barber in Washington

THE Rev Jesse Jackson is considering running for Mayor of Washington DC, a move that would prohably remove him from the race for the Demccratic presidential nomination in 1992.

Mr Jackson, one of the most exciting and controversial figures in the Democratic Party, has been looking to bolster his political standing since he lost amendments or even the next the Democratic nomination.

Washington DC offers him a national platform and a chance to answer critics who sey that for all his magical rhetoric, he has never heen elected to public office. The other advantage is that Mr Jackson would be a near certain winner in the city which has a predominantly black population many of whom are disillusioned with their embattled three term Mayor Mr Mar-

The problem is Mr Barry is a personal friend of Mr Jackson and an old time ally from the civil rights movement in the 1960s. He said publicly he will not run against Mr Barry, hut the latter might he prepared to retire should Mr Jackson decide to stand.

Although for years a main-stay of the Stroessner regime, Gen Rodriguez has given assir-ances that full human rights will be restored and has tenta-tively begun investigations of ink to prevent multiple voting. While acknowledging Gen some abuses

Financial Times writers on the 1989 National Trade Estimates report, identifying trade practices seen by Washington as curbing exports

US lists countries whose trade barriers it wants dismantled

· · • . •

By Nancy Dunne in Washington

WITH the publication of its 214-page 1989 National Trade Estimates Report of foreign trade barriers, the US has taken the first step in a con-certed effort to force its trading partners to dismantle foreign trade barriers.

The "inventory" is devoid of rhetoric; most of the cases are familiar. But the compilation, through its sheer length, dra-matically illustrates what the US sees as a substantial loss of opportunity for US exports arising out of the trade barriers it describes.

This is the fourth annual report of its kind, but the new trade law has given it fresh prominence by establishing it as the reference work to be used by Ms Carla Hills, the US Trade Representative, when she activates the much feared "Super 301". Under the new law, the USTR will identify "priority practices" - tboss which barm US exports the most - and "priority countries", with the most numerous and pervasive barriers.

That designation is due on May 30; the prime candidates are thought to be Japan, Korea, Taiwan, Brazil, india, and the EC or West Germany. The US will seek to eliminate the most damaging market barriers over the next 12 to 18 months through negotiation, but talks can last as long as three years before retaliation is ordered.

The Trade Representative is not actually required to name anyone to the hit list; bowever. political pressure is intense to name Japan, at the very least. The report singles out the following countries for alleged

unfair trading practices; JAPAN (US 1988 trade deficit

\$55.4bm Despite an 80 per cent share of the world supercomputer mar-

ket. US vendors have not been able to penetrate the Japanese public sector supercomputer market. The only two pur-cbases of US supercomputers by government entities came under a special 1987 import promotion hudget.

Private companies may buy imported telecommunications satellites but government enti-ties may not if such a purchase interferes with indigenous development objectives. Single tendering for govern-

ment procurement, particu-larly in such sectors as con-struction services and telecommunications, favours local suppliers.

It can take six years for a patent to be issued and four years to process a trademark, compared with only 13 months in the US. During the process-ing period, there is no penalty for infringement. Japan's non-transparent,

non-competitive hid and tender system has made it difficult for US companies to participate in big construction projects. Two years after the US/Ja-

pan agreement on semiconductor trade, US market accese objectives have not been met. in 1987 Japan had an estimated \$60bn (£35bn) market for vehicle parts and components. **US** manufacturers supplied less than 1 per cent.

KOREA (US 1988 trade deficit \$9.9bn) Korea's 1989 average tariff rate

remains relatively high at 12.7 per cent. All imports require an import licence; 547 items are

intellectual property protection is inadequate, and foreign investment and services trade severely restricted.

Editorial comment, Page 16

By Our Foreign Staff MR Han Senng-soo, Sonth Knrea's Trade Minister, said US charges that his country engaged in unfair trade prac-tices were "incorrect" and warned that trade ties would be seriously harmed if Wash-

against

sanctions

be seriously harmed if wash-ington put Secol on a sanc-tions hit list. The US report failed to take account of Sonth Korea's efforts to open up its markets and lacked objectivity, he said. "Considerable portions [of the waard are incorrect." Mr.

the report] are incorrect," Mr Han said. "Soma statements are different from fact and others cite figures whose bases are not clear.

"I make it clear that we reserve the right stipulated in the General Agreement on Tariffs and Trade if the US Trade Rspresentative takes sonth Korsa based nn the trade harrler repurt announced on April 28."

In Taipet, Mr Vincent Siew. spokesman for the government Cnuncil for Economic Planning and Development, said: "We feel angry and regretful because the report is unfair and unacceptable."

Mr Siew said Taiwan had done more than other countries in the past two years to allow the appreciation of its currency, remove trade barri-ers, cut tariffs, and reduce its trade surplus with the US.

"It is unfair to treat us the same as Japan, South Korea and Brazil," said Mr Fredrick Chien, conncil chairman.

Chien, council chairman. There was no immediate reaction from the European Commission, closed for the May Day holiday, hnt last week Mr Frans Andriessen, EC External Affairs Commis-sioner, said the EC would not enter bilderral negotiations enter hilateral negotiations under threat of sanctions over what the US claimed were

unfair trade practices.

By Robert Thomson in Tokyo MISUNDERSTANDING is the word Japanese companies and trade officials use most freuse trade contrains use most re-quently to describe the US hit-list of alleged trade barriers. US officials, inspired by irritat-ingly high bilateral deficits, are said to misunderstand Japa-riese trade reforms, the Japa-riese trade reforms, the Japanese distribution system, and, most crucially, Japanese consime Apart from feeling misunder-stood, Japanese industry and trade representatives are wor ried that US sentiment against

the country is rising on the eve of the introduction of the much-heralded Super 301 trade provision, which will allow tougher action against "prior-ity countries" thought to be playing dirty. Japan is, of course, the coun-

try expected to be priority number one.

The Ministry of International Trade and Industry (Miti) said the report of Mrs Carla Hills, the US Trade Representative, listing 34 Japanese trade obsta-cles, was laced with "misun-derstandings". The Foreign Ministry urged the implemen-tation of Super 301 in a "fair and prudent manner", and asked the US "not to take Gatt-inconsistent : unilateral

easures". The country's retail distribution system has become a central issue, though Mr Masaaki Fukiyama, secretary-general of the Japan Speciality Stores Association, said the growing

criticism of the system was quite strange". Mr Fukiyama, wbose members are part of the small shop system said by the US to be inefficient and to obstruct

imports, suggested that "good products always sell well, whatever they are". He advised that US husinessmen should study the Japanese market more closely, and they must make the most of their immediate changes, with the

business chances." Japan's 1.6m small shops, Japan's 1.5m small subs, accounting for an estimated 57 per cent of retail sales, are said by US officials to be virtually impenetrable, while Miti says that such criticism is misguided.

of Japanese system lamented

Seoul warns Washington 'misunderstanding'

The Japanese government plans to make the establish-ment of larger stores, with a larger range of products, easter from an administrative point of view but Miti says that short-ening this "adjustment period" will not of itself increase imports. Miti explained that super-

markets and the like have tra-ditionally heen forced to "adjust" their plans for new stores to protect the livelihood of smaller store owners, whose political influence has ensured the patronage of the Govern-ment. Miti said that a "vision" of an ideal distribution system was evolving, though explana-tions of this long-term "vision" by Mr Hiroshi Mitsuzuka, the Miti minister who is now in the US, are likely to test the patience of crusading US con-

gressmen. Their patience will also be tested hy Japan's Ministry of Posts and Telecommunica-tions, which suggests that for-

eign mobile telephone compa-nies, in particular Motorola of the US, will have to wait about five years for a Tokyo radio

frequency vacancy. The ministry said that all available frequencies were at present being used by Japanese companies, and that even these companies did not have sufficient frequency

Ths US Trade Representative argues that Japan has violated agreements on telecom products by limiting access to US makers - the radio frequency problem is cited as a prime example - and has called for

threat of punitive measures if there is no action. However, Mr Sousuke Uno, the Japanese Foreign Minister, said that the US stand was "regrettabls" and that Japan would considering filing a com-plaint with Gatt if sanctions

were imposed. "It may he considered that unilateral measures will be in contravention of the Gatt, and that this will adversely affect the efforts now being made by each contracting party to the Gatt at the Uruguay Round of trade negotiations to maintain and further strengthen the multilateral free trade system, Mr Ilno said.

Among the other complaints made hy the US was a criticism of the placement of and access to Japan'a ubiquitous cigarette vending machines, prohlems said to hinder the ability of US manufacturers to display prodncts.

Japan Tobacco, which accounts for about 88 per cent of local sales, said that all con-tracts for vending machines are made on a "commercial basis" with retailers. He emphasised that the joint stock company, formerly a government monopoly, has no control over policy and expressed surprise that US officials believe there is "no equality" in the market.

As for the patent system, condemned by US officials for the time taken to process appli-cations, Miti said that the criticism was "very difficult to understand". He said the sys-tem was "very modern" and "we are trying to be very ODED

Miti suggested that the Trade Representative'e many "misunderstandings" show that Japan has to explain itself more clearly to the US and that the US has to take more time to examine the realities of Japan_

Bhutto treads an unsteady path through political minefields

The Islamic world's first female Prime Minister has been in office for six months. Christina Lamb looks at her record

BENAZIR BHUTTO is well aware thet there is no rule demanding fairy-tales must have happy endings. When Pakistan's favourite tion by winning an 11%-year struggle against dictatorship to become the first woman to bead an Islamic state, she knew things would not be easy. Stepping into the office of Prime Min-ister - st 35, her first job - she said:

"There are mines everywhere." The army and bureaucracy, which for long held the reins of power, reluc-tantly let her assume office in Decemtantly let her assume once in Decem-ber, imposing conditions which meant they retained real control while she took the responsibility and attracted much-needed foreign aid to keep the armed forces in F16s.

There was a further sour note. Ms Bhutto's People's Party (PPP), which had boped to sweep November's polls, secured little over a third of the votes and won s majority only in the prov-ince of Sind.

In the party's former stronghold of Punjah, home to 60 per cent of the population, she watched Nawaz Sharif, leader of the opposition Islamic Democratic Alliance (IDA), take power, in Baluchistan, the PPP entered an uneasy coalition with the IDA, and in the Frontier with the leftist Awami National Party (ANP), which vehemently opposes Pakistan's Afghan policy. Even in Sind it was

forced to enter a coalition with MQM, an ethnic party whose national seats were needed to form a majority in the country's Parliament.

Six months on, many believe Ms Bbutto is already stepping on the mines. Within 15 days of her taking office, the Baluchistan assembly was dissolved, eventually reinstated by courts in January, forming a new government of several parties, including the IDA but without the PPP.

Attention turned to Punjab, where for the first time in Pakistan's history a different party rules from that of the centre. On taking office, Ms Bhutto thought Nawaz Sharif would survive two months, yet in January's Punjab hy-elections the IDA took seven out of nine seats.

unjabi federal ministers, envy-Ing the grassroots patronage Mr Sharif wields as chief minis-ter. began s widely publicised "Get Nawaz" campaign, both sides issuing vitriolic statements and hribing each other's assembly members. Matters came to a head in March

when the PPP proposed a no-confi-dence vote in Mr Sharif. It was left humiliated when he pre-empted it with a vote of confidence, increasing his majority.

Crying "political victimisation". Mr Sharif fared even better in subsequent by-elections, gaining new support

Ms Bhutto's government lifted a ban on forming trade unions for employ-ees of Pakistan International Airlines and the state-run broadcast industry in a package of reforms announced yesterday by Mukhtar Ahmed Awan, Labour Minister, AP reports.

from Punjabls who falt their previ-ously dominant province was being hard done by. He said: "In November we lost in the slums. Within five months we're winning there too".

Despite a meeting hetween Mr. Sharif and Ms Bhutto and strong warnings from the President and army chief, the situation has wors-ened, even the Prime Minister and her mother joining in accusations of wheat smuggling. Mr Sharif, who says Only one of us can survive ered that she was brought to power by a Zionist lobby. Punjab is not the PPP's only prob-

lem. The Frontier government is hos-tage to 10 recently-recruited dissident IDA members after ANP walked out, claiming the PPP had brokan its promise to appoint an ANP governor. In Sind too, Pakistan's most volatile province, all is not well. In the cities, killings continue and curfew is a way of life. The accord with MQM is strained, with MQM chief Altaf Hus-sein accusing the PPP of "trying to cheat us", while many PPP members claim MQM is behind recent killings

to blackmail the government. In interior Sind, whose massive mandate ensured the FPP victory, dis-satisfaction is rife. "They should not forget the house they came from", warns Shazia Abbasi, a Sindhi editor. warns Shazia Abhasi, a Sindhi editor. Cynics say the only place the PPP control is the capital, yet talk there is far from Ms Bhntto's early days when she acted swiftly to "remove the cob-webs of martial law", releasing politi-cal prisoners, removing hans on unions and for the first time allowing the opposition on TV. Even these steps backfired; the country faced a wavs of investment-deterring strikes, including a potentially crippling stop-page by pilots of Pakistan Interna-tional Airlines which has already cost the country \$1m. the country \$1m.

acing high expectations and myriad problems, the govern-ment has passed no legislation, seeing opposition on every front. The war in Afgbanistan threatens to become long term, the economy is in tatters from years of extravagant living, the population of 103m will dou-ble in the next 20 years.

Family planning having been declared unislamic, drastic action would soon have the mullahs on the streets and Ms Bhutto knows too well that while the religious parties cannot win elections they can bring down

governments.

Last week Ms Bhutto launched the Rs2hn (£60m) People's Works Programme, a countrywide development scheme to be administered by party scheme to be administered by party officials, virtually bypassing provin-cial governments. Nawaz Sharif and Akbar Bugti, Baluchistan chief minis-ter, argne this is illegal and will appeal to the Supreme Court. So what is going wrong? Western diplomats say inexperience. After the party'e long struggle against martial law, Ms Bhutto has a lot of people to reward and has allowed lowalty to

law, Ms Bhutto has a lot of people to reward and has allowed loyalty to ontweigh merit and finances in appointing Pakistan's biggest ever cabinet of 43 members and 37 advis-ers. Her mother is Senior Minister and even her husband has an office in her secretariat, inviting allegations of corruption. corruption.

Corruption. Javed Jabbar, the flamboyant Infor-mation Minister, says: "We never specified a time-frame for solving the problems. We are literally having to restart a cranky old machine. Where we could move quickly, as in freeing the media, we moved immediately." A former minister, Dr Mehbubul Haq, argues: "The PPP is devoting all its time to converting a limited mar-

rad, argues: "The FFF is devoting an its time to converting a limited man-date into absolute power." The prob-lem obsessing the party is that if it cannot gain strength in the majority province of Punjab it has little hope of winning future elections. winning future elections.

Cambodian talks raise fresh peace hopes

By John Murray Brown in Jakarta

By John Murray Brown in Jak THE CAMBODIAN peace process is revived today, when Prince Norodom Sibanouk, leader of the Cambodian resis-tance coalition, and Mr Hun Sen, Prime Minister of the Vietnamese-lostalled Govern-ment in Phnom Penh, begin table in Jakarta. talks in Jakarta. The 67-year-old Prince, once

ruler of this former Freoch col-ony. appeared in conciliatory mood on arrival in the Indonesian capital, promising conces-sions and raising prospects for a possible breakthrough to this ten-year conflict. The meeting, the third betweep these two old enemies,

is likely to concentrate on the role of a peace-keeping force to

monitor elections in the wake of Vietnam's troop withdrawal now set to be completed in Sep-tember.

The parties also have to con-sider in the event of a settle-ment how to neutralise the estimated 40,000 Khmer Rouge guerrillas, the strongest resis-tance force fighting Vietnam's occupation from bases near the

border with Thailand. It was under the brutal three-year regime of Khmer Rouge leader, Mr Pol Pot, that an estimated 2m Cambodians were killed, prompting Viet-nam's original invasion on Christmas Day, 1978.

Prince Sihanouk on Sunday urged the Khmer Rouge leader-

Hun Sen signals a businesslike line

Roger Matthews in Bangkok profiles Phnom Penh's nimble leader

ship to have frank discussions with Mr Hun Sen. Under Soviet pressure, Vietnam announced last month that it would advance the final

withdrawal timetable, with all troops now set to leave Cam-bodiaby September. Today's talks come ahead of the scheduled summit later this month between Soviet leader Wa Witheil Catherbert

leader, Mr Mikhail Gorbachev, and the aging Chinese leader. Mr Deng Xiaoping, China has been the main backer of the three-party resistance.

Prince Sthanouk earlier emanded that the Heng Samrin regime in Phnom Penh be dismantled prior to elections as part of any comprehensive

peace settlement. However, he urged this week Mr Hun Sen "to give me the possibility to make progress with at least a partial solution."

The Prince also confirmed he no longer insisted that United Nations' troops oversee the withdrawal. Phnom Penh ear-lier proposed that three coun-tries - Poland, Canada and

India – provide such a force. ● The People's Republic of Kampuchea established after the 1978 Vietnamese Invasion, has changed its name to the State of Cambodia, Mr Hun Sen said yesterday. He said parliament in Phnom Penh agreed on the change on Sun-day as part of concessions to

and then became Prime Minis-

ter in 1985, thereby underlining the considerable trust placed in him by the Vietnamese.

Those who have spent time with him do not doubt his clev-erness and are impressed by the speed with which he has absorbed the intricacies of international politics.

His constant emphasis on

help settle a 10-year conflict with opposition guerrillas. He was speaking in Bangkok on his way to talks in Jakarta with the two non-communist opposition leaders Prince Noro-dom Sihanouk and Son Sann.

TAKESHITA LEAVES FOR SOUTH EAST ASIA Disgraced Japanese premier makes his last official trip By lan Rodger and Stelan Wagstyl in Tokyo Malaysia, Singapore, Indonesia JAPANESE diplomats have

been putting a brave face on the unseemly sight of a dis-graced Prime Minister and his Foteign Minister carrying on

At the weekend Mr Noboru. Takeshita, the Prime Minister, took off on a nine day tour of five sooth east Asian countries and Mr Sosuke Uno, the For-eign Minister, left for the Soviet Union, Mongolia and

China. "Our friends abroad know that there is consistency and continuity in our foreign pol-icy,* one foreign ministry official, said in Tokyo last week. But behind the unruffled diplo-But behind the unruffled diplo-matic facade, considerable anx-iety was aroused in the For-eign Ministry on Tuesday when Mr Takeshita announced he would resign within the next few weeks. He let it be known that he wanted to can-cel his trip. According to For-eign Office officials he was eventually talked into going by Mr Uno. Mr Takeshita is understood

Mr Takeshita is understood to have proposed that another minister go in his place and the foreign ministry objected violently. The ministry said that if he did not go, the only

Police break up protest

over wages in Manila

replacement could be a senior ministry official, appointed as a special ambassador, where-upon Mr Takeshita decided he would go after all.

A number of Sonth East Asian countries are not happy with the prospect of receiving a disgraced and lame duck prime minister bnt, as suppli-cants for Japanese aid, there is not much they can say. To an outsider, the simple solution would have been for the Japanese government to postpone the trip till a later date. How-ever, it might have been hard to find a later date. Japanese ministers cannot leave the

ministers cannot leave the country while the Diet (parlia-ment) is in session and so the only time they can get away is during national holidays, such as next week's golden week. Last year at this time, Mr Takeshita flew to London to unveil a new foreign policy for "contributing to the world" and Mr Sosuke Uno, the for-eign minister dashed around South East Astan countries offering to represent their views at the Economic Summit views at the Economic Summit of leading industrial nations. This time the objectives are more modest, which is perhaps just as well. An official said Mr Takeshita's trip to Thailand,

ernment of President Corazon

Aquino. They demanded a 47 per cent wage increase, as well

demands for a 30 peso rise in the daily minimum wage of 64 pesos. The most the govern-

ment could recommend was a 15 peso a day rise in Manila and 6 pesos in the rest of the country, she said.

d prof

Malaysia, Singapore, Indonesia and the Philippines would con-sist mainly of meetings with prime ministers and dinners. No new aid plans or other lavish gifts would be offered to his hosts although he would make an important speech in Jakarta on May 6 on building mature relations between Japan and South East Asian nations. Early last week, Japanations. Early last week, Japa-ness newspapers reported that a "Takeshita doctrine" would he unveiled, but that label tended to disappear as the week progressed. As for Mr Uno's trip, it will again concentrate on the long running dispute over Soviet occupation of four islands north of Hokkaido at the end of the second world war.

the second world war.

The dispute has prevented the two countries from concluding a peace treaty and hampers the development of normal social and economic relations. Japanese officials have been encouraged by an increase in high level bilateral contacts in recent months, but they have no delusions. As one but it last week: "There is no immediate perspective, to say the least, that within the near future our views would converge in a dramatic manner."

SHIPPING REPORT Flurry of tanker activity in the Middle East By Kevin Brown, Transport

Correspondent BUSINESS was quieter in the

tanker market last week, but a flurry of activity in the Middle East loading area prevented any serions fall in rates.

There was little interest in the spot market, but a number of charters took tonnage on time charter for up to two years at what were said to be relatively healthy

a ser en las

Brokers noted that much of this tonnage will continue to Mrs Aquino said the pay demand would undermine the sconomic recovery of the Phicompete for business in the spot market, however, which means that charterers are bet-ting on a fairly rapid improve-ment in rates if they are to Legislating a minimum wage that will drive up prices cover their costs.

Most of the single voyage fix-tures were in the Middle Bast, where 20 very large and nina large crude carriers of around 5.25m deadweight tonnes were Tixed.

the fast-evolving Hun Sen himself having to accommodate the shifting relationships between Mr Gorbachev's newstyle Soviet Union and Viet-nam, and perhaps more impor-

notable primarily for repetition of words and phrases such as liberalisation, economic management, foreign investment

law, repatriation of profits and capital, tax exemptions and import substitution industries. "The import substitution industries. "The important factor is not ideology... but to promote the economic development of the country," he said without any apparent embarrassment. To the cynical, and perhaps

to some member countries of the Associatioo of South East Asian Nations, the words were not just devoid of meaning. Worse, they were designed to mislead the outside world into believing, first, that Vietnam is preparing a complete pullout from Cambodia at the end of September, and second, that Mr Hun Sen is his own man and not the once-and-future

nam, and pernaps more impor-tantly, attempting to anticipate the impact of the forthcoming Moscow-Peking summit. For a man of only 38, Hun Sen is already practised in the horrors of war and the realities

of snperpower politics.

R HUN SEN, the youthful Prime Minis-ter of communist Cambodia, is beginning to sound like a born-again capital-He sent a video-taped message to an international confer-ence in Bangkok last Friday

said yesterday about 6,600 peo-ple were arrested in Seoul dur-ing the weekend.

S Korean trade deficit

South Korea registered a trade deficit for the second consecutive month in April, the Trade and Industry Ministry reported yesterday, AP reports from Seoul.

The April deficit of \$23m was up from \$5m in March, and contrasted sharply with a surplus of \$422m in April last year. Officials said South Kor-ean exports in April rose 3.1 per cent from a year ago to \$4.77bn while imports rose 14 per cent to \$4.80bn.

Taiwan minister in Peking

A Taiwan delegation arrived in China yesterday to attend a meeting of the Asian Development Bank on the first visit by Nationalist officials to the Chinese mainland since 1949, AP reports from Taipei. Ms Shirley Kuo, Finance

Minister, waved and smiled after stepping off a plane from Tokyo for the bank's annual meeting, which starts on Thursday.

Ms Kuo, former deputy gov-ernor of Taiwan's central bank, has said she would not hold talks with Chinese offi-cials during her stay and she gave no hint of a change in that position.

Bhutto lifts ban

Prime Minister Benazir Bhutto's government lifted a ban on forming trade unions for employees of Pakistan International Airlines and the state-run hroadcast industry in a package of reforms announced yesterday, AP reports from Islamabad. Mukhtar Ahmed Awan,

Labour Minister in Ms. Bhutto's People's Party cabi-net, announced the measures, which also included a new wage arbitration board for newspaper employees and increased benefits for workers' widows and families.

Nepal looks to China

Nepal, whose economy is in near collapse hecause of a trade feud with India, will ask China for petroleum and other essential goods, Finance Minister Bharat Bahadur Pradhan said yesterday. "I am hopeful our friends

will help us in the hour of this economic crisis," he said.

Securities watchdog sets out details of new disclosure rules

TWO KINDS of document, one described as a buyer's guide and the other as a company brochure, are to become key elements of the Securities and Investments Board's plans for disclosure of commissions and other information to buyers of

investment products such as investment products such as life assurance policies. The SIB is planning to unveil details later this month of the disclosure regime which is to be introduced at the beginning of next year. It will replace the present "soft" disclosure rules under which only indirect details of commissions are passed on by intermediaries to The report, based on research carried out by Incomes Data Services for management consultants Coopers & Lybrand, finds that the main reason for introducing performance-related pay (PRP) is to "foster a performance culpassed on by intermediaries to their clients.

ture." Just under one quarter of the local anthorities in England and Wales have or are planning PRP schemes and in central government nearly all staff are subject to some form of performance element in their pay. Central government employs about 400,000 staff. The National Health Service, the water industry and public transport also have some staff covered by PRP. The buyer's guide, running to no more than both sides of a single sheet of paper, will be designed to be handed to clients at the earliest possible moment, before they sign pro-posal forms. When business is conducted over the telephone the guide must be posted immediately.

According to SIB officials, it will be a simple, "user-friendly" document setting out transport also have some staff covered by PRP. Most of the organisations have devised target-based appraisal schemes, with the emphasis on a mutual setting of targets by the appraisor and the employee. Many organisa-tions consider this process. more valuable than any link the key considerations which the SIB considers investment clients should be aware of. So-called "status disclo-sure" - whether the intermedi-ary is an independent adviser, or whether he is employed by or tied to a single company -will be an important element. more valuable than any link

The guide will remind cli-ents of their cancellation rights, and will warn them to look at tables of surrender valnes when these arrive with later policy documents. It will also bring to their attention the percentage commission information which will simi-larly be included with later documents - but only when the sale is through an indepen-

SIB is proposing a document to cover these subjects because it is not confident that word-of-mouth disclosures could be relied upon. The buyer's guide will be a standardised document produced by the regulators. One version, from Fimbra, ooe of version, from rimora, ooe of the self-regulatory organiss-tions to which the SIB dele-gated powers, will be distrib-uted by independent intermediaries. Another will be

produced by Lautro, the SRO which covers tied agents and which covers tied agents and company salesmen. If good progress is made in drawing up the guide, SIB offi-cials may well insist that it is introduced during the second half of the year, before the Jan-uary 1 deadline for the new disclosure regime as s whole. Whereas the huyer's guide will be a simple document intended for the general public, the company brochure will be the company brochure will be aimed at professional users. Each company will produce its own brochure, and there will be considerable flexibility

within an overall framework to be laid down by the regulators. Essential elements will include details of the expenses of the life company, informa-tion about investment perfor-mance, a financial statement including details about sol-

including details about sol-vency, and a section on the company's strategy. The aim is to make it possi-ble for skilled practitioners to come to judgments about the merits of different companies in a way which is at present very difficult, because of the scarring of information and the scarcity of information and the lack of comparability. It is recognised, however, that the information is

unlikely to be readily understood by the average investor. Birthday for rules, Page 19 MONEY TALKS

In the words of Shakespeare "All the world's a stage and all the men and women merely players". We at British Coal Enterprise are playing a leading role in the success of new and developing business.

In the last 4 years we have committed over £50 million towards helping create real jobs. We have committed our support to more than 2300 business projects, involving a total investment of over £350 million and helping create more than 30,000 new job opportunities.

Our plan for 1989 is simple - by utilising additional financial support made available by the government we intend to help create over 10,000 additional new jobs.

We aim to achieve this by offering comparatively low interest finance to help new businesse get off the ground, to finance established businesses in expansion and to assist U.K. and overseas companies to locate into coal mining regions - as long as the projects need our assistance to provide permanent new jobs for the local workforce.

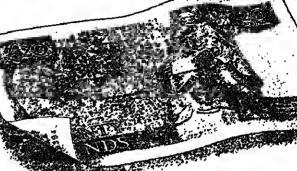

The package is attractive and thankfully lacking in excessive red tape. There is no need to wait until the jobs are created as the cash is available once your project is approved.

Also we can offer free practical and expert support - an ongoing involvement with the right kind of guidance and encouragement from people who want you to succeed.

At British Coal Enterprise we want to help create jobs, and if you want to succeed in business we can help one another, because our money talks good business sense.

Ministries clash Labour call for projects over school iob 'compacts'

By David Thomas, Education Correspondent

government departments about schools' links with business has forced ministers to alter their plans for the future of Britain's training institutions. The row is about compacts, which are agreements between local employers and schools guaranteeing jobs plus training to pupils reaching agreed standards of achievement. It has considerable implications for the links between schools and employers.

The Department of Employment, which has taken the lead on compacts, was so imprewith the first example of this initiative in the East End of London that it is helping to fund 40 compacts in deprived urban areas.

Last December, when the department announced the establishment of employer-driven Training and Enterprise Councils to co-ordinate training at local level, it was widely assumed that TECs would take responsibility for the compacts.

The white paper announcing the TECs said that they would have a central role in building partnerships between employ ers, schools and colleges, allowing education and training programmes to be dove-tailed.

However, after Its publication, the Department of Education and Science objected strongly to the implication that

Fuse burns slowly on the health bomb John Mason looks at the marginal effect of NHS reforms on county council elections politically as to how far it

to test NHS THE COUNTY council alection results will be examined closely by politicians and pun-dits alike to test public reac-tion to one of the Government'a most controversial measures - the proposals of Mr Kenneth Clarke, the Health Secretary, to put the National Health Service on a more busi-

nesslike footing. In the Vale of Glamorgan by-election, the white paper proposals have proved to be the top concern among voters, with Labour fighting hard on the issue. But, away from such high-

profile campaigns, it seems that the issue is burning with a

Mr Clarke may be conduct-ing a hruising public argument with the doctors' professional hodies, while the opposition parties capitalise on the issue, but indications are that at doorstep level across the coun-try the implications of the reforms are only now begin-ning to sink in.

The reason for this appears to be that doctors themselves, whether working in general practice or large general hospi-tals, are still sifting through the white paper and other gov-ernment documents for a detailed explanation of bow they are likely to be affected.

trated by the county council election campaign in County Durham - one of Labour's traditional strongholds. Majority opinion among

ticular, the option that some will be given to operate within their own budgets. Dr Ian Stewart is part of a

large, modern practice based at Ferryhill, close to the county's old coal-mining belt. He and his six colleagues have 16,500 patients on their books, putting them well over the 11,000 minimum limit set by the white paper for opting to run their own budget. However, they are highly unlikely to take up the offer.

Dr Spencer, a member of the local Family Practitioner Com-mittee, sees "strands of gold" in the proposals, such as the emphasis on new initiatives on preventive medicine. But he rejects outright the concept of

rejects ournight the concept of running his own budget. Like many other GPs, he is suspicious of government assurances that this would remain voluntary and auspects that in time it will be forced on most general practices whether most general practices whether they want it or not.

Dr Spencer is also concerned that the budgets would be set at acceptable levels to begin with, then gradually trimmed and trimmed again each year. He says it is still unclear how the promosals would over

how the proposals would oper-ate in practice. While the Government has said budgets will be adjusted to cope with excep-tional needs, such as a larger tban normal proportion of elderly patients, he would have difficulty in deciding the treatment for routine ailments such as shingles.

A five-day course of treatment now costs £117. With ahingles unlikely to be regarded as an exceptional illness, he expects to find it hard to decide which patients to send for treatment.

He said running his own budget would mean more time spent managing the accounts

Kenneth Clarke: faces a braising public argument

and less on his patients which is not why he emered medicine. He also echoed fears that the trust between GP and patient would be undermined by the hudget.

The white paper reform more likely to be taken up in the county is hospitals opting

for self-governing status. The Northern Regional Health Authority has already proposals and hospitals con-templating joining the first wave .of thosa to hecome self-governing have been given until next Monday to show their inter

Plessey-Siemens link in traffic system bid Sponsorship for **CBI** conference

takeover battle for Plessey, the UK electronics group bas joined up with one of its two antagonists to bid for a contract against the other.

Plessey is collaborating with Siemens, the West German company, and the Automobile Association in an effort to win the licence to operate a pilot traffic guidance system in Lon-don. Its main opponent for the Department of Transport contract is likely to be the General

Electric Company, Siemens' partner in the planned take-

over bld for Plessey. Decisions on the planned Autoguide network are expec-ted shortly after extensive

work since plans for the pilot scheme were announced about a year ago. The Plessey-Siemens consortium, which has just lodged its proposal with the Government, has already carried out trials on its own network in London. Autoguide is aimed at speed-

ing up city traffic by planning traffic routes for drivers that keep them clear of bottlenecks. Streetside beacons keep a con-stant record of road use, which is then analysed by computers. Plessey claims to be the larg-Plessey Claims to be the larg-est traffic systems company in Western Europe after deals in France and Spain just before GEC and Siemens announced their initial bid for the com-pany in November. Those agreements, with Elsydel in France and SICE in Spain,

gave the UK group a turnover of about £100m in the sector.

Siemens, which is working on a similar project in West Berlin, conducted much of the early research into traffic guidance technology. Under the terms of the Monopolies and Mergers Commission recommendations on the proposed bid for Plessey, Siemens would acquire sole ownership of the traffic systems division to provide competition for GEC in the UK market.

THE NATIONAL conference of the Confederation of British Industry in Harrogate in November is to be sponsored by Hewlett-Packard. This is the first sponsorship deal the CBI has arranged to cover the

entire conference. Hewlett-Packard is to provide equipment for delegates and the media.

Sponsorship at previous CBI conferences has been limited to specific events, products and fringe meetings. Several of them will continue.

WHICH TURKISH BANK HAS **UNDERWRITTEN** 30% OF ALL TURKISH **CORPORATE ISSUES** THIS YEAR?

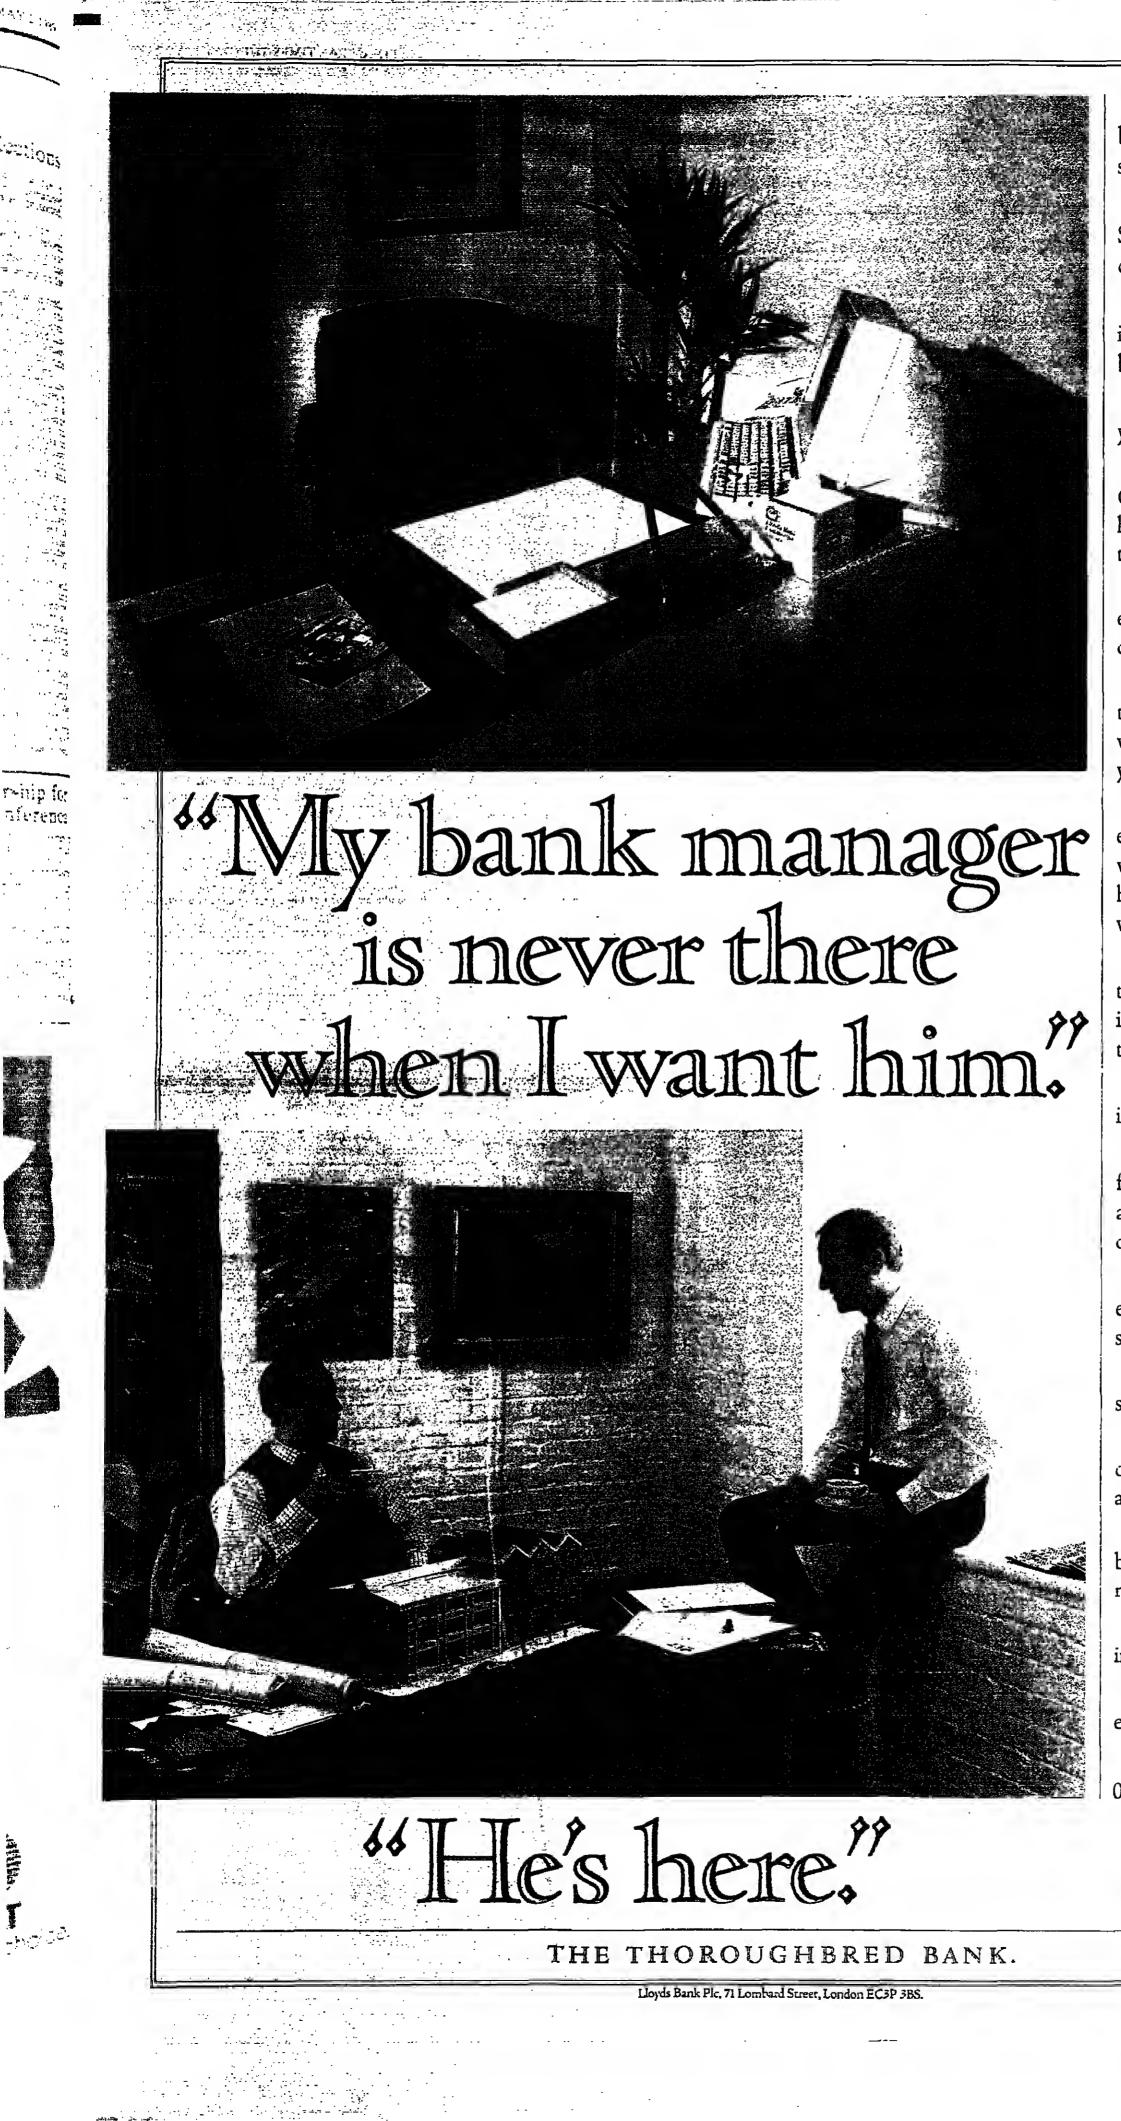

(Your answer should be written under here.)

You've guessed it. Interbank, Turkey's leading corporate bank. In the first 3 months of 1989, we've underwritten around \$20 million worth of new issues. Which makes us the largest underwriter of new issues in Turkey. We're setting the pace in other areas, too. We handle over 10% of Turkey's foreign trade. And we're leading the

way in capital markets, mutual funds, investment and private banking, and privatisation issues. Talk to us. Ring us on Istanbul (90-1) 174 20 33 - the office of Mr. Osman Ünsal, our Executive Vice-President. As the Turkish economy grows, no other bank is so well situated to help you profit from it: At Büyükdere Caddesi 108/C, Esentepc, 80496 Istanbul-Turkey.

attles.

When you are running a business, you shouldn't have to spend time running to your bank.

At Lloyds Bank Commercial Service, we're only too pleased to come to your office.

Apart from saving you time, it allows us to learn about your business first-hand.

And the more we know about you, the more we can do to help.

That's what Lloyds Bank Commercial Service is all about, helping medium-sized businesses to grow and prosper.

And to that end, we have established a network of LBCS offices throughout the country.

Working on a local basis means that we can keep in regular touch with you and the markets in which you operate.

And because we concentrate exclusively on business customers we can devote all our efforts to helping you meet the many and varied challenges you face.

It may be that we can work togethet to strengthen your position in the market, say through a takeover.

Or perhaps devise a way to improve your cashflow forecasting.

But no matter how straightforward or complex the task, we'll act swiftly to make sure that no opportunity is missed.

With advice based on years of experience working with businesses similar to your own.

And we won't just be taking a short term view.

Before we make a recommendation we'll consider how it might affect your success in years to come.

Helping to build a thriving business can't be done with makeshift solutions.

Or anything less than complete involvement.

Which, of course, you'll experience from our very first visit.

The Company Writers charge about £400 a day and specialise in writing speeches, brochures and annual reports. Its writers include Mr Andrew Osmond, who still owns 5 per cent of Privete Eye, Mr Tim Leon, whose career in advertising has included agencies such as McCann Ericson, Foote Cone and Belding and Dorlands; and Mr Graham Jones, a Church of England lay reader who has been an English teacher and a full-time commercial writer since 1980. Mr Whatmore says; "Good English is good husiness." He

hopes to expand the company both regionally in the UK and internationally.

Spoilers set Enterprise Oil its toughest test as a deal maker Steven Butler disentangles a \$1.4bn assets dispute with the assets, because Enter-

VEN BEFORE Enter-prise Oil proved last year that it could find oil with a drillbit, it had earned

oll with a drillbit, it had earned a formidable reputation as a shrewd deal maker. That skill put the company on a firm path of growth after it had been created from the oll assets of British Gas, then in the public sector, and priva-tised in 1985 with an oll pro-duction profile in steep decline. Enterprise is now the biggest quoted pure oil exploration and production company in the

quoted pure oil exploration and production company in the world, with production set to rise steeply until at least the middle of the 1990s. Its skill as a deal maker -its ability to bargain and call the bluff of its adversaries - is now being put to its most severe test.

severe test. On Friday British Gas and Amerada Hess, the US oil com-pany, moved in as spoilers on a \$1.4hn deal that Enterprise had clinched on March 1 with Texas Eastern, the US gas transmission company that had agreed to be taken over by Panhandle Eastern, its compet itor.

The deal, as originally concluded, pushed Enterprise's reserves over 1bn barrels and gave it a broad spread of prime exploration acreage in the UK

and Norway. Now the UK part of the deal, valued at \$961m plus interest from January 1, is in jeopardy. British Gas and Amerada Hess have served notice that they will exercise pre-emption rights. That means that they will exercise rights allowing them to buy Texas Eastern North Sea, the UK subsidiary of Texas Eastern, at the price at which Enterprise valued the company for the deal. They will thus take the deal away from Enterprise.

The story, however, does not stop there. All three companies have emharked on a path

that they have pre-emption rights," Mr Julian West, head of business development at

director of Amerada Hess in the UK, however, puts the issues rather differently; "The agreement [about pre-emption rights] is relatively clear-cut and straightforward. The prob-lem is that the agreement does not give a very large percent-

age share to Enterprise." The agreement in dispute was drawn up in 1965 between British Gas. Texas Eastern, prise was never party to the original agreement. That, he said, was something That, he sand, was sometiming to be settled between Enter-prise and British Gas; and in principle did not affect the Amerada Hess position. The choice before Enterprise Oil is therefore rather stark. If the matter went to court the company might, after a long and costly battle, walk away with the entire deal If Enter-Amerada Hess and Amoco when the four decided to explore for all as a group in the North Sea.

It included an unnsual clause giving pre-emption rights to the partners over shares of the UK subsidiaries of each company, should the subsidiaries be sold. Pre-emption clauses for North Sea exploration usually cover only sales of interests in licence blocks.

Since the 1965 agreement, however, all of the partners have to some extent gone their own way, ending up in a vari-ety of licence groups, with dif-ferent interests, raising ques-tions about how the original agreement is to be interpreted in light of today's reality. Mr Laidlaw says that while

The trick will be to offer Enterprise

enough to persuade it to keep the dispute

out of the courts

interpretation of the original agreement is mathematically complex, the principles are unambiguous. British Gas and Amerada Hess have reached agreement on the point. One party to the agreement said that several years ago the group had informally consid-ered scrapping the provision. It rejected the idea, however. Mr West declined to describe

Enterprise's grounds for dis-puting the rights, citing the possibility that the affair might end up in court. Texas Eastern is understood to have been advised by its counsel that the rights are unenforceable.

The complexities do not stop there, because Enterprise con-siders itself party to the rights to the extent that they are valid. On Friday, Enterprise preservited its own deal court serve only to call into further pre-empted its own deal, say-ing that it was doing so "without accepting that pre-emption rights exist, but to protect its

Clark, managing director, said yesterday that the factory would help the company become a world leader in fused fibre optics. That covers optical fibres fused into solid blocks from Effective top management which s wide range of compo-nents is made. They are claimed to have unique image-

carrying properties. They are used increasingly in military, medical and com-mercial uses. They can be used, for instance, in nightvision goggles for helicopter pilots, allowing them to fly without radar assistance.

Another area is "keyhole surgery" that cen give a clear view of minute details of the human body, allowing complex operations with a local anaesthetic.

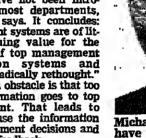

Demand for fibre optics is nothing short of phenomenal," Mr Clark said. "Bnt it is being satisfied from America. That is about to change," Fiox is being assisted by a £200,000 investment from the Welsh Development Agency as part of a syn-dicate led by Oakland Invesment Management.

for management decisions and to provide feedback. Mr Micbael Heseltine. MP.

wbo initiated the project jointly with the PA Consulting group, takes a more political view.

At the Department of the Environment 10 years ago, he pioneered Minis, the system held to be the first designed to improve the flow of informa-tion to ministers. Work done in the early stages on Minis forms the basis for the systems in

Michael Heseltine: 'systems have to be imposed most other departments.

In a preface to the report, be says Minis "had to be imposed upon an unwilling bureau-cracy. Even now the contrast between departments is unac-ceptable. Some have tried and are still trying: others are not." He says that Mrs Margaret Thatcher, the Prime Minister, who has championed the promotion of management in the Civil Service, should now sanc-

tion a progress eudit of the systems adopted by other departments. "in truth, effective manage-

ment systems do not evolve or merely emerge: they are imposed. That is the first lesson. Then they have to be monitored, and the more effective the scrutiny, the more effective

will be the system. The authors of the report, who were advised by a panel of experts from business and the public sector, recommend that Mrs Thatcher name a minister, probably in the Treasury since there must be a strong link with the public expenditure system, to take charge of a pro-gramme that would ensure that standards in Whitehall are consistent and effective.

The role of top management divides into:

 Management of the political process;

 Provision of policy advice and programme design;
 Monitoring of executive asks. For the last, new monitoring

techniques and systems of evaluation will be required. The capacity to use them will be the key to the top manage-ment information system that

fraught with risk.

The Enterprise position is clear. "We do not recognise

Enterprise, explains. Mr Sam Laidlaw, managing

question the ability of British Gas to operate effectively in the private sector. It would raise more doubts about the new leadership regime headed by Mr Robert Evans. The companies are expected to meet this week. "We have to own position." The Enterprise rights derive from the fact that its assets do them the courtesy of finding

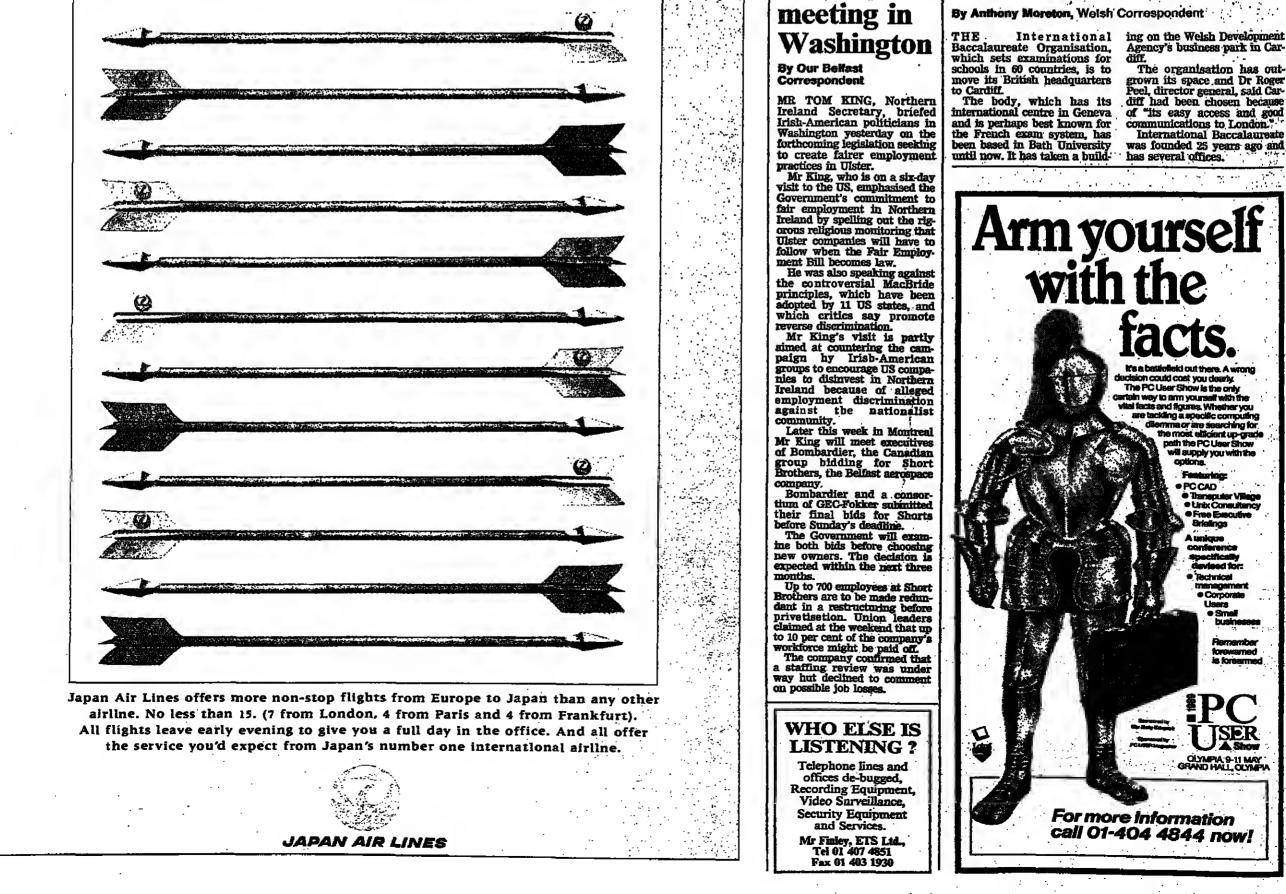

with the entire deal. If Enter-prise lost, it might come away... with nothing or very little. Mr Laidlaw and certainly British Gas recognise that position, and say they want to be flexible to reach a settlement out of court. That would provide for a division of the shares of Texas Eastern North Sea

among the three companies agreement on an interim man-agement arrangement, and an eventual method of dividing the assets of the company. The trick for British Gas and Amerada Hess is to offer enough to Enterprise to give it

an incentive to keep the dis-

an incentive to keep the dis-pute out of court. Enterprise, however, has given no hint that it will play along. Mr West says British-Gas and Amerada Hess have made plain that they want assets, not minority shares of a company. He says they have no rights to assets, adding that Enterprise will not hargain away those of Texas Eastern. The most he will say is that Enterprise recognises the two companies' desire for assets and may consider selling some

from its portfolio. It is here that Enterprise's bargaining skills will be put to the test. Enterprise will have to decide, in particular, whether its old rival British whether its old rival British Gas has the nerve to see such a matter dealt with in court. British Gas, too, might walk away with nothing. After repeated mishaps for British Gas in the mergers and acquisition area, that would serve only to call into further

British schoolchildren need but were disastrous for British, to be rescued from the "Save hence for the universities. British Science" campaign fonnded by discontented Oxford scientists, for it is an excellent time to be taking up omy and presided over a dou-science, argues Dr Terence bling of university research Kealey, of Cambridge Univer-bity. Dr Kealey, a lecturer in clini.

sity. Dr Kealey, a lecturer in clini-cal biochemistry, says that by the mid 1990s, university lec-. turers recruited in the expan-sion of the 1960s will be retiring, creating thousands of Furthermore, the remark-

able expansion of the British economy will create even more research jobs in industry and consequent investment in science.

Universities have constantly claimed they ought to be expanding but lack of govern-ment funds prevents them educating more undergraduates.

In fact, 15 per cent of all undergradnates are being admitted with less than three grade Cs at A level – a stan-dard too low, many dons concede privately, for most students to benefit from a British university education, he says.

By John Gapper

THE IDEA that science is sick Dr Kealey contends that the governments of Mr Harold Macmillan, Mr Harold Wilson and Mr Edward Heath enjoyed considerable academic support but were disastrous for Britain,

ona question tha valua of higher education," he concludes. His recommendations for reinvigorating British science include a 10-yearly review of permanent academic staff and re-application against open competition for those who appear to be unsatisfactory. Another is that all academic

Another is that all scalemic staff, of whatever grade, should be free to negotiate their salary with their employer. Dr Kealey, also wants that part of the science budget cur-rently administered by the Uni-versities Funding Council (for-merly the University Crant

merly the University Grants Committee) to be transferred to the research councils.....

Science fiction - and the true way to save British science. Policy Study No. 105. Centre for Policy Studies, 8 Wilfred Street, London SW1E 6PL (24.95).

MR DOUGLAS HURD, Home Secretary, is likely to make a Commons statement today after calls for further tightening of shotgun laws in the wake of the weekend shooting incident in Tyne and Wear. A man was killed and 14

expected

from Hurd

people were hurt when a gun-man opened fire with a dou-ble-barrelled shotgan in Monk-seaton, near Whitiey Bay. Mr Robert Sartin, a 22-year-old local man, was last night charged with murder. Mr Boy Hattersley, shadow home sceretary, said yesterday

it was likely that new legisla-tion would have to be considered to tighten firearms security and certification. Mr Hurd, who has asked for

a full police report into the shootings, is likely to face calls from backbench MPs to consider whether the recently passed Firearms Amendment Act provides for tight enough controls over the issuing of gun licences and the storage of

Weapons. The act will not be fully in force until July, when the sec-tion covering licences is enacted. New restrictions on the ownership and use of

Usdaw delegates vote to

By Michael Cassell, Political Correspondent of the inexorabls move to electronic trading that began in the 1970s with the distribution of jobber's quotes by television and which, after the Big Bang in 1986, resulted in the virtual

desertion of the London trading floor. On a more profound level, they show that the exchange clearly understands how precarious its position might become if its competitors -which include computer and information services companies such as Reuters as well as other exchanges - are able to outpace it in the race to pro-vide an electronic marketplace where computers handle every aspect of trading after bargains

aspect of trauing after bargains have been struck. A number of US stockhro-kers, indeed, are already using computer systems that trade antomatically once a predetermined stock price is reached; such programmed trading systems were implicated in the speed with which the US stock

markets fell in October 1987. Mr George Hayter, tha exchange's head of information and settlement services, plays down the battle for "electronic imperialism," pointing instead to the need in London to cut costs and risk and lay a better foundation for changes in rules and trading procedures.

the ownership and use of self-loading, pump-action guns are already operating. Mr. Douglas Hogg, junior Home Office minister, speak-ing on BBC radio yesterday, said the act had introduced measures to tighten gun con-trols and the circumstances in which people could keep guns in "a very comprehensive" He agrees, however, that competition is never far from his mind: "I suppose there is a race, in a sense. A lot of exchanges are watching each other to see if they can in "a very comprehensive" way. It was not possible, how-ever, to legislate against the "isolated act of a madman." improve on the other fellow'a electronic marketplaces. Up to now the UK has held the lead in Europe hut the others are

Barlow Clowes court bearing

resumes today By Richard Waters

THE LIQUIDATORS of Barlow Clowes return to court today in an attempt to disentangle the rival claims of different groups of investors in the company, a year after it failed. The hearing, expected to last four days, should smooth the way to a further payment to the investors in Barlow Clowes Gilt Managers, the UK

S TOCK EXCHANGE plans to develop a coherent set of trading snpport ser-vices, now being disseminated to member firms, are on one level simply a logical extension of the membership, but elec-tronics is lowering the barriers internationally and that means competition. We know the onus is on us to ensure the exchange maintains a competitive advantage and the developments we are planning are a way of maintaining our lead."

The consultative document or "green paper"

an integrated electronic marketplace - a single, overall trading service where four kinds of instrument, domestic and international equities, gilts and traded options, can be traded through a set of services that share a single common information systems

architecture. That means that where the

same set of functions need to be performed in different mar-kets - checking details from buyer and seller, for example - one common set of checking facilities only would be needed. says: There would be common coding standards for securities,

connterparties, transac-tion/bargain references and other codes generated within the system. And there would be a single link between member firms and the exchange a single communications channel with one set of rules for connection and communication. A single terminal or computer system should be able to initiate any function of the trading services. Put simply, the market

would appear to member firms as an electronic black box to which they would be linked hy a standard telecommunications channel. Stock prices and information would be disseminated from the market place; bargains, once initiated, would vanish into the hlack box, to appear later, checked, We have a market, we know

George Hayter: wants to improve trading methods

matched and ready to be fed into the settlement process. The henefits to members would include, the exchange

• A reduction in unit trading costs through integrated access that would reduce communications costs, single entry of trade details and automatic execution.

• Trading risks would he reduced hy faster trade confirmation and an improvement in the information available on the status of orders and trades. • An opportunity to cut tha cost of systems development and maintenance hy the reduction in the number of services that have to be supported and the provision of a single data entry point for all trading pro-

The way in which the exchange has gone about planning its electronic marketplace emphasises a substantial change of attitude within its council and subcommittees. First, it is huilding on its existing services rather than -

as was the intention immedi-ately after Big Bang - rede-signing the whole system from where share trading is increas ingly carried out through series of electronic blips travelling down telecommunications scratch

Existing services include lines and where, with the aban-Seaq and Seaq International, donment of the trading floor, there is no symbolic physical the domestic and international price dissemination services, Saef, the automatic small order centre to the market. Some markets, the Nasdaq over-the-counter market in the execution system and Checking and Sequal, the trade matching services.

Those were huilt piecemeal when they were demanded and often against tough time con-straints. The green paper proposes a three to five-year timescale to make these services converge. Second, it is attempting to

involve its memher firms in the decision-making process in an unprecedentedly open way. What are your views on the principle of one overall trading service encompassing all the [Stock Exchange] markets?" the green paper asks. "What are your views on the impor-tance of the proposed benefits? Would your firm be willing to assist us in the subsequent

stages of this work?" r David Lister, head M r David Lister, head of husiness direction, and Ms Joan Hardie, manager of the husiness analysis services division, who are the principal authors of the green paper, say it is an excit-ing departure. Members had been consulted on the development of individual services before, hut never on such a broad front. "We are not an island, far from it," Mr Hayter adds.

"Everything we do now has to be capable of commanding a consensus There is, however, a sense of

urgency, reflected in the date of May 12 the exchange has set for replies to the proposals. The proposals are, in a sense, the sxchange authorities' answer to what the role of the exchange should be in a world

US, for example, have never had a trading floor. Others, such as New York, which still depend on human specialists to match bid and offer are increasingly feeling the need for automation to enable it to continue operating after trading hours. Mr Hayter says the Stock Exchange is looking for ways

in which it can collaborate with Nasdaq (on which Lon-don's Seaq is modelled) and Instinct, the electronic system offered hy Reuters. But every stock exchange management knows the com-

11

petitive advantage that can accrue from setting the standards for electronic trading rather than following a competitor's lead.

There is intense activity around the world as companies and exchanges jockey for position. Reuters of the UK and Telerate of the US are examples of quote vendors with broader amhitions. The Chi-cago Mercantile Exchange and futures exchanges in New York, Paris and Sydney are working on Globex, an electronic futures exchange. Nas-

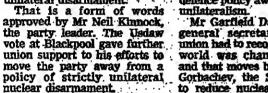

daq is already offering elec-tronic trading in London. London, with its screen-based trading system, may have, as Mr Andrew Hugh Smith, exchange chairman, claimed earlier this year, advantages over floor-hased markets such as New York and Tokyo. But electronics is a great leveller. The green paper may not be a moment too soon if London is to hold its position in international markets.

To paradise we've added 18 holes.

A carpet of green grass stretches out beneath your feet. A pleasant breeze blows from the sea, which offers a contrast of colour to the

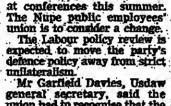

DELEGATES at the annual conference of the Usdaw disexpected to shift towards a less strict version of unilateralism tributive trades union voted. at conferences this summer. yesterday to support efforts by the Labour Party to take advantage of any opportunities for "multilateral, bilateral and unilateral disarmament."

Istel flotation rethink

drop strict unilateralism

The union has until now backed strict unilateralism, although it cast its block vote.

By Hugo Dixon

ISTEL, the UK information technology services company, is having second thoughts about floating itself on the Stock Exchange.

When the company was spun out of the Rover Group in an employee buy-out in 1987, its intention was to seek a flotation by 1991, However, concerns that that might leave it open to a takeover by a hostile predator have led Istel's board

to reconsider the plan. It has appointed Broadview Associ-ates, a financial advisory com-pany specialising in informa-tion fechnology, and Robert Flewing, the merchant bank, to help formulate its future strates. strategy.

One alternative to a flotation would be to sell istel to a farge friendly multinational, which would give it sufficient funds to develop its business.

cation from Ernst & Whinney, liquidator of Barlow Clowes International, the offshore fund, seeking to establish that up to £16m of BCI gilts found their way into the UK fund. If it succeeds, that will reduce the pot of money available to the UK investors.

For its part, Cork Gully, liq-indiator of BCGM, is trying to establish that up to £10m found its way from the UK into the offshore fund,

ONE OF THE WORLD'S LARGEST **EXPORTERS OF** LIQUID PACKAGING BOARD HAS JUST SET ANOTHER NEW RECORD

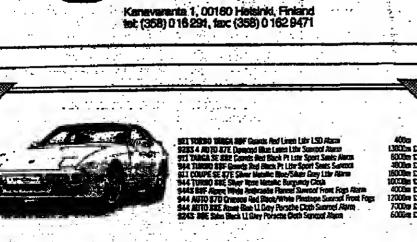

Enso is one of the world's largest exporters of liquid packaging board, and a major supplier of pulp and paperboard.

In 1988 net sales of Enso Pulp and Board Products grew by 12% to 357 million Pounds*, Sales output reached a new annual record of 894,000 tonnes. - 1 GBP = 7.5 FM

Solid, steady growth In 1988 the Enso Group supplied almost 1300 million Pounds'

worth of pulp, paper, board and wood products, an increase of 21 % over 1987.

The reason for this success: every Enso product is developed to meet the needs of customers and consumers in a changing market.

MAYFAIR -

ENSO-GUTZEIT OY

You're enjoying all this green has to offer. That's to be expected. In this paradise there's no forbidden fruit.

neighbouring countryside: green and blue.

Above you, the sun. And before you, 18 holes to play. For the first time it doesn't seem to be enough. You'll soon discover that a round of golf in Spain is full of temptations.

You'll feel tempted never to let the game end, in order to make the most of the time and place

You'll feel tempted to go dangerously near the bunkers that border on the beach, so as to admire the beauty of the coastline. Or tempted to forget everything and spend the rest of your holidays there, playing round after round. You'll leave from ome to time, but only to go as far as the first-class restaurant which you discovered this moming, just by the entrance to the course.

Without doubt, paradise must have been like this. We've just added a few holes. And replaced the serpent and his apple with golf clubs and golf balls. Enjoy the difference

Spain. Everything under the sun.

With effect from 2 May 1989 the rate of interest applicable to Personal Term Loans will be increased to 1.4 per cent per month (APR 18.1%). Also the rate applicable to Educational Loans will be increased to 1.2 per cent per month (APR 15.3%).

FINANCIAL TIMES CONFERENCE EUROPEAN BANKING CONFERENCE Venice, 15 & 16 May 1989

Two years ago the Financial Times arranged a highly successful European Banking Forum in Milan. On May 15 end 16 tha FT returns to Italy for a further meeting in this series, which will be co-sponsored by La Stampa and ABI the Italian Bankers' Association. Another excellent group of Italien spaakars has accepted our invitation to participate and tha contributors from the reat of Europe and Irom the United States cover a wider range of subjects than was the case in 1987. Banking in the Single European Market is one of the principala themes at this year's Forum.

The conference will be chaired by Win Blachoff, Chairman of Schrodars and Professor Mario Monti from Bocconi University and speakers will include: Professor Glutiano Amato, the Italian Treasury Minister: Anthony Soloman of S G Warburg Inc., Hans-Jörg Rudloff of CSFB, Emilio Botin of Banco Santander, Geoffrey Fitchew, Head of DG XV In Brussela, Sergio Pininfarina of Confindustria, Francesco Paolo Mattioli of Fiat, Professor Norbert Walter of Deutsche Bank, Robin Hutton of the British Merchant Banking and Securities Houses Association and Samuel Brittan from the Financial Times

COMMERCIAL AVIATION & AEROSPACE -TOWARDS THE YEAR 2000 Parie, 6 & 7 June 1989

The Finenciel Times will once again be holding a Commercial Aviation & Aerospace conference at tha time of the Paris Air Show. The intention is to provide a of the Paris Air Snow. The Intention is to provide a high-level forum to address e variety of issues stamming from increasing liberalisation in Europe - and elsewhere, the approach of the onlifed Common Market in 1992 and, with the vigorous growth in air travel demand, the problams of congested skies. The achievements and prospects of international collaboration in the industry will also be analysed, as well as the manufacturers' role in meeting the changing needs in the airliner marketplace.

Gunter Eser, Internetional Air Transport Association (IATA), Signor Ripa dl Meana, Commissioner for the (IATA), Signor Kipa di Meana, Commissioner for the Environment, Wolfgang Philipp, Eurocontrol, Brian Rowe, GE Airoraft Engines, Lou Harrington of Douglas Aircraft Co, Adam Brown of Airbus Industrie and Larry Clarkson, Bosing Commercial Airplanes are among the distinguished panel of international speakers.

THE PUBLISHING INDUSTRY IN THE SOS London, 26 & 27 June 1989

The Financial Times is proposing to arrange a high-level The Financial Times is proposing to arrange a high-level conference to look at the growing internationalisation of the publishing industry and the prospects for newspapers, magazines and books, both in the UK and abroad. Under the chairmanship of Sir Richard Storey and Sir Frank Rogers, speakers leading the debate include: Peter Davis of Reed International; Yves Sabouret of Hachette; Ralph Ingersoil, Cheirmen of Ingersoil Publications; Rolf Paltzer, Managing Director of G & J of the UK and Michael Turner, Executive Vice President of Thomson Information Services.

UΚ

MANAGEMENT: The Growing Business

How to seek an imprint overseas

Charles Batchelor follows the experiences of a London label company in its quest for export markets

IOT EXPORT INATKETS
In a few years' time freight trains bound for the Continent will be rolling past Chris King's label gendeling factory, which is sandwiched between a tangle of sailway lines in Herne Hill, south London. By 1993 and the opening of the Channel Tunnel, Labelking, which does not at present export to mainland Europe, hopes to have a foothold/of, its own on the Continent, possibly through a joint venture will a French company. Else the owner-managers of many growing businesses, King has been taking a close look at the way his markets have been developing and cuncheded that the failure of his company will depend very much on his ability to self overseas. There is still an increasing demand for high quality adhesive labels in Britain but he believes even larger untapped markets are to be found across the Channel.
Tam convinced that in our industry our competitors and our markets won't just be in Birmingham but in Zyons and Madrid," he says. "Ws are part of Europe and that is our home market. I see exports as being to Africa or Rastern Europe."
Already one or two of his competitors have begin making acquisitions in France or setting up sales offices on the Continent. King also thinks the German label printers are starting to make inroads in the UK.

make inroads in the UK. King has been thinking serionsly about selling into overseas markets, in particular the US and continental Europe, for about two years now but has yet to take the decisive step. To help himself firm up his thoughts he applied to the London Chamber of Commerce for the help of an Export Development Adviser. The Department of Trade and Industry announced in January that it was creating a nationwide team of 31 advisers to help synwing communics to ernert.

The London Chamber, which has three advisers attached to its export unit, has sent John Drury to Labelking. Drury had many years of oversees experience with GKN, the engineering group, before joining the DTI sears. a selficione a selficione de la

Drury meets King in his Labelking employs 32 people conditioning unit and a radio playing on the shop-floor

Drury explains how the export programme works. The first meeting is to determine whether the programme would be suitable for Labelking. If King decides to go ahead he can have as many hours of. counselling as he needs at s. rate of £15 an hour.

Drury then asks King to tellhim a bit more about his business. Labelking makes adhepliers of large food retailers. snch as Sainsbury and Waitrose but about 19 per cent ofits business goes to manufac-turers of toiletries, stationery He has considered appoint-and to airlines. A few years ing a salesman to sell into ago a turnround time of two mainland Europe ar appointing weeks was considered good in an agent. But good calespeople the label inductive but are affinite to find while an the label industry but improved technology and pres-

sure from customers has cut.

delivery times to a few days.

cramped office overlooking the factory floor. Their discussion the London factory and a sec-is carried out against a back-ground of the whirr of the air-ton. Lincolnshire, five years ago. Turnover in 1988 was E8.6m but King is aiming for EA.5m in the current year and he still has plenty of unused capacity. Competition is tough and has grown from about 70 companies when King started in 1972 to around 500 though he reckons Labelking ranks about 12 in sales terms.

asks. It turns out that King has thought about the US. In fact, he has spent some time Labelking, it turns out, has exported before. Five years pre-viously it received an order researching the US market; has made s number of trips to the south-eastern states and has from Kuwait and has since thought of setting up an opera-tion in the area. A population of some 30m people is served by only five or six label printmade occasional shipments, King feels, however, that occa-sional dealings with Kuwait offer no pointers to what he

should be doing in Europe or are difficult to find while an agent would not be appropriate for Labelking's products, which are not sold off the shelf

Chris King: considering Kuwait, US east coast, Nigeria, Spain

but require close co-operation pected problems in a joint ven-between the food retailer or ture with a US partner. He packer and the printer. King has already decided that the best option would be to team up with a French label printer. He has written to 500 companies in France and received written of a Alternatively he could set up in the US on his own, starting by exporting and building up enough business to justify e local factory. "It comes down to the peo-

companies in France and received replies from 30 of them. He has visited some of them in France while others have come to England to visit him. King is thinking of team-ing up with one of these com-panies to establish a joint oper-ation in Snain Labour costs ple," says King. "I have visited banks in the US and there is finance available. But it would take six months to do it. I am not averse to making the effort but I don't have the time." ation in Spain. Labour costs

Drury suggests a further option - Japan and the Far there are low for exporting throughout Europe while the Spanish market itself is large East. Could the Japanese company which supplies Labelking and under-exploited. Has King considered other with some of its printing equip-ment introduce the British company into the Japanese market? King thinks not because his Japanese supplier markets? asks Drury. Nigeria, says King, though Drury recoils at the problem of get-ting paid. What about the eastprints labels as well as making ern seaboard of the US? he the printing equipment. The Japanese market is anywsy well covered by several hundred local companies.

After the first two-hour ses-sion Drury has e far better idea of Labelking's business while King has been able to test his ideas with an experienced out-sider. Labelking is more sophisticated in its approach to exporting than many of the ers, none of them very big. King believes the quality of print that he could offer is bethusinesses Drury has seen. It remains to be seen whether, with Drury's help, King's ideas ter than that available from US can be turned into action.

For exporting help: contact London Chamber of Commerce,

(tel 01-248 4444), your local

chamber of commerce or DTI

competitors.

But to go into the US King needs to find a partner he can trust. Before he set up in business on his own account, King worked for a large paper manu- chamber of con facturer which ran into unex- regional offices.

Enterprise agencies

Ian Hamilton Fazey reports that some directors do little more than attend meetings

the private sector's being done with tha sponsors' depth of commitment to enterprise agencies in the UK has been thrown into question by research carried out by Durham University Business

School The sgencies have been important in the development of Britain's small business sector in the past ten years. Their initial role was to help people who did not know how to set up their own businesses. This tapped a deep-seated need that saw their number grow to 300

by 1986. The private sector's role in supporting them remains crucial. Nearly all get their funds from central and local government, the private sector and income earned from various activities.

However, the research into the roles played by the agen-cies' chairmen and directors shows thet the majority of business leaders who serve on the board of their local agency play a minimal role, ettending meetings but doing little else to help.

The average agency has 12 non-executive directors who meet only at two-monthly intervals, when, on average, only nine of them turn up. In most agencies the chairman and one or two other individnals are really committed, hut the other directors adopt a much less involved "overseer" role. This is not surprising, since

half of the directors are nominated by sponsors to adopt a watching brief over what is

In brief... Exporters who make use of government assistance to build up overseas sales are having to pay for more of the services and from this month

will be required to use a DTL Service Card. The card, which is free, does not provide extended credit but It does allow companies to pay their bills on a monthly basis in arrears by direct debit. Previously customers for export services had to pay in advance. The DTI says the

money. Another 17 per cent are nominated by other interested parties such as local authorities. The proportion actually invited to join boards because they can contribute relevant knowledge or experience -people who are expected to be

doers" rather than mere "watchers" - is only one-third. The report on the research, which was sponsored by Shell, was compiled by Tim Atterton, who is in charge of the busi-ness school's training programmes enterprise agency staff. It was presented last month to a conference of agency chairmen run by Business in the Community, the umbrella orgenisetion for

enterprise agencies. Diplometically, Atterton makes no comment on his findings but the fragility of the enterprise agency movement's support structure is obvious, as well as its vulnerability now that the Government is with-drawing financial support and expecting the private sector to pick up the burden. The research shows that

most chairmen are highly experienced managers. Only 28 per cent of them were retired and more than half had run or were still running a husiness. Half were from large companies employing more than 500 and e quarter from smaller businesses with under 200 on their payrolls. Medium-sized companies in between contributed 11 per cent of chairmen, the same proportion as the civil service. Only 3 per cent

were local government officers. ment by other board members. Manufacturing industry proespecially those who might vided the greatest number. provide special knowledge or with 39 per cent. Professional cxpertise. services such as accountancy · Keeping the funds coming practices supplied 18 per cent, with 13 per cent from service Concern and confusion over industries, S per cent from retailers, and the rest from s government policy towards the agencies

wide variety of other sectors. Valued attributes were credisuccessor as chairman. hility within the community. business experience, detailed local knowledge, a strong netto the agency. work of contacts, and access to spreading the load around the board, however, were shortage of time and lack of commit-

potential sponsors. Time spent on agency business was five bours a week. The majority believed that this was nowhere near enough hut could not spare more.

The prime motivetion for taking on the job was to con-tribute to local economic revival, followed by peer group pressure a chorteen of other hers to get more people involved in specific tasks such as property management, links with schools, monitoring an pressure, a shortage of others capable of doing it and per-sonal ambition.

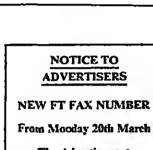

Many want Business in the Community to provide relevant Half of the five hours went on strategic planning of agency activities and a third on external liaison with government, sponsors, potential sponsors and the like. The rest went more agencies form networks in order to cut duplication and into operational manage The agencies spend a lot of time dealing with people who walk through the front door and ask for help. This is not helpful to an ordered existence or controllable spending. The chairmen reported six

major problem areas: • Difficulty in monitoring overall policy and direction and relating individual projects and activities to an overall

strategy. • A need for more involve-

card will allow it to communicate more effectively with users of its services.

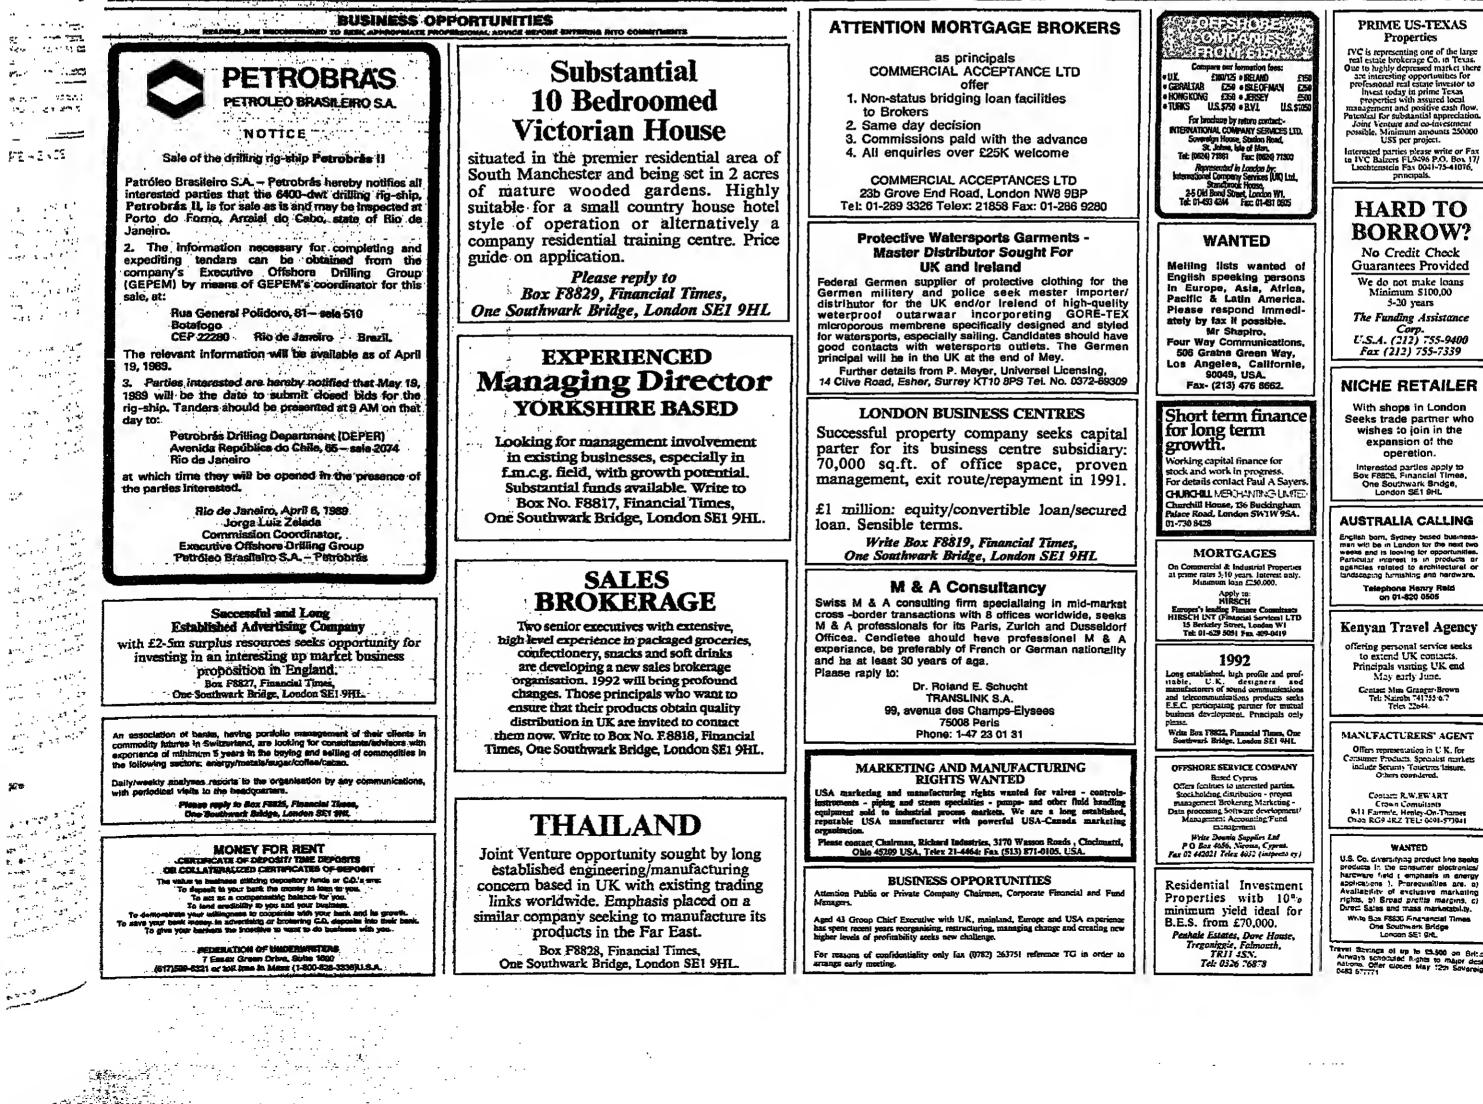

are now being made include market information enquiries and requests for overseas status reports on potential customers or partners. These will cost £50 (plus VAT) for work taking less than four hours and £100 for work taking more than four bours. In all cases, though, the maximum charge per project will be £100.

Busy as you are – how can you possibly keep track of all the world's stock and financial markets? Or of the major currencies and their relative performance and prospects? Or of investment opportunities broader than the conventional range of options?

The surprising answer is 'very simply'. That's because Lloyds Bank International Private Banking was designed to help people like you cope with problems like these.

Your Private Bank

We give you the personal attention of a specialist account executive, your personal adviser. He or she is responsible for discussing your financial objectives – and for mobilising the Bank's skills, resources and contacts to help you achieve them.

It is rather like having your own private banker. (If you can imagine a private bank having branches in 40 countries, with contacts everywhere.) To find out more, please contact Keith Skinner at our Head Office, 6 Place Chevelu, 1201 Geneva, or telephone (22) 208611. GUIDE

Cayman, Dubai, Geneva, Gibraltar, Guernsey, Hong Kong, Jersey, London, Luxembourg, Marbella, Miami, Monaco, Nassau, New York, Panama, Zurich.

ARTS

Ghetto OLIVIER THEATRE

SAY MAY SIR

had an orchestra. But they also had a theatre company, and Sobol takes their story as a hackfrop to the devices power struggle between the SS Officer Kittel (Alex Jennings) and Jacob Gens (John Woodvine), the Chief of Jewish police Gens, the ghetto boss, said that he could save 10,000 Jew-ish lives by handing over 1,000.

ish lives by handing over 1,000. The play examines the nature of his compromise tactics, while prompting wider ones-tions of political compromise. There is nothing contentious

OLIVIER THEATRE The first thing to say in welcoming this overwhelming production for the National Theatre by Nicholas Hytner is that it puts us in immediate contact with one of the great modern creative houses Joshua Sobol's 1984 cabaret documentary of the last days in the Vina ghetto, moderately well adapted by David Lan for the NT, was first presented by the Haifa Municipal Theatre. It is a chilling fact that sub-sequent, even more controver-sial plays than this, have com-pelled Sobol and his associates to abandon the theatre, a sort of Israeli Royal Court, they founded 20 years ago, after the Six Day War. The contemporary Israeli theatre lives on the edge and on the brink, and the National does it honour in appropriately wilna, like the other Polish phettoes at Warsaw and Lodz, had a theatre company, and the SS officers at a dance and

hanged for committing nurder. The Jewish police mingle with the SS officers at a dance and the girls comply with some explicit serval demands in a daring frieze. I am not sure the idea of passivity, of non-resis-tance, is sufficiently explored, though it is elequently expressed in the white faced, acrobatic mine of Linda Kerr Scott as the dariation's domany. This is a tremendous perfor-mance, and the has a vocal con-plement it. Maria Friedman's yearning delivery of the shetto

songs that have been bril-Hantly arranged by Jeremy Sams. If the evening now con-jures memories of Pip Simmons' An Die Musik crossed with The Diary of Anne Frank, its guiding spirits are surely Aleichem and Chagall, and the Fiddler on the Roof style cho-ruses do not lower the tone; they gloriously reinforce it.

As I recall the Halfa production, there was more emphasis on recollection and more shock value (obviously) to Doron Tavori's saxophone-blowing Kittel. Jennings remains a sar-donically, aloof character, but one for whom culture has a grim purpose of diversion. The actors persist with their satirical revue, culminating in an all-out Wagnerian rhapsody for saluting Hitlerites melding into a glorious "Ode to Joy." Jen-nings's Kittel applauds wildly, hands out challa bread and jam and pulls a grisly trick.

The stage is imaginatively coccupied throughout, Bob Crowley's design deploying a Chagall-like receding domestic perspective cruelly imposed on perspective cruelly imposed on Constructivist insets in a king-dom which was nearly a little Versailles for Gens, and a job opportunity for the bustling lit-tle tailor of Anthony O'Don-nell, another notable perfor-

Refugees from Beirut

Susan Moore reviews the exhibition of Lebanese modern art currently at the Barbican

The prospect of this visit to the Barbican made me think of a recent trip to the Armenian island and monas-tery of San Lazzaro in Venice After a tour of its library. approached via a vestibule dec-orated with Tiendo

orated with Tlepolo frescoes, the Mekhitaristan Father proudly announced: Now I will show you our gallery of modern Armenian art." Armenian art?

What is Lebanese art? Three. years ago, the British Lebanese Association set out to inform us. Its current exhibition at the Barbican (until June 2) brings together the work of 70 artists (266 exhibits) from the late 18th century to the present day. Emphasis rests squarely on the 20th century and the period since Lebanon's inde-pendence in 1943. Losis have come from Beirut private .col-

after 1937. Glbran Khalil Gibran (1983-1981) is the most remarkable. This cult poet, author of "The Prophet", has been allo-cated a room of his own. His pale, flat, spiritual works, technically reminiscent of Puvis de Chavannes, evoke a solitude and primeval desolation akin to Munch. None of the celebrated portraits he painted in New York of the likes of W.B. Yeats and Lady Gregory are represented. Here instead is a self-portrait with muse of 1911. Lebanese artists continue to delight in painting quiet interi-ors, and exuberant flower-

"Append to the Surri-by the cult poet GDIng Khalil Gibran, c. 1925

plays are about the loss of innocence, the corrosion of vir-tue and distortion of truth. The brilliant white light of Corfa in 1966 is succeeded by the sinister atmosphere on the volcanic Cycladic island of Santorini in 1990. In A Table For A King,

Vanessa Redgrave

Vanessa Redgrave plays the wistful Mrs Honey from Missis-sippi who refuses to give up her prandial post for the visit-ing King of Greece in Laurence Durrell's favourite taverna. In Keeps Rainin' All The Time, Redgrave plays Heather, a folk singer and protective compan-lon to a stricken writer whose book, eventually recognisable as the first play, is to be filmed as a musical; Mrs Honey is reported, by Heather, to have gone mad in Goa on discover-ing that the police lock you up ors, and exuberant flower-pieces, still-lives and land-scipes. Perhaps it is art as an antidote to war. But one can bear-state shells exploding around fhem: Conflict is implicit and explicit. There are collages of disaster, images of wounded militia, and men wounded militia, and men mill you know who you are. So, identity crisis and notions of bospitality come into it, too. On Corfu, Mrs Honey teams np with another lost soul, the virginal Jewish

LYRIC THEATRE, HAMMERSMITH In spite of the unappetising title, we are off to sunny Greece in this strangely per-sonal and intriguing double-bill by Martin Sherman. Both The callow writer in Part One, whose chronic inaudibil-ity is masterfully conveyed by Rupert Graves, becomes a wild, staring Ben Gunn figure in Part Two, Arthur Dignam a messianic wreck whose conversation is restricted to gnomic phrases while the rumblings gather force and the cold wind blows in from the Levant.

A Madhouse in Goa

The apocalyptic transformations - Corfu before the advent of the Colonels has become a paradisical memory frozen in fiction, as in Edith Wharton or Somerset Maugham – embrace all Sherman's characters. Larry Lamb's bronze-limbed host on Corfu is now a lascivious old acupuncturist dying of AIDS. Heather has cancer. The glib film producer (Graves in designer casuals and swishing pony-tail), who promises good visuals for all those who are not "listening-oriented," is also condemned.

Although the second play goes on a hit, and too much is too quickly crammed in, I respond with admiration, if not. enthusiasm, to the evening's have composed the attractive chaotic ambition, wry cyni-

A Small Green Place

TOWNGATE THEATRE, BASILDON

Colin is a teenager, living with his widowed mother in an anonymous city. He longs for the countryside in which he was born, and only finds soli-tude in a stretcb of derelict land in the middle of city. But the planners want to turn his piece of peace into a car park. Colin resists; he converts his friends to the cause and they lie down in front of the hull-dozers untll authority relents . .

That, with very little trimming, is the plot of A Small Green Space, an opera for young people by Ilona Sekacz and Fay Weldon which has been commissioned by English National Opera's Baylis Pro-gramme. It is expressly designed for touring, the world première took place in Basilwhen their image is threatened by adverse publicity. The directness seems at first a virtue, but swiftly becomes the major stumpling block, as don's Towngate Theatre last Thursday, and moves to Bar-row in Furness, Buxton, Glasgow and Bury St Edmunds before ending its run at The Place, London, in early June. Sekacz's and Weldon's paean to the virtues of green con-

sciousness and the power of community politics is neatly scaled for its purpose. The twn parts play for an hour and a half. A corps of six professional singers from operatic and rock backgrounds takes the main incapable of appreciating argu-mants with subtlety or ambiguroles, but the chorus members are to he recruited and rehearsed locally in each of the centres visited. The target ity, or that conserving the environment is just a matter of

audience is evidently the 15-18 age group, but musically or intellectually it is unlikely to preserving everything from the predations of progress does nobody any favours. hold many difficulties for chil-

Sekacz is a much admired composer for theatre and television, but little of this score bas the memorability of ber best screen work. The West Side Story singalong choruses and saccharine melodies seem to be self-consciously "written down" to the audience, while the jazzy accompaniments and low-density rock riffs try too hard to be all things to all comers. Weldon's libretto contains its fair quota of banalities, and few traces of the sharpness and precise observation of ber work in other forms.

David Sulkin's production with designs by Jane Green has clearly been carefully considered and the professional and amateur elements have been well co-ordinated. Garry Magee sings Colin and has dubious task of projecting many of the most sugary vocal lines; he still manages to give the opera most of its depth. Stephen Austin also makes a mark as the reptilian planning officer Douglas, while there is noisy trio of punks led by Ismail Taylor Kamara and Enid Williams. Everything ahout the project has to be applauded - except the end

Andrew Clements

The Bourgeois Gentilhomme

dren several years younger. The story is presented with

few frills and a minimum of background. With the excep-

tion of the hero Cohn, and his

mother Linda, the other pro-

tagonists are little more than

stereotypes. There is the understanding girlfriend who

encourages Colin's dreams of turning his small green space

into a nature reserve, the

punks who are converted to the cause of conservation by

his quiet commitment, the

planning aparatchik who is

torn between manifest right-

ness and depersonalised offi-cialdom, and the arch-capitalist

planners who only back down

the shallow, almost naive

moral is pointed and the work reaches its utterly predictable

and woefully sentimental con-

clusion. Neither the issue nor the audience demands such

hland, simplistic treatment as

this: to assume that teenagers

need everything to be painted

in hlack and white and are

ORANGE TREE, RICHMONE

The franglais title bodes ill and the production gets off to a slightly unfocused start, as if a full-scale musical were uneas-ily flexing its muscles in the constricting space of Richmond's little pub theatre. The production has some raw edges and some of the acting seems stylistically uncertain; hut Sam Waters' production has a generosity, warmth and cheerful-ness that ultimately endear.

The production keeps an eye on panto traditions; in a singa-long the audience provides the ground bass to a catch sung by the false-moustachioed chefs and waiters at M. Jourdain's feast. The table has been laid and the meal served with much catching of flying plates and bread-roll juggling. The latter, alas, has nothing to do with today's yahoo yuppies, Mr Waters is evidently stumped

for a modern equivalent of well-heeled aspirant gentility. The romp he settles for is good enough, especially when put over by a singularly pol-ished cast. Two of the company pastiche music; another two ve noreographed τne

mates of up to \$4.5m and \$10m

The Searle collection of land-

lections, and the city's Sursock Museum and American University as well as from private collections in France, the US and Britain.

The result is a curious concoction of the naive, the accomplished and the indifferent - School of Paris and Hyde Park railings; it is impossible to walk around the gallery without indulging in art-historical recognition: Sargent

unmistakable. An impressive portrait of a benevolent Patriach Mikhayil Fadel by Moussa Dib, the acknowledged father of Lebanese art, presides over the open-ing section. This canvas spart, the religious painting is hier-atic, screamingly provincial and strangely unspiritual Madonnas, saints and patriarcbs have one foot in Europe and the other in the Orthodox Near East

Ox-blood red stippled backdrops in the manner of Renolr are popular in secular as well as religious portraits. It is with Decud Corn that the genre at last becomes refined and prob-lems with perspective and technique overcome. Corm trained in Rome in the 1870s, later working as a court painter to Lospold II in Rel-gium. Despite that, his oval images recall the frozen portraits of Edwardian photographs.

As the exhibition continues a dozen or so talents begin to register: Chafic Abbood, Saliba register: Chanc Abboud, Sauba Douaihy, Mustafa Farrouk, César Gemayel, Paul Guiragos-sian, Hussein Madi, Farid Man-sour, Omar Osm, Habib Srour. Some are emignis; others, like Georges Cyr or Claire Suminu, are Lebancee by adoption. Vir-tually all armear to have been tually all appear to have been trained in either Paris or Rome, although an academic art education was available.

cards, Farid Mansour is whiteeyed and half-starved in a compelling self-portrait of 1982. Mouna Bassifi Schnaoul paints a stylized frieze of grieving women; Claire Sununu, a brothel after bombing - Ingres odalisques amid gaping masom That these works of art are here at all is a tribute to the

pride and spirit of the beleaguered Lebanese. Three days before the airport closed 105 canvases left West Beirut. The 76 stranded in the sealed off East sector made the last ferry to dock at Larnaca. The artists' intention is not to plea for compassion, but for dispassion-ate critical attention.

Is there a distinct Lebanese "school" of painting? I suspect the answer is no. What is clear, however, is the confidence and individuality of the voices emerging from the cultural renaissance that took place in acroplane flight to Paris after an explosive is planted, also in Beirut in the 1950s and '60s.

declares: "I wanna die; I wanna join a kibbutz" (Mrs Honey congratulates him on his sense of priorities). In the funniest sequence, young David is carefully seduced by a glistening waiter (Ian Sears) whose humming repertoire is drawn from the Beatles, the Mamas and the Papas, and the Lovin' Spoon-ful's Summer in the City album. Here is a soft Mediterranean echo of Sherman's tele-

pathic mutual masturbation scene in the concentration camp of Bent. David parts with a watch and confusedly sides with the taverna's conspiracy to plant it on Mrs Honey and force her to yield the table. The incriminating evidence is found in a jewel box. In the second play, Heather's son, in a parallel seduction initiated by the producer's girlfriend, becomes an agent of destruction on his

SALEROOM A week for modern masters

Tonight Sothehy's starts a week of auctions in New York through business acumen, the collection includes a Gauguin which should make or break of 1894 with an estimate of up the market for Impressionist, to \$10m; a Renoir "Le pont d'Argenteuil" of 1982 (estimate modern and contemporary art. First off the starting line is up to S6m); a Braque (up to contemporary art, with esti-\$1.8m) and a very striking mates of one, two or three mil-lion dollars commonplace for Egon Schiele of rooi tops, dated pictures painted within the last

1917 (\$2m-\$3.5m). Hal Wallis has bequeathed a Gauguin to the Los Angeles County Musuem, but the Christie's has a large 1974 remainder of a small but choice collection is to be sold. The main work is a Degas ballet dancer (\$5m-\$7m); but the sale also includes an important flowerpiece of asters in a Chinese vase hy Monet. This is dated 1880 and is estimated at

up to S7m. The nine paintings from the collection of Jaime Ortiz Patino are of superb quality: they will be sold by Sotheby's. On the death of his mother in 1980 ne inherited a Renoir masterpiece (now to be sold, estimate \$9m-\$12m), and set about acquiring equally significant Impressionist works to accompany it. There is a wonderful light early Monet of a boating party (S9m-S12m); a Pissarro of the same date and similar in palette (up to \$2m); a Cezanne still life of 1\$93-94 (\$\$m-\$10m) and most stupendous of all a Tahitan Gauguin "Mata Mua (in olden times)" of 1892 (\$20m-\$25m).

The highlight of Sotheby's main sale is Picasso's famous "Self portrait" of 1901 "Yo Picasso" (\$15m-\$20m). Tradi-tional in composition and showing the artist at his easel wearing a white smock with a brilliant orange cravat, it is an impudent image. Its provenance is interesting. It was bought by the poet Hugo von Hofmannsthal in 1912 with the royalties from his libretto for Richard Strauss's Der Rosenkavalier.

Union for a free Europe

EUROPE IS now llving through a period which in retrospect will almost certainly be seen as the most decisive in its history since the immediate

postwar years. Changes in the East have seriously called in question the notion of a monolithic comminist bloc, and hold out at least the possibility that the postwar division of Europe may he overcome. This has coincided with the closer integration of western Europe in and around the European Community. through the adoption of the Single European Act and the 1992 programme; and with eco-nomic weakness in the US that bas reduced that country's ability to bear the full hurden of world leadership, causing it to shift some of its attention away from Europe towards Japan and the Pacific.

That does not mean that the postwar system of military alliances is about to disappear. It does mean that very important changes may be beginning to happen hoth in the relations between those alliances and in the relations between their different members. Many Europeans sense, and rightly so, that tbey now bave a unique chance to shape the destiny of their own continent, a chance which they cannot afford to

Various institutions are available to them for doing this. The Council of Europe, with its admirable Convention on Human Rights, expresses Europe's collective desire to maintain a common civilisation with personal freedom at its heart, and provides a struc-ture into which states can be welcomed as and when they are able to live up to that ideal and be judged by it. The West-ern European Union is the body best qualified to define, and perhaps eventually organise, a specifically European defence role within Nato. The Helsinki process (CSCE) is proving an increasingly valn-able structure for hridging the East-West divide in both military and civilian matters.

Central core

But the European Community is more and more clearly the central core within which Europeans of different nationalities can live, work and on an equal footing. Even states which hitherto held aloof from it now find themselves obliged to conform to its rules and seek closer involve-ment with it - even to consider applying for full memhership. By the same token, it is the body which can best articulate a common European view on world affairs, and defend common European interests in

dealing with the rest of the world. Almost all of its members

feel that as yet it does these things only imperfectly, and thet its institutions need further adaptation to enable It to do them hetter - the most immediate question being the need for closer monetary union to underpin the single market. Behind that apparently technical argument lies the feeling that the Community cannot stay still where it now is: that the unification of the market is impelling it towards greater political unity.

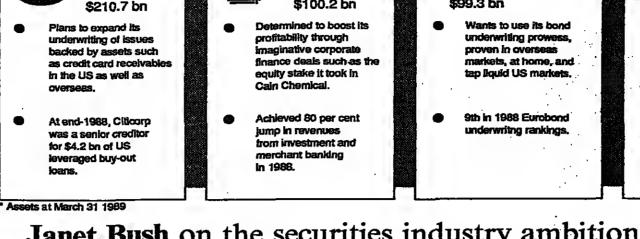

British freedom

The British Prime Minister, virtually alone, proclaims her determination to resist that impulse, ostensibly in order to defend Britisb freedom against an attempt to recreate at European level the interventionist and protectionist dragons she has slain at national level. "with a European super-state exercising a new dominance from Brussels." In so doing she confuses two separate argu-

It is indeed important that the future Europe should be liberal, non-interventionist, open to competition from the wider world. It is also impor-tant that it should be democratic, which implies (though Mrs Thatcber would be the last to say so) that Community law should be made by the directly elected parliament, not by min-isters delegated from national

governments. Bnt neither freedom nor democracy can be equated with national sovereignty, which in monetary matters is in any case now more myth than fact. On the contrary, both are bet-ter served by a division of power hetween different anthorities - some at local, some at national and some at supranational levels. If British ministers are genuinely concerned with the autonomy of individuals, rather than with their own "sovereign" right to regulate that autonomy in the supposed national interest, then they should throw them-

selves whole-heartedly into the process of European integration in order to exert a liberal influence on the outcome. In the specific context of mone-tary union that would mean letting Britain join in the

Investment banking business at nome and expanding abroad. This is the time for making strate-gic decisions. There has already been significant erosion of the 1933 Glass-Steagall law separating commercial and investment banking, which opens up comparing the securities to the securities the up opportunities in the securities

husiness at home. For many, London provided an object lesson in how not to take advantage of such opportunities.

Nowhere did the hanks' vainglori-ous amhitton to hecome full-service global finance houses, offering not only traditional banking hnt also trading and underwriting a hroad range of debt and securities, founder more clearly. It has not just heen a problem with the over-broked London gilts and equities markets, although the retreat from the enormous commitments made to Big Bang has perhaps seen the swiftest bout of blood-letting.

Less well publicised is the fact that, in 1988, only four US houses made it into the top 15 of the Eurobond under-writing rankings - and only two of them were commercial hanks, J.P. Morgan in ninth place and Bankers Trust in 12th. American houses had dominated the market for most of the 1980s; they prudently retreated as the capital-rich Japanese banks bougbt their way into the husiness, some-

times at great cost. More important, the sudden col-lapse of the perpetual floating rate market in 1986 and 1987 and the damaging ripple effect on other Euromarkets taught commercial hanks that once liquidity dries up, a market can

simply disappear. Nevertheless, the global ambitions of the largest handful of US commer-cial hanks remain unscathed though the rhetoric has become more measure

There is a litany of phrases which turns up repeatedly in talks with the commercial banks: no profits bonanza, building on strength, design-ing our product base to fit our customer profile, cost conscionsness, niche-oriented. Mr John Olds.

1.1.1 A.

Janet Bush on the securities industry ambitions of US commercial banks

Five banks with

on overseas securities mar-

None of their rivals are prepared to compete in the global securities mar-kets and few want to try. Chemical Bank appeared to be gearing up for an expanded securities operation hut baulked at committing itself at this stage. Manufacturers Hanover believes its future lies in hullding niche businesses in the US and, to a limited extent, in overseas markets. There are several reasons behind

the five hanks' commitment to expanding their securities operations. They want to compete globally and

believe they have the muscle to do so. Expansion into securities underwrit-ing within the US will, they believe, provide a fuller service to their international clientele by providing access to huge and sophisticated US capital markets at the same time as diversifying risk.

The Federal Reserve had granted these five banks powers to underwrite debt offerings in the US, subject to various capital adequacy require-ments, and it approved equity underwriting from next year. That decision is being challenged in the courts, however, by the Securities Industry Association, in a rearguard action against expanded bank powers which

has so far been largely unsuccessful. The banks believe that only with a full banking and securities underwriting capability will they be able to compete with overseas institutions untrammelled by Glass-Steagall. The growing trend to securitisation turning loans into tradeable securities - makes an increasing portion of commercial banks' business vulnerable to competition from investment bank rivals. They believe that there are no longer any important distinctions between commercial and investd th

universal plans Mr Richard Hnber, head of Chase Manhattan'e securities arm, believes that there is precious little difference

between the techniques of selling on loans, and underwriting and distributing corporate bonds; or between arr-anging private placements of US equi-tiee and nuderwriting publicly

registered equity offerings. "So, what is lacking? Really, we feel that there is no new expertise and no new skills that we have to learn to be able to underwrite positions and trade corporate bonds and equities," he said. "If you tried to explain the US banking system to a Martian, he would think you had escaped from an sylum

Banks still cannot underwrite asset-backed debt issues even when they are generated, for example, by credit card receivables and mortgages from their own balance sheets. Unless

Although regulation remains an active issue, banks have been gearing up in anticipation of expanded powers

the issue is done overseas, it must still be underwritten by a securities house

US commercial hanks have been active for some time in this and every other area of the securities husin overseas but have not been allowed to compete in their home market. Mr Olds of J.P. Morgan, a bank with

a large stable of top tier corporate customers, believes a US dimension is crucial to its international securities busine the IIS

securities amhitions, they talk in global terms with an obvious empha-sis on corporate finance, the tempt-ing, high-margin area targeted both

by banks and securities houses. A commercial bank can act as financial adviser on a takeover proposal, arrange the financing but - as things stand in the US - must still forgo the fee for underwriting any deht or equity involved in a deal in favour of a rival securities house. And in recent years, not only have commercial banks become increasingly active in securities activities but securities houses have started behaving more like banks.

Citicorp's Mr Callen talks about the revolution in corporate finance engi-neered by Mr Michael Milken, formerly of Drexel Burnham Lambert. He used his personal clout in the industry to turn a letter in which the brokerage said that it was "highly confident" of getting the financing for a takeover deal into a guarantee that the funds would be available.

In order to break Drexel's stranglehold on junk bond financing, other-securities houses were forced to go one better and put their own capital on the line, very much like a bank.

Persistent efforts by the SIA to prevent banks getting more powers are meeting with less and less support even within the securities industry. Apart from the prospect of remain-

ing restrictions under Glass-Steagall being lifted, commercial banks see other regulatory opportunities this

Of great importance, for example, are the Securities and Exchange Commission's proposed new Rule 144a (which would simplify issues in the private placement market) and the Federal Reserve's Regulation K, nderwrit trading positions of commercial banks overseas. The Fed is due to reconsider fees." Regulation K this year. The potential for regulatory adjustments is not, however, all positive for the banks. They are concerned that the Fed may be considering whether to require "firewalls" between com-mercial banks' traditional banking business and their securities activities overseas as well as at home. The banks argue that constructing such firewalls overseas would severely undermine their competitiveness against foreign banks because of the

enormous costs involved. Although regulation remains an active and complex issue, the banks have been gearing up in anticipation of expanded powers.

Bankers Trust is a good example of a bank which has already trans-formed its business, de-emphasising traditional commercial banking and, emphasising fee-earning busines emphasising ice-earning business. In 1882, 25 per cent of its net income came from earning fees. By 1998, that figure was 62 per cent. "I think both our head and our heart is already in the fully-fiedged securities husiness," said Mr Howard Schneider, head of BT Securities Corp.

Mr Jim McDermott, banking ana-lyst with Keefe Bruyette & Woods, believes that Bankers Trust and J.P. Morgan have gone further than any other banks to position themselves in the securities business. "Those two have moved aggressively in integrat ing their cultures and are now trying to capture market share," he said.

He ranks the capability of Citibank and Chase Manhattan next, with Security Pacific a rather distant fifth.

Mr McDermott believes that even these five will find it extremely tough going. "At this point in the cycle, the securities industry is facing consider able competitive pressure, margins are slimming and there is the pros-pect of a whole array of new competi-tors." he said, "Anyone who thinks that the incremental profitability at this early stage is going to increase significantly is going to make an error.

Mr Doug Ebert, head of investment banking at Manufacturers Hanover. which made the conscious decision to which made the conscious decision to sheer clear of London's Big Bang and has not applied to the Fed to under-write debt or equity, said: "The red ink has only just begun to spill in London."

Nevertheless, pride and an inexora-ble search for different sources of profit are formidable motivations.

. . .

÷.

- **I** -

There is no doubt of the rewards of non-traditional husiness when things go well. Chase Manhattan made \$224m in net earnings in the second quarter of 1988 on "relatively flat net interest income and increases in trading account income, investment secugains and trust

debate as a full member of the existing European Monetary System. In six weeks' time people all

genuinely free Europe, in all the senses of that term.

over the Community will be electing a new European Par-liament. The parties which deserve to win will be those that present the most convincing programme for creating a

markets which, after all, is the lesson of globalisation. The linkages are not always clear before the event and onr response has become a lot sharper about risk and return on capital." J.P. Morgan is one of five US banks generally agreed to have a shot at entering a super league of interna-tional financial houses. The others are Citicorp, Chase Manhattan, Bank-

lations are illogical and backward. Mr Michael Callen, in charge of Citicorp's investment bank, gives an said: "The perpetual experience made us more aware of how change in one idea of bow the current regulations limit commercial banks. Citicorp can underwrite subordinated debt but has to place privately it in the US or place it overseas

"Take a \$400m subordinated debt issue. You may have to sit with that for six months before you get it all out which could result in market losses," he said. "If you are Drexel Burnham, you know that you can place \$400m by telephone tomorrow."

market with a lot of liquid instruments. That liquidity and name recognition and the ability to do things in the cash and futures markets in the US adds enormously to our inter-market capability," he said.

If the Euromarket does not recog-nise a corporate name and therefore will price an issue less favourably, perhaps it can be done at a better price in the US, he argues. Maybe a debt or equity issue is too large for the Euromarket to absorb without the participation of US institutions.

When bankers talk abont their

Making a spectacular one-off contri-bution to its earnings, however, were the proceeds from an equity stake taken in Cain Chemical which was then sold to Occidental Petroleum, netting the bank \$69m.

"We can't make loans any more. Our strategic options are to do this (securities business) or shut up shop," said Chase Manhattan's Mr Hnber. Perhaps it is not as dramatic as that but we should have a Cain Chemical every quarter - and eventually we will." 1 2 1 4

A flawed US trade policy WHEN THE US Trade Act was

passed by Congress last sum-mer, Washington's trading partners could afford to feel reasonably relaxed. The supposition was that a steadily falling trade deficit would allow the Administration to implement its many provisions with the minimum amount of aggression.

Now that the deadline is drawing close for implementa-tion of the key requirement for action against countries which impose particulariy egregious barriers to US trade, thet complacency looks somewhat mis-placed. The improvement in the trade deficit has come to a halt. anti-Japanese feeling is as strong as ever, even in parts of the Administration, and a truculent Congress is determined not to let President Busb slip into what it perceives as the malign neglect of trade of his predecessor.

Unusually close attention is thus being paid to this year's compendium of barriers facing US exporters. Published at the weekend by the US Trade Rep-resentative, the list provides the basis on which decisions will be taken at the end of the month on which countries to single out for special action under the Trade Act's so-called Super-301 clause.

Barriers

This clause requires the Administration to identify those countries which impose the most serious barriers to US exports and negotiate the impediments away over three years under threat of sanction. The three-year period was care fully chosen to allow most of these negotiations simply to be folded in to the Uruguay Round of multilateral trade talks.

This seemingly moderate approach was considered a marked relief from the more aggressive conditions of the

Gephardt amendment that it replaced. However Super-301 is still a fundamentally flawed provision and incompatible with the smooth working of the multilateral trading system on which all countries, including the US, ultimately depend.

Resentment

The negotiations which it mandates will not only lead to resentment among trading partners who feel victimised by unilateral denunciation and arbitrary threat of sanctions. Super 301 also sets the US firmly on a path of seeking bilateral solutions to its trade prohlem. This could lead quickly into the realm of managed trade and all too easily undermine efforts to strengthen the multilateral system through the Uruguay Round.

Unfortunately the Bnsh Administration cannot now wriggle out of its obligations under the Act. Despite the domestic pressures it is facing, it should none the less strive to keep its Super-301 list to an ebsolute minimum and bear in mind thet its best chances of negotiating away those prac-tices it condemns still lie in the Uruguay Round. Contrary to what many Con-

gressmen now claim, the Super-301 doee not offer an opportunity to enhance economic security by wishing away foreign competition. The only real guarantee of economic security would be e more balanced fiscal policy. Super-301 could ultimately have the perverse effect of damaging the long-run eco-nomic security of the US. It sets a precedent for other coun-tries to impose sanctions of their own against the US in future years when Washington will be seeking to run a large trade surplus to offset its increasing stock of axternal

OBSERVER An accountant, an engineer and a marketing man head the starting grid among inter-

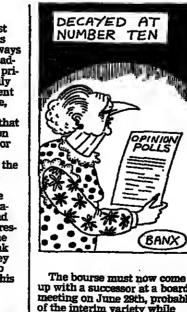

Burst bourse

Co-operation among West Germany's eight sometimes fractious bourses is not always easy, so when one of the lead-ing lights of the Frankfurt private banking scene suddenly gives up his post as president of the city's stock exchange,

tongues start to wag. What they are saying is that there is more to the decision by Mr Michael Hauck, senior partner of the bank of the same name, to resign from the largely representative post than meets the eye.

Mr Hanck, an Anglophile banker with a love for labradors and a perfect command of English, announced his res-ignation a la Karajan on the grounds thet Dresdner Bank had picked off one of his key lieutenants, obliging him to devote more of his time to his bank. Dresdner Bank has denied the accusation. But insiders say that Mr Hauck may have proposed resignation once too often. Although the Frankfurt bourse has established Itself as by far Germany's key securities mar-ket, in-fighting and squabhling among some of its bosses are not unknown. Lines of responsibility with the Federation of German Stock Exchanges. and notably its executive vice chairman, Mr Ru'diger von Rosen, who is also one of the Frankfurt market's three chief executives, may have been par-ticularly strained.

The fact that the Frankfurt exchange, which is dominated by the country's biggest banks may be thinking of converting the president's job, traditionally held by a local private banker, into an executive post may also have played a part.

up with a successor at a board meeting on June 29th, probably of the interim variety while the future of the president's job is mulled over. When one market ties itself up in so many knots, the chances of getting all eight to co-operate can be imagined.

Busted gut

One of the Union Bank of Switzerland's lesser known accomplishments lies in the unlikely field of catering as quickly hecame clear to journalists attending last Friday's lunch reception in London to mark the opening of the bank's new premises in Centrepiece of the lunching hall was a four-foot high statue

of St George astride his char-

ger lancing a fearsome dragon. At first glance, the statue seemed to be made of marble, but on closer inspection it turned out to be meticulously carved out of margarine -190lbs of it to be exact.

It was the creation of Urs Regli, UBS' 33-year-old chef patissier who spent 30 hours making it and who had been specially flown in for the occasion. Only the previous weekend he had won five gold med-als at an exhibition in Karlsruhe for his sculptural creations, (which he makes out of marzipan as well), bring-ing his grand total to 15: Regli and his four assistants for the reception all work for Culinarium, UBS's catering division which has a wellearned reputation for good food, be it serving 6,000 lunches every day in Zurich, or tending the appetites of UBS' guests in far-flung outposts. No one dare use the word canteen at UBS. It has to be restaurant.

BMW's bacon

Eberhard von Knenheim, BMW'e aristocratic chairman, argues with a conviction bred of success, that the only way to succeed as an importer in the fiercely contested Japanese car market is by going it alone. Joint ventures are no solution. At a recent BMW dinner in At a recent BMW dinner in Tokyo he told gnests at his table the salutary tale of the chicken and the pig. The chicken and the pig met for negotiations on a joint venture and out of the talks was born the idea of ham and eggs. Ini-tially the two were very pleased with the idea, but sud-denly the pig became uneasy. "This is all very well," he said, "but while you keep on produc-ing eggs, I end up dead." The chicken smiled knowingly. "That's all right," he said, "that's the way with joint ven-tures." tures."

where I want to get to." A-Day was the day, a year ago last Salanday, when key provisions of the Financial Services Act 1986 came into force. in particular, it became illegal to conduct investment busi-ness, as defined in the legisla-tion, without authorisation.

Even now, the task of authorisation is not quite completed. Some 31,000 husinesses have been approved by the var-ious self regulatory organisa-tions (SROs) and recognised professional bodies which snpervise the investment industry under the watchful eye of the SIB (and 100 or so, have been directly authorised by the SIB itself).

However, 400 or so firms are still operating under interim anthorisation, which means that their application is still under scrutiny, or that they

are appealing against rejection. How much of a clean-up has the anthorisation process achieved? Mr Walker points to the 6,000-odd businesses which failed to make the grade. Most of them quietly packed their bags and withdrew when they realised they had no chance of reaching the required stan-dards. A minority pursued their applications to the point

of outright rejection. Mr Walker also notes that many firms were required to reduce their ambitions. "Quite a lot of those authorised had a business plan which was narrower than they sought origi-

nally," he says. Mr Walker joined the SIB from the Bank of England a month after A-Day. He has introduced a markedly differ-ent style from that of Sir Ken-

neth Berrill, his predecessor. "Berrill was accused of being authoritarian. I've attracted the criticism that we publish umpteen consultative docu-ments and the consultative process never comes to an end. Both are exaggerated views, and I suppose that as a regula-tor you can't win," Mr Walker observes.

Though a voluble defender of the SIB's achievements, Mr Walker accepts that important deficiencies still exist in the framework of investor protec-tion. For instance, he is dissatisfied with existing complaints procedures, where the public is often muddled about the roles of SROs like Fimbra and Lautro. "We need to create a much more clearly accessible comcontroversial area of disclosure plaints mechanism," he says, to buyers of life assurance poli-

A birthday for securities rules

"covering both complaints and cies and other retail invest-

ment products. Many indepen-dent advisers have baen redress." A second area for attention. he says, is that of competence testing and training. At the moment, there is an inefficient dispersal of training effort, for instance across the member-ship of Fimbra, the key SRO which covers independent financial advisers. He would like to encourage induction like to encourage industry-wide certification, such as the kind that already exists in

banking. "I think it's a direc-tion in which we should go." Elsewhere, Mr Walker wants to improve the compensation scheme which was introduced by the SIE last year. The exemptions granted to building. societies; and perhaps also life offices, need to be scrutinised very closely, he says. Also, the absence of an insurance element for practitioners is unsatisfactory: "The risks and costs are not appropriately aligned." 'The bulk of the SIB's workload lies elsewhere, however. The most immediate decisions

are likely to come in the highly

a "white paper" on the 1990 disclosure regime in the middle of May, including "close to final" proposals. Some aspects could actually he introduced before next January, if there is general agreement. Mr Walker is adamant that

improved disclosure must be introduced. He has been con-vinced of this, "having seen the extent to which it is possible for people to be ripped off or misled." The regulator, he observes, has in part a job of education to do, given the degrea of ignorance about financial products and sales methods which surveys of the

Another big project for the SIB involves its planned revi-sion of the rule-book. As soon as he assumed office Mr Walker initiated a simplifica-tion exercise which surfaced as a new draft rule-book last November. He now admits that this first attempt to extract separate general principles on a "bottom up" basis from the existing rules was misconceived. After extensive discus-sions with the SROs and RPBs a "top down" approach to devising general principles will be adopted, and these will be combined with a new layer of

50 or so "core rules". In all, the new rule-book will have three tiers. Each regula-tory body will be able to draw up its own bottom layer of spe-cific rules, subject to a new test of "adequacy" instead of the "equivalence" which was originally required under the FSA. A "white paper" on the rule-hook reforms will he brought out in June or July. Bnt active discussions are already under way.

The third area promising a heavy workload is that of European regulatory harmoni-sation, where new directives on hanking and investment services are being drawn up in Brussela

principle that in future the prudential regulation of finan-cial services businesses, that is, aspects such as capital adoquacy and fitness and proper-ness of personnel, will be conducted on a "home country" basis, while conduct-of-business rules will be applied by host countries. Bnt this will create enor-

mous scope, for potential gaps and misunderstandings. For instance, where foreign-authorised firms are operating in the UK, the SIB will want to have the authority to intervene quickly if things start to go wrong. "The nature of that power is not yet clear. It needs to be sorted out over the next 12 months," says Mr Walker.

or a man who is trying to change the way his country thinks and acts, Mexico's Presldent Carlos Salinas de Gortari does not come over as a revolutionary. Formal almost to the point of woodenness in public, he seems to reserve his reformer's zeal for private conversation and even then he may prefer it to he off the record. Frankness, he intimates, does not have to come packaged in direct quotations. By the same token, Cuauhtemoc Cardenas, the opposition leader who is widely considered to constitute the biggest threat to Mexican stability in 60 years, is remarkably unas-

suming. "It really is not impor-tant," he says, when he becomes president; what mat-ters is that "the citizen's vote be respected in the near future. Both were interviewad recently on their respective home grounds. The President's was 20,000 feet in the air in the private compartment of his

official jet en route back to Mexico City, while Mr Car-denas chose the study of the house of his father, General Lazaro Cardenas, presidant from 1934-40, in San Angel, the capital's most elegant auburb. Neither felt the need for the

presence of aides or briefing books or the other props of the modern politician. Mr Car denas preferred to reply to questions in Spanish, though his command of English is known to be good. Neither would speak gratuitous ill of the other, though the President was not above implying that General Cardenas never

tics. Each seem comfortable in their civility, but, then, both come from eminently civilised and privileged hackgrounds. Mr Salinas, at 41, is 11 years younger than his opponent and has the more catbolic experience, having taught at Harvard. Both proclaim the same Mexican heroes, including Ben-ito Juarez, the self-made Indian who hronght the country together in 1867-72 after the turmoil of Maximilian, and, not surprisingly, General Cardenas, who, among many other things, nationalised the oil industry. But, whereas Mr Car-Salinas waxes at length on the practical political skills of Abraham Lincoln and Winston

Churchill Yet their differences are profound. They may both avow the same broad goal - of a more self-sufficient, modernised Mexico, less weighed down hy the burden of deht - hut their methods of pursuit are as chalk and cheese. Mr Salinas is

FOREIGN AFFAIRS

Same goals, different methods

Jurek Martin speaks to two of Mexico's political rivals about their opposing views of reform

the reformer from within and above, but Mr Cardenas claims the system is incapable of either reforming itself or directing reform; Mr Cardenas s the populist but Mr Salinas believes that uncontrolled pop-ulism is the sure, and possibly easy, route to national ruin.

Both have credentials to back their beliefs. Since becoming president, Mr Salinas has done some things that would have been inconceivable to pre-vious beads of government. In

Cardenas is the populist but Salinas believes that uncontrolled populism is the sure route to ruin

arresting earlier this year the notoriously corrupt chief of the seen their real living standards fall hy 50 per cent in the last oil workers union and only last six years.

But he harbours no illusions week engineering the resigna-tion of the leader of the teach-ers he seems to have taken on that the opposition to institutional reform can be overcome those forces inside the Mexican in the twinkle of an eye. He does not even expect to have establishment most inimical to transformed Mexico when his siz-year term is up at the end of 1994, but he feels that so

Even a supporter of Mr Cardenas was moved to compare Mr Salinas with President Gorlong as the process of reform is bachev in the Soviet Union. Both men, he said, had con-cluded that reform could only be satisfied. balance, a striking beginning, be pursued hy attacking the government's own underpinthen Mr Cardenas in last year's elections can be said to have nings. Mr Gorhachev's targets were the army, the hureau-cracy and even the party, while Mr Salinas had in his struck. His coalition of the centre-left ate into the PRI's majorities as never before. It may well be that if the election had been above hoard, he sights the unions and the vast web of parastatal organisations.

Mr Salinas is not really convinced by the comparison. He denies, for example, systemati-cally going after the established unions, though he insists they need more democratic procedures. But he does argue that he represents change inside his Institutional Revolutionary Party (PRI) and

concedes that many in the PRI do not like reform, or a more open ecooomy or less state intervention. He also gives the impression that he thinks Mr Gorbachev is

operating under a much tighter schedule. He has his own deadlines, not the least of which is to negotiate success-fully a recycling of debt with Western banks by the end of this year. That should make possible some restitution for average Mexicans, who have

'irreversible" by then he will

If Mr Salinas has made, oo

trolled media.

He should know how the system works, for he was ao inte-gral part of it, as son of a presi-dent and a PRI state governor, and he remains coovinced it cannot change itself. "I have said on many occasioos that I wish the corriente critica (the reform movement now within the PRI) the best of luck. But I doubt whether they will be allowed to reach their objectives." Nor does he see Mr Salinas

19

as a Mexican Gorbzchev. "I think he is a beneficiary (of the system) and is fully convinced of the corrupt procedures of the PRI. I don't believe he has the slightest intention of reforming the system . . . S2linas has not lost support of the trade union leaders, although he was never backed hy the unions in general (in the election)."

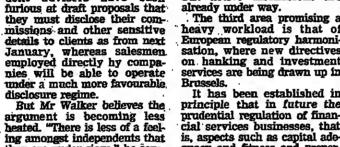

There is a sense, however, that Mr Cardenas has somewhat modified his populism in recent months. The teachers, he says, cannot expect full repayment of their lost income rather than recounce its debt obligations, be now says that Mexico must "reach a bilateral decision that takes into account the creditors." This could entail a temporary mora-torium on debt repayment in order to free resources for domestic purposes but "we would have to be careful not to upset inflation and the interna-tional balance."

Equally, be thinks the dehtor countries of Latio America should get together and not, as in the case of Peru, act unilat-erally. "The Brady plan wants erally. "The Brady plan wants each country to solve its debt problem independently. Mexico's government should try to look for solutions with other countries." (However, in broader political terms, Mr Conderge ourpressed little sum Cardenas expresses little sympathy or knowledge of other populist movements in the

region.) But his real focus has to be elections, for that is where he must continue to score. Two hig state polls on July 2 - in Michocoao, where Cardeoas father and son were governors, and in Baja California - offer the next test, not only for the opposition but also for the PRL President Salinas insists toat individual elections do not matter so much, hut his party will have to decide whether or not to rig the vote, as has been its invariable custom.

It ought not to. Mr Salinas himself describes his presi-dency as "a permanent campaign," and there is much good sense in it. But Mr Cardenas is equally right to be sceptical. Mexico may have problems, hut the absence of choice between the ideas represented by the two men should not be coe of them.

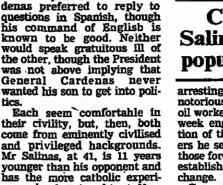

- LETTERS

ing amongst independents that they are under siege," he saya. Pressure could in fact now come more strongly from the other direction, from bodies such as the Office of Fair Trading and the Consumers' Associ-, ation which want a still harder

form of disclosure. "My concern is that we will be vulnerable in some degree to the argument that the infor-mation is so modest and huried in product particulars, which may not arrive until quite a late stage, that we are not going far enough in the direc-tion of hard disclosure." The SIB will be introducing

How to explain West Germany's 'most successful' economy

From Mr Alexander Uberoi.

Sir, Barry Riley has oversim-plified (The Long View, Week-end FT, March 25). He rebuts the arguments for contested hids hy citing Japan and West Germany ("the world's two most successful industrial economies") as the two countries where hostile takeover bids are almost unknown. Regrettably, he does not elabo-rate on his criteria for labelling the Japanese and the German economies as successful.

On what basis does Mr Riley regard the German economy as the top 25. For example, Daimler-Benz would rank number three one of the two most successful in the world? Unemployment figures? Not possible. West German unemployment figures based on its 1987 turnover, but

Sir, Three cheers for your film critic, Nigel Andrews. He

SOME FAXES ARE CHEAP TO BUY **BUT WHAT DO THEY COST TO FEED?**

If you're about to invest in fax, you're probably tempted by some of the 'bargains' on offer in your local discount store. But you may not be aware that choosing your fax on price alone could prove to be false economy in the long run.

- For example, a lot of so-called 'bargain' fax machines can only accommodate a 30 metre paper roll - an expensive way of buying paper when compared with HIFAX'S 100 metre roll capacity.
- And consider your telephone charges. If your fax machine is slow you could be in for a bit of a shock at the end of the guarter! On the other hand Hitachi's HIFAX can transmit an A4 page at twice the speed of some of its cheaper competitors, giving you the benefit of the cost saving.
- Time is money too. Do you really want your secretary to spend hours hand-feeding page after page into your fax? With HIFAX, you can send that lengthy document to your best customer at the touch of a button.

On top of this, the superb quality of HIFAX transmission will do wonders for your image. And HIFAX has all the features you'll need as your business grows and develops.

HIFAX is only sold through approved Hitachi dealers. To find out more, just complete and post the coupon or telephone (0734) 311244.

From Mr Ian Rutledge.

Sir, Peter Martin argues that vertical integration ... is coming apart under the pressures of the late 20th century" (April 24), and we are return-ing to a world economy in which transactions are driven. more hy Adam Smith's "invisi-ble hand" than by the "visible hand" of large, vertically-integrated companies.

But in at least one important sector of the world economy with which we are familiar, the opposite seems to be the case. In energy and mineral resources markets the past 10 years have seen a steady increase in what might be called partial vertical integration." Blg energy producers like Petroleos de Venezuela and Saudi Aramco have sought guaranteed ontlets for their products by partial integration downstream into West European and US-owned refining and processing facilities.

At the same time, Japanese custom smelters like Sumi-

tomo have partially integrated up-stream by huying into cop-per and nickel mining facilities owned by US transnationals, in order to ensure a secure supply of concentrates

Japanese steel companies, and trading corporations like Mitsui, have followed the same policy, taking strategic hold-ings in Canadian coal and Aus-tralian iron ore not only to secure supplies, but also to have a say in long-term contract pricing.

Likewise, important compa-nies in the world's non-ferrous metals industries, like Metall-gesellschaft, Cominco, Asarco, MIM and Teck, have formed interlocking shareholding arrangements, with the clear motive of reducing uncertainty regarding the supply and demand for concentrates.

It seems clear that the technological and institutional innovations which Peter Martin sees as underpinning the resurgence of the "invisible hand" simply cannot be relied

on in this key segment of the world economy, and that a par-tial "internalisation of the mar-'ket" is much preferred, by the higger operators, to any trust in free, "arms-length" trading. Perhaps the most forthright

articulation of this perception is to be found in the latest annual report of a large US energy corporation, Coastal Corp. Explaining an agreement whereby the company has sold a 50 per cent share in its west coast refining plant to the Communist Chinese, the com-pany's chairman states: "For Coastal, the advantages includa a dependable crude

supply ... and reduced exposure to price and supply vola tility in world oil markets." (Coastal Annual Report 1988.) It doesn't sound much like Adam Smith: more like the

A merger would link RHM, one of Britain's largest milling, baking and consumer food groups, with Australasia's larg-est food company. Both also have significant interests in south-east Asia. Goodman owns nearly 30 per cent of RHM, a stake built up before its abortive takeover bid last year. Last week, RHM snapped up 15 per cent of Goodman and announced a A\$3.1bn (\$2.45bn) shares-andcash takeover bid. On Thursday, the companies' advisers began secret discussions on a possible merger. By the weekend, Mr Pat Goodman, chairman of Goodman, **Commission wants \$4bn research plan** had let it be known that he would he prepared to stand aside if his presence was the to bridge the gap on high technology only factor holding up a merger on satisfactory terms. The chairmanship is known By Terry Dodsworth and Hugo Dixon in London to have heen an obstacle to agreement in previous merger discussions between the two THE European Commission . aims to launch a \$4bn research. sides and yesterday Mr Tim Howden, RHM deputy managprogramme to catch up with the Japanese and US semiconing director, moved to exploit ductor industries at a meeting the possibilities. Mr Howden said RHM had of European Community Indus-try ministers next month. "noted Mr Pat Goodman's help-ful statement." He added: "We Plans for the joint research programme, which would be would much prefer agreement to hostility and are clear that an agreed merger is the best Europe's most far-reaching cooperative venture in high tech-nology, have been plagued hy way ahead." Both boards believed in the disagreements for two years. But the Commission is hoppotential of a comhined busi-ness. Mr Howden said, and RHM had "always" felt that personalities should not get in ths way of this goal. "We believe that discussions which are non-in normare in this ing to unite the industry behind a proposal to start rap-idly on an 18-month initial project while details of the sec-ond phase are sorted out. Cadiou, director of information technology at the Commission, are now in progress in this context should continue on a EC industry ministers have reached hroad agreement on the programme. "We are now encouraging industry to final-ise detailed plans," he said. Known as Jessi, for Joint confidential basis without comment until concluded.

ately low key. "Leningrad is decorated in a more modest way than during previous May Day celebra-tions," Tass, the official news agency, reported. "Perestrolka put an end to empty declara-tions, ostentation, loud rheto-ric and a passion for praising ric and a passion for praising themselves. In Moscow itself, the parade was in part a celebration of the

elections which have left the Communist Party licking its wounds, with a string of regional party chiefs defeated by outsiders. Mr Gorbachev and Mr Nikolai Ryzhkov, his affahle and increasingly prominent Prime Minister, occupied the two places of bonour. They were flanked on the left by Mr Yegor Ligachev, the supposed conser-

Perhaps international fund

Perhaps international fund managers looked at the peace-ful students and were reminded of Berkeley in 1968. Evidently they expect the Gov-ernment to pacify everybody until the whole thing goes away - a somewhat hasty judgment given that the Chi-nese leaders themselves seem not to know what in do about tha 55 per cent of its shares in the Minorco camp somehow not to know what to do about

A second explanation is that admit defeat, fearing otherwise that dangerous precedents are all the risks are already in the all the risks are already in the market: every investor in Hong Kong should know the poten-tial dangers well enough. How-ever, the swings in the market in the past 10 years rather sug-gest the opposite; that prices have tended to over-react to each new rollitical scare Alter. being set. . Gold Fields argues that as the injunction dropped, the rel-evant majority is of the remaining 70 per cent. That seems no better than saying each new political scare. Alter-natively, investors may simply be disinclined to sell a market he dismiclined to sell a market that looks cheap in terms both of earnings and assets. Even though it has risen by nearly 25 per cent in the past year, prices are still 30 per cent lower than before the crash. The big blue chips are on earn-ing multiples of under 10 that those who do not agree with the management should not be counted. The second argument is that the responsibility of the directors is to the company, which includes more than its present shareholders. ings multiples of under 10, despite earnings growth of 20 per cent or more. Most of the rise has been in property shares, which have risen by 40 per cent a somewhat gradaine That may or may not be the case, but is scarcely conclusive-in establishing the point. In the meantime, the whole charade must be of great com-fort to any company faced with a takeover or scared of receivper cent, a somewhat grudging recognition of rises of 80 per recognition of rises of 80 per cent or so in property prices. It would seem that foreign-ers remain understandably cautious about a market that fell by half during the crash and which has been one of the world's most flourishing stock ing one. All they need do is find a nice judge in the US prepared to object to the bid, and then maintain that what is a majority is actually nothing of the kind. exchanges for sharp practices of all kinds. The new Securities and Futures Commission aims to put a stop to all that. But as

Philips It is no doubt comforting to know that Philips sees no need it only started its job yesterto revise this year's profits day, making a judgment about its efficacy is almost as dangerforecast because of anything included in first quarter results

to be far lower. And as for the bottom line, that will depend yet again this year on which bit of the Philips corporate body can most conveniently be lopped off and sold. Last year, there was FIS25m from the washers and fridges sold to Whirlpool; without them, net profits would have fallen. This year is unlikely to prove any different. And profit margins,

different. And profit margins, at a scarcely visible 1.7 per cent in the first quarter, also bear a dreary resemblance to last year's figures.

That may not sound like the kind of management record that merits a more than average level of takeover protec-tion. But that did not stop the Philips management - backed by a handsome majority of shareholders - putting up higher barriers in March Philips' shares have underper-formed the Dutch market by 60 per cent since their 1983 peak, and are now worth perhaps a third of break-up value. That is scarcely relevant, of course, so long as the break-up in ques-tion is impossible; but share-holders have only themselves

The parochial approach is still alive and well in the US investment community; but at least US investors have stopped ditching foreign securities in large numbers and have become net purchasers at a level equal to their involvement in overseas markets in the year before the crash. Figures from the Securities Indus-try Association in New York. try Association in New York show that US investors were net purchasers of \$1.7bn in for-eign equilies last year, which certainly beats net sales of \$1.1bn the year before, and is about equal to US investment in foreign equilies before the 1967 events which sent inves-tors back to the bunker

tors back to the bunker. Of net purchases in 1988, about a third were made in Japan and two thirds in Europe – more or less the reverse of the weighting of those regions, and no doubt a matter of deep regret to those doing the buying. For after making net sales of \$6.5bn in Japanese equities in 1987, US investors scarcely deserve much credit for having only ough foresight to out a tenth

Why Mr Bush cannot be presidential

By Anthony Harris in London

ONSIDER the following Even fairly expert Europeans facts and probabilities, tend to much higher scores. and score them on a scale

This was apparent last week when I took part in a London conference, at which an expert panel tried to explain American of one ("Ho-hum") to five ("Good • The Bush Administration has realities to a European audience. Our hosts at the Royal Institute of International Affairs are cerno long-term strategies or priorities at this stage; it makes up policy as it goes along. tainly expert; but in spite of warnings, their agenda was put largely in terms of Administra-• Even if it had policies, it would have great problems put-ting them into effect: less than inrgely in terms of Administra-tion policies and priorities. They were presumably surprised when they were unable to get anyone inside the Administration to half the political appointees of the new Administration have yet taken up office. • The President and the Congress will warmly agree on a budspeak for it, though American get which will produce a proj-ected deficit of less than \$100bn conference organisers have the same problem, and still more when it proved that there were (£58.8bn), the Gramm-Rudman no policies to discuss. kmit. The probable result will be an actual deficit of more than

A change of Administration, even a succession within the same party, is itself a massive administrative problem in the US. A European Prime Minister announces perhaps 100-odd ministerial appointments; the new people move into their offices, and husiness begins. In the US there are more than 3,000 jobs to fill.

These appointments extend to a much lower level than the cabinets which some European - but no British – ministers bring with them. (In Britain we even pronounce the word "cabinet" in this context in French). The British extreme, where permanent

civil servants ansure continuity, is only mildly caricatured in the television programme Yes, Minis-ter. The American way, in which the policy-makers have to wait months for legal confirmation in office, and may still need time to learn their jobs when they are confirmed, seems beyond caricature.

However, Washington does have its permanent experts and guardians of continuity: they are not in government, but in the powerful lobbies and policy insti-tutes which account for quite a slice of Washington's working permission They supplied half population. They supplied half the American speakers. Dr Rich-ard Rahn is chief economist of the American Chamber of Commerce, but be is better placed to speak for the Administration than for US industry. Like all similar officials, he has troubles with his industrial members for example, he is a convinced free trader, but many of them are not. However, he is a real insider to the Bush Administration, one of its most effective spokesmen during the campaign, a supply-sider and joint architect of the

flexible freeze, and now a senior adviser who joins in the Camp David policy debates. There are fierce arguments

between friends there, just as in the Chamber. Dr Rahn's most striking point was in defence of

Mr Bush's much-criticised reactive approach to prohlems, his lack of strategy. What else, Dr Rahn asked, could you expect in the seventh year of an economic expansion? The strategy is to have no strategy, but simply to stonewall on taxes, and to be alert to indentify and head off any threats to continued success. Dr Rahn clearly sees current interest rates as the biggest threat - an over-reaction to the surprisingly mild inflation which

inevitably followed the monetary expansion of 1986. This is certainly not a consensus view, and Dr Rahn conceded that the Fed governors who vote for high rates are ideologically sound men. He did. however, help to explain the President's public criticisms of Fed policy, which have worried some other speak-ers at the conference and many outside it.

Of course, the Fed is not the only important policy-maker over whom the President has no control. Reactiveness and continuity are also the two best words to describe current US trade policy, so the audience probably hardly noticed that Mr Geza Feketekuty, who described it, is not a policymaker, but simply a veteran executant. (Most Washingtonians give up on his surname, and simply call him Geza). He had one soothing point to make: the aggressive US approach to hliateral issues is designed to lance festering sore spots, so that they do not distract everyme from the multilateral Uruguay approach. He also offered one central clarification: the US will haggle bilaterally, but multilaterally it is concerned not with bargains, hut with enforceable rule Two of his points, however

were plain worrying. It may be consistent, as he argued, to haggle bilaterally and legislate for the world: but it is not consistent to argue that a practice is at the same time inefficient, and an attempt to steal an unfair advan-

tage. This seems to be the US atti-tude to industrial policy, and to some other foreign customs and practices, and promises much ill temper. Geza also offered some disturbing glimpses of the Ameri-can Yellow Peril attitude to Japan; and it was not reassuring to bear Mr Hisashi Owada, Japan's urbane ambassador to the Organisation for Economic Co-operation and Development, going on like any other Japanese about the US fiscal deficit. He seemed blind to the political difficulties of tackling the deficit, and to the current British demonstration of how little a surplus may achieve. The Pacific still seems wider than the Atlantic.

Those difficulties were set out hy the undoubted star of the day, Dr Rudolf Penner. He has been in and out of government five times (and had his degree solemnly checked by the FBI each time, which belps to explain the current delays). He is by now possi-bly the greatest living expert on the US budget process; hut be is also such a wit that some of his listeners may not have realised that his central pnints were deadly serious.

As he explained, the US system of checks and balances generates fudge: and the Gramm-Rudman law, designed to circumvent the budget fudge by defining the bottom line, has made matters even worse. It will need fixing again, and sbould probably he repealed. An opposition Congress com-pletes the chaos. A US President cannot at the best of times he presidential in the European sense; but when even the experts no longer know what is going on. nobody is in control.

Experienced hand takes up international banking reins Huib Muller, Peter Cooke's successor as head of the banks' supervisory committee, talks to David Lascelles

HE COOKE Committee, renowned to banking cir-cles for its international supervisory work, has undergone a change of name. It is now the

or a frequent visitor to the US.

If you scored 10 or less on this

Muller Committee. Mr Peter Cooke, the Bank of England official who chaired the Basle-based committee for many years, has retired and been replaced by Mr Huib Muller, an executive director of De Neder-landsche Bank, the Dutch central bank.

The 52-year-old Mr Muller (whose first name is pronounced Herb) is no newcomer to supervisory work. He is head of banking supervision in the Netherlands and has played a prominent role on the Cooke Committee for several years. He is also a member of the EC's banking advisory com-mittee, which is helping to for-

the new international capital regulations for banks which are being phased in over tha next three years. None the less, the job of overseeing the implementation of the new regulatory regime and carrying the work forward falls to him.

"We are confident all major countries will implement the agreement," he says. Apart from the Group of Ten which sub-scribed to it at the outset, Mr Muller has received commitments from the EC countries. which are not members of that group, from Hong Kong, Singa-pore, the Gulf States, Australia, New Zealand and Australia.

The more who subscribe the better, as far as he is concerned, because this will stop what he calls "competition in laxity" among financial centres.

subverting the quality of bank capital. We must be careful not to be seduced by this. There is a clear-cut definition of core capi-tal: it is share capital plus retained earnings."

The Muller Committee now has an established schedule of three or four meetings a year in Basle. The agenda always includes a review of new techniques which banks have designed to raise capital and for which they want official hlessing.

"Judgments have to be made on new supplementary capital instruments," says Mr Muller,

The committee also has longer-term projects on its agenda. One is to see whether it should lay down rules for market risk to supplement the original agree-

the EC evolve in step with his committee's work to keep overall supervision as simple as possible. Asked what he considers to be

the main dangers facing banks at the moment, be says he prefers the word "challenges".

"Banks are a traditional symhol and vehicle of safety. But now some banks have, in the eyes of the market, become less creditwortby than their customers. The Basle agreement aims to correct this, and get back on solid ground."

The Third World debt problem has become much more manage-able than before. "It has lost its sharp edges." But he welcomes the recent proposals hy Mr Nicholas Brady, the US Treasury Secretary, as well as the banks' n to boost own act loan

ever, he points out that the Basle Committee conducts an annual review of provision levels where it becomes clear which countries are "out of line", and this puts pressure on their officials to narrow the gap.

Whether there is a wider role for the committee to play in seek-ing solutions to the Third World deht problem is a moot point. Many of the new proposals for dealing with it involve deht reduction, which in turn raises technical questions of accounting, tax and supervision. The

committee was not formally con-sulted on the Brady Plan, but there are informal contacts. Mr Muller also sounds fairly

relaxed about the sharp growth in leveraged buy-out finance hy hanks. LEOs are mainly an American pbenomenon, he says, and he believes the US authori ties are on top of developments at the moment. The other danger, that an imminent recession could push up loan losses, is also one which Mr Muller helieves hanks can cope with. "There is more of a perception now of the exposure of banks to economic cycles. That is wby our first priority is to rein-force the cushion."

market in 1992. A genial, well-groomed man whose outside interests tochade

helping to run a trust for preserving historic buildings and the Concertgebouw (Amsterdam's national concert hall), he is keen to pay deference to his predeces-

sor. "We are harvesting Peter's good work," he says, referring to

One of the immediate tasks is to ensure that the agreement is not undermined hy inventive minds in the financial commu-nity who can hlur the clear-cut definitions of capital which it tries to establish.

"We will monitor the agree-ment and ensure that we protect the integrity of the system," he says. "There is a lot of ingenuity by financial experts which risks

loss provisions. He is not enthusiastic, though, about the sugges-tion that his committee could lay down some international guidelines on provisions to narrow the discrepancies between banks in different countries.

"Countries bave different approaches," he says. "It is not helpful to have internationally agreed identical numbers." How-

HARBOUR EXCHANGE

Economics Notebook Better view from another angle

THE GOOD news, if Dun & Bradstreet of the US is to be believed, is that we will be able. to celebrate seven fat years of worldwide economic growth some time this autumn. The US business information

company has just published its first international survey of business expectations. This suggests that huoyant economic conditions will be main-tained in the leading industrial countries for the next six months at least. In spite of the global rise in

interest rates, Dun & Brad-street has found that busi-nesses worldwide have stayed remarkably optimistic about sales and profits over the past 15 months. There have been regional variations: notably a hig jump in optimism in West Germany since the first quar-ter of 1988 and a slump in Australian husiness confidence. since the middle of last year.

Interestingly, Dun & Bradstreet's survey, which was car-ried out in 10 countries in the first half of March, found that British companies were slightly more optimistic about sales during the current quar-ter to the end of June after expressing declining levels of optimism for three straight quarters.

This contrasts with last week's rather sombre conchasions about a slowdown in the UK economy drawn by the Confederation of British Indus-try from its latest survey of British industrial companies.

Expectations of higher sales in the US have returned to the high levels recorded in the sec-ond quarter of last year after being depressed last autimon hy the strength of the dollar, which dampened export hopes.

يعقد

Z. M. 3

Dun & Bradstreet's international survey has yet to establish a track record. But it is based on the quarterly surveys. some interesting contrasts with the most recent CBI poll of US business expectations of 1,300 industrial companies that the company has conthat was carried out in late ducted since 1947.

Mr Joseph Duncan, the com-pany's chief economist, says the US survey gives a good guide to economic trends in the six months after it has March and early April. The Dun & Bradstreet respondents been taken. Mr Duncan claims that it proved its worth after the global stock market crash

of October 1987. He found then that businessmen were unexpectedly optimistic about future trends and used the fact to forecast strong US growth last year when many economists were predicting reces-

sion. Unlike the CBI survey, which asks businessmen to fill in a detailed questionnaire, the Dun & Bradstreet poll restricts itself to five questions which are usually put to a company general manager or chief finan-cial officer after gathering information for Dun & Bradstreet's other surveys. The executive is asked whether he or she expects higher or lower sales, profits, inventories,

employment and prices over the following quarter. The international survey polls about 9,900 companies in 10 countries, including 3,000 in the US, 2,000 in Canada, 1,000 in Britain and about 900 in West Germany, Besides Britain and West Germany, it covers

five Enropean countries: France, Belgium, the Nether-lands, Austria and Switzerland. The samples include service as well as industrial companies and try to reflect the business structure of each country. As with the CBI survey, the results are expressed as hal-ances, after subtracting the percentage of respondents expecting decreases from those expecting increases.

UK Comparison In the case of Britain, Dun & Bradstreet's survey throws up

appear to have more clear-cut views, with very few saying that they expect conditions will stay unchanged. For example, a high balance of 66 per cent of respondents gave a positive answer to the US company's key question about future sales trends,

speculation about an early cut which reflects tha level of in interest rates is likely to be revived inflowing orders. In the CBI industrial trends The consensus of analysts' forecasts, compiled by MMS international, the financial research company, is for nonsurvey, the balances in answer to questions are generally much lower, at present ranging between minus 13 and plus 33 farm payrolls to have risen by 220,000, compared with a rela-

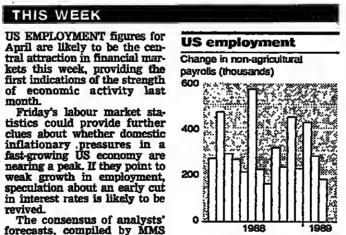

per cent. Although not strictly compa-The unemployment rate is expected to have edged up to rable, tha CBI asks two questions that are roughly equiva-lent to the Dun & Bradstreet query about sales. One, asking how orders had developed over the past four months, elicited a 5.1 per cent in April from 5.0 per cent in the previous month. positive balance of 7 per cent, Another about the expected trend of domestic and export West Germany's trade surplus could be intensified by figures for March which are expected sometime this week. Little evideliveries in volume terms over the next four months dence of an easing is expected highlighting the scale of world trade imbalances. yielded positive balances of 14 and 9 per cent respectively. The main reason for the low figures for industrial produc-tion and orders in March

balances is that a majority of respondents tell the CBI they expect things to stay mchanged.

The large number of "unchangeds" in the CBI sur-vey presents difficulties in interpeting the data. CBI econalthough analysts will be looking for signs of a slowdown. Unemployment figures for April could show the total falling below 2m. omists said last week's survey, with 19 per cent of respondents saying they were more optimis-tic about the general husiness situation and 24 per cent say-ing they were less so, was "clear evidence" that the British economy was slowing announced today. down

Another way of looking at the figures would have been to tistics. Likely to attract most attention are figures for official reserves of gold and foreign say that 76 per cent of British industry expected at least no deterioration in conditions over the next four months. currencies in April, published tomorrow.

In March, the reserves showed the largest fall for more than 10 years, illustrating Peter Norman

INTERNATIONAL CAPITAL MARKETS

EUROCREDITS A warning shot across the bows

THE \$15n medium-term note programme launched last week by the Council of Europe not only hears witness to the global nature of the capital markets these days but also sends a shot across the bows of the Eurobond market.

The programme for the Council of Europe. a regular borrower in the Eurobond market, has been structured for maximum flexioility to match investor requirements. The 19government hody is rated AA+ hy Standard and Poor's. Issuance can, for example, be

at fixed or floating rates, at a discount or at par, senior or subordinated. Paper can be issued in maturities between one and 30 years in virtually any hard currency in which it is allowed. (The Ministry of Finance in Japan has to give the go-abead for issuance in yen and a public offering within the US is not a pros pect). Notes can be listed on the Luxembourg exchange.

The idea is for investors to be able to pick any combination off the shelf provided they meet the borrowers' requirements. The programme was arranged by Daiwa Europe and Morgan Stanley, and Swiss Bank and Bankers Trust will also be dealers. First issuance should be in a couple of weeks. The medium-term note market has been a long time in developing, but to the extent that this programme is a success, the implication is clearly that the council will borrow less in the Eurobond market.

In the international loans market, the Central Bank of Turkey is back after a six-week hiatus, with a \$200m three-year

extendable term loan arranged by Sumitomo Bank. Like the previous loan, the new facility may be extended at the lend-ers' option to seven years. It is a refinancing of a year-old bond market \$145m facility, combined with two smaller loans.

The new loan carries a margin of 1 percentage point over London interbank offered rates (Lihor) and offers front-end fees of up to 1 per cent for a \$10m participation. The margin rises to 11% for lenders extending to five years and to 1% for those extending to seven years.

This gives lenders an all in annual return of 1.33 per cent over Libor for the first three years. The previous loan, arranged in early March by First Chicago and raised from \$150m to \$200m, offered annual returns of 1.43 per cent.

Sumitomo is also arranger of an Ecu50m five-year term loan for Agrifactoring, an Italian agricultural factoring organisation 50 per cent owned hy Banca Nazionale del Lavoro The loan carries a margin of 30 basis points and participation fees of 10 basis points for lenders providing Ecu5m.

S G Warburg has arranged a £350m revolving acceptance facility for BAT Industries of the UK. Some 70 banks have joined the facility. James Hardle Finance has

mandated National Westminster Bank to arrange a \$200m three-year note issuance facility, of which \$100m will he underwritten. The loan is guaranteed by parent company James Hardie Industries, an Australian-based building

industry supplies group. The margin is ½ over Libor CANADIAN DOLLARS with a utilisation fee of 5 basis World Sank points if more than half the facility is drawn. There is a Westpac Banking D-MARKS commitment fee of 7% basis points for a \$10m participation. two-year, \$100m deal with a 10 per cent coupon and an issue price of 101%. Underwriting IN THE Middle Ages, legal writs began with the Latin phrase proceipe quod reddat, which roughly translates into fees are 1% per cent, with a praccipuum of \$0.10. It is assumed underwriting fees will "enjoin him that he render." It is hard to imagine a more fit-ting derivation for the *practip-uum*, an obscure elemant of be paid in full as recommended by the International Primary Markets Association (Ipma). underwriting fees on the Euro-

The simplest case is when the lead manager keeps a \$50m allocation, syndicating the remaining half of the deal Few managers will be aware of its ancient origins, but closer attention is being turned to the issue of the proceipnum, a proportion of the manageamong a series of co-managera. A co-manager accapting an invitation would buy the bonds ment and underwriting fees exacted by the lead manageat less full fees of 1% per cent ment group as compensation for supporting and distributing newly-issued bonds. plus the *proceipium* charge, or 100.10 per cent. The bonds would have to trade inside fees before co-managers would make any money on the deal. The simplest way to explain the praecipuum is to use a hypothetical example. A typi-cal 10-year Eurobond with 2 By contrast, the lead man-ager owns the honds at par, per cent underwriting commis hut can deduct the \$50,000 sions has traditionally carried praccipuum, making a uet price on its allocation of 99.90, a ¼ per cent praecipuum. Recently, however, there has been downward pressure on the level of the practipuum, 0.15 per cent cheaper than the co-managers. If it were forced to buy back all the bonds, it particularly at the shorter end of the maturity range. would still own all the paper at 99.95 per cent, ao it would

bonds sold at less full fees. Clearly, this gives the lead manager considerable room to manoenvre, particularly if market conditions cause the price to drop below the level at which co-managers break even. In addition, a price differential of 0.15 per cent can have a profound effect on the yield of the bonds. In the example above, the lead manager would

A REAL PROPERTY OF A REAL PROPER

have a yield advantage of around 8 basis points, which might be the difference between sales and disaster. Reality is rather different. For example, the lead managers and co-lead managers normally underwrite between 65 and 80 per cent of a deal, reducing the proportion of the issue which can benefit from the effective subsidy of the praecipuum. In addition, sole lead manage-ment positions are rare. Before the Ipma meetings,

which resulted in the recom-mendations on stabilisation and underwriting procedures, several houses took atens to sweeten individual deals hy to make money on any reducing the praccipuum.

Swiss Volksban

On March 9, for example, Union Bank of Switzerland publicly announced that its was charging only a 1 per cent pruccipuum on its Alliance & Leicester Building Society 5100m 11% per cent seven-year deal, half the normal charge. The bank has been promi-

nant among houses reducing the practipuum, arguing that syndication strategies designed to introduce a new sense of realism imply a structure in which everybody owns the bonds at roughly tha same price. Most of UBS's recent deals have had token practipuum charges of 0.025 per cent. It is easy to see how a large practipuum on a tightly priced deal arouses the same criticism that deductions from fees for stabilisation aroused before the Inma guidelines were changed. Lead managers stand charged with abosing the practipuum to launch a deal which would

secause of the praecipuum if but advocate a flexible attitude I've made some money too. But I do have a problem with the to specific charges. For them the question is one of risk.

praccipuum on occasions where I'm losing money at the The lead management group consists of a small number of where I'm losing money at the expanse of the lead manager." At its simplest, the issue of the praceipann can be reduced to the inherent. advantage gained by the lead manager simply hy virtue of its position. A house which knows it is about to launch a deal can approach clients first, hedge its position in the wider market and limit its exposure. consists of a small minister the majority of a given deal and shares the *practipuum*, while the co-management group exists mainly to promote the liquidity of the bonds. Lead managers are prepared to, or expect to, buy paper back

to, or expect to, buy paper back from the co-managers as part of the placement process. They argue that the extra risk implied by their larger expo-sure to the market should allow them a higher reward. In cases where the so-called bookrunner, the house which has bought the whole issue from the borrowar and is and limit its exposure. Whether it should be allowed to exact an additional reward to exart an annutation toward front its rival houses, via the proscipuum is the question. Given that the lead manager already has an allowance for the physical expenses involved in launching an issue, manyfrom the borrowar and is responsible for syndicating the bonds, acts in exemplary fash-ion, supporting tha deal and ensuring its orderly placement, houses feel that any pruccip-num charged should be nomi-nal and should not severely

disadvantage the co-managers. They do not mind the princi-ple of joining and rendering. It few would dispute its claim to deserve an additional fee. As one syndicate manager is, however, a matter of degree.

Prices improved all along the yield curve, heartened both by the improving outlook for the. US bond market and by the growing belief that the threat of an imminent rise in UK interest rates had subsided. The greatest improvement was seen at the short end.

The authorities made plain they did not want to see rates rise 10 days ago when the Bank of England refused to deal in the Treasury Bill market. Having "toughed" that out; the

authorities are quietly confident that they can survive with 13 per cent base rates for some time.

The view from the Bank is that base rates do not need to age another rise in interest rise. In this it appears to be at rates worldwide. one with the Treasury. It has become more purificant that it is seeing the consumer, and by extention the economy, respond to 13 per cent base rates. Here it looks at the housing market and the behaviour of retail sales."

Wednesday's trade figures and makes two points: firstly, that For a start, the Curlously for the Bank, it is that the venture will prove as makes two points: firstly, that the uptick in settlements is just that, an uptick not a dramatic rise; and secondly, that settlements are a lagging indicator and they were expected

to rise. The market would, however, The market would, however, be wrong in expect anything approaching an early cut in rates. Despite the good behav-iour of M0, which the Bank regards asjust another indica-tor and nothing, particularly special, even though it has a target the view from the Bank

target, the view from the Bank is that 13 per cent is here to stay for some time yet. It also seems confident that sterling can weather unsettled conditions internationally. The Bundeshank's rise in its discount rate was of local German significance and did not pres-

US and Japan to discuss financial market issues

* * * .* .. · ``. THIS FRIDAY'S reverse anction for £500m of medium-dated gilts has the potential to prove. much more interesting than

series of follow-up talks result-

gulation. Government officials

said there, were no special or

urgent ifems on the agenda.

Ministry of Finance and the US, Treasury Department plan a meeting this month to discuss

successful this time around as For a start, the risk/reward

calculations are much more finely balanced than before when the stocks in question only had a limited life. The three auction stocks -1998. 14 per cent Treasury

Stock 1998/2000, and 12 per cent Exchequer Stock 1999/2002 performed better than the mar-ket the day the auction announcement was made and have performed marginally better than the market ever since. This relative strength is

indicative of greater bnying interest relative to other stocks in the medium area by some alers who must be building positions either to unload at the auction themselves or to accommodate clients' needs.

The question that arises is, what happens if one is not successful in unloading all, or part of, one's holding? A holder or any of the above

stocks will not be able to sell them back to the Bank which much more interesting than the Bank's first effort in Jann-ary. It is by no means certain stocks until after June 2. As

• On Friday, the insurance council, an MoF advisory body, will start to discuss revisions

of the Insurance Business Act

which governs the insurance

industry in Japan. Insurance officials said the

there is nothing inharently worthy about the three stocks in question, it is a fair supposition that they will cease to outperform the market once the auction is over.

As a speculator bidding in the auction, therefore, the cal-culation has to involve an assumption about the the level of price deterioration after the auction relative to tha purchase price and the performance of the sector as a whole. The 99/02'a have fallen 32 basis points in yield since the day before the announcement and last Friday's close.

One sidelight on the auction is that it is framed in terms of gilts with a nominal value of £500m. As the three auction stocks sell at a hefty premium the Bank will, in fact, be paying out much more than \$500m. If it were to satisfy its demand hy huying only the Treasury 96s then it would pay out 2650m - about the current market value - for £500m of stock nominal. Assuming a fairly even distribution it is likely the Bank will pay out around £600m to get its £500m nominal stock

Simon Holberton

THE MOST surprising, and therefore the most important, development of the past few weeks for the US bond market has not been the modest strengthening of the economy signalled in yesterday's pur-

National Association of Purchasing Managers (NAPM) that dominated the bond market's thinking in the past few days. However, behind the market's daily gyrations on ephemeral and probably meaninglass hlips in economic information, a more significant story appears to be unfolding of shifts in international economic policy and changes in

US MONEY AND CREDIT

If anything justifies the underlying confidence which is so apparent in both the US bond market and the dollar, it is not one figure or another on employment or industrial production. Rather, it is the growing evidence that the monetary authorities in what used to be called the hard currencies countries, most importantly the German Bundesbank, had failed or rather given up, in their attempts to create a more stable international store of

value and reserva currency than the US dollar. This is the message of the

weakness of the D-Mark, which is lower than it was before the Bundeshank raised German interest rates two weeks ago. Tha implication of the Germans' inability to strengthen their currency is as important for investors in America as in For it suggests that the

international convergence of economic policy, which seems to be the main objective of the Group of Seven and the European Monetary System, will take place on terms dictated not hy the Bundeshank but by the Federal Reserve Board, the White House and the US Congress

With the Bank of Japan likely to play a quite indepen-dent role, directed as ever towards the long-term expansion of Japanese economic power, while the monetary authorities in France, Spain and even Italy, seize the policy initiative from the Germans within Europe, the new halance of power among the cen-tral banks is likely to produce higher world inflation. For the financial markets in the US and other inflation-prone countries, however, this may well be good news.

A world where the Germans, Swiss and Dntch converge towards the relatively high inflation policies of the Ameri-

cans, British and Italians may be quite comfortable for US bond investors, at least in the short to medium term. Certainly it will be more comfort-able than a world where the Fed either lets the dollar collapse or has to tighten policy continuously until US inflation

falls to the near-zero level that was considered, until recently, a realistic ultimate objective for the Bundesbank. That zero inflation is no longer a serious objective of the Bundesbank is demonstrated

not only by the actual accelera-tion of German price increases. Much more important evidence, especially from the US and international standpoint, comes from two recent policy announcements. First there was the half-hearted way the Bundesbank took its decision to raise German interest rates. Considering the atories of

dissension within the central bank, which indicated that Mr Karl Otto Pöhl, its President had resisted the increase, it was not surprising the D-Mark began to fall shortly after the **Bundesbank's decision**, Even more importantly, Germany's apparent willingness to contemplate a European monetary union, as outlined in the Delors report, without insisting first on a big realignment of exchange rates, suggested that European diplomacy had now acquired higher priority than the reduction of inflation among Germany's policy elite.

But why are these two developments so significant for the US bond market? The essential answer is simple. A regime of fixed exchange rates can only be maintained in the medium term if the growth of unit costs in all countries converges around some common level. Until recently it seemed US inflation of 5 to 6 per cent. comhined with the country's huge trade deficits, would doom the dollar to big devaluations. These devaluations, even if they did not accelerate inflation, would make investment returns for dollar bond holders less attractive than for investors in "hard currency" bonds.

If, instead inflation in the "hard currencles" accelerates towards the US level, then the long-term need for dollar devaluation becomes less pro-nounced. Domestic dollar bond investors do not need to worry about the disruptive impact of

dollar devaluations, while

high interest rate currencies than in the hard currencies which turn out not to be so hard at all. This is precisely what has been happening in the past lew years. Until recently, however, the

international investors can

expect to do much better in

23

sceptics have predicted that Germany would act sooner or later to stop its vicious circle of currency devaluation and rising inflation. If the Bundesbank acted suddenly and decisively, the cumulative gains from high-yielding investment in dollars pounds or french francs would be more than wiped out through a massive revaluation of the D-Mark. Today, that kind of decisive action seems much less certain than it did a few months ago.

* * *

THE NAPM report came as something of a sbock for the bond market yesterday. After last week's strong rumours that the NAPM diffusion index would show a decisive fall below the 50 per cent level con-sidered to be the dividing line between economic expansion and slowdown, the actual figure of 53 per cent came as a heavy blow to the bullish majority of market operators.

The NAPM has consistently and reliably foreshadowed each month's official economic indicators. Yesterday's report suggested that most measures of economic activity, including production, orders, exports and inflation, though not perhaps employment, would abow a significant rebound in April.

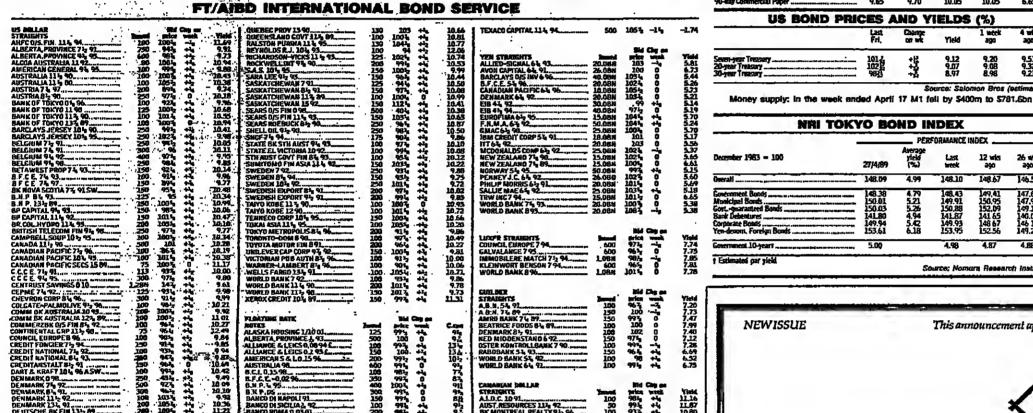

The main index rose from the 50.4 per cent reported in March to 53.0 per cent, somewhat above the average level of 52.2 per cent for the first three months.

The high April figure contrasted with the expectations of 49 per cent or less which had fuelled last week's bond rally and suggested the slowdown observed from the heginning to the end of the first quarter may have run its course.

The more specific indices also rose sharply. Production was up from 50.7 to 55.5 per cent and new orders rose from 50.7 to 55.3 per cent.

Bad debt provisions cost Israeli banks \$1bn HBG raises

By Hugh Carnegy in Jerusalem

24 **Φ**

A PROFIT-SAPPING round of provisions undertaken by Israeli banks mainly to soak up e flow of bad debts from the country's faltering kibbutzim movement rose above S1bn at the weekend as United Mizrahi Bank reported a net loss for 1988 of Shl 18.5m (\$10.25m).

The reversal at Mizrahi, Israel's fourth higgest financial group in terms of assets, was due to a record Shl 155m bad debt provision which overturned e Shl 18m profit shown in 1987. It brought the total set aside by the top five banks to Shi 1.94bn, equivalent to

Shi 1.940h, equivalent to \$1.07bn, almost double the level of last year. The emergence last year of the extent of the collective debt of the kibbutzim co-operatives - more than Shl 7bn was the biggest single reason for the banks' ehrupt reversal

from the buoyant profits in 1987. Apert from third-ranked Israel Discount Bank and fifth-ranked First Internetional Bank of Israel, which managed to stay in profit, it was e tale of iosses, topped by the biggest group. Bank Hapoalim. It reported a net loss of Shi 53m, compared with a Shi 184m

profit in 1987, after provisions of Shi 885m. The question now is whether the banks can get back on the rails this year. The banks themselves say

they are confident thet the worst of the kihbutzim crisis is behind them. Although they would have liked to have seen the Government do more to vears. the Government do more to help, they are mostly grudg-ingly satisfied with a state peckege of Shl 850m in short-term help and Shl 3bn to

back e 25-year loan restructur-ing plan which all but Mizrahi have accepted. the Histadrut labour federa-tion, which has debts of \$1.25bn, more than two-thirds to the Israeli banks. A rescue

have accepted. Bank executives point ont that the latest provisions were financed largely out of operat-ing income, which held up well, not capital. "We have more or less identified the hig (debt) problems now. There shouldn't be problems of this size again," said Mr David Friedman, chief executive of Bank Leumi le-Israel package, also backed by the Government, has virtually been tied up et Koor, but another senior banker said a question mark still hung over description main series in this over its ability to return to profit-ability, "We need to monitor developments there very care-fully," he said. Bank Leumi le-Israel

Bank Hapoalim, also owned by the Histadrut, is the most heavily exposed to Koor. With However, the level of non-kibbutzim provisions – about half of the total – does seem to be a cause for some continits commitment to other labour-owned concerns such as ued concern, especially when seen as part of a trend of rising Histadrut's somewhat sickly health insurance scheme, it perhaps more than the others needs an upturn in a recently provisions in the last three Prominent among the nonstagnant economy to help perkihhutz provisions set aside this year was Koor Industries, the hig conglomerate owned hy

formance in 1989. Flat domestic demand, depressed in part by the effect

of the Palestinian norising and poor export performance due to an overvalued shekel, were negative features in 1988. Devaluation in January and flattening inflation and inter-est rates should help this year, but an upturn at home has yet

but an upturn at home has yet to materialise. As much as anybody, the Government will be hoping for e return to an even keel hy the banks. It wants to resolve the anomaly whereby it owns the vast majority of bank stock, ecquired after a stock exchange crash in 1983, hut control remains with minority sharebolders shareholders. It is leaning towards some

method of privatisation. But, having paid a dollar linked price for its holdings well above present market values, the last thing it needs is a

stake in rival to above 50% By Our Financial Staff

Jardine Airport Services handles 10 airlines at Hong Kong's Kai Tak airport. The new venture hopes to play a role in developing a new air-port at Macao, the Portuguese a 12 per cent increase in turn-over to NKr695m with progress enclave.

MAJOR European competitors are thought to have taken important stakes in Spain's two largest construction com-panies, Dragados y Construc-ciones and Agroman. Recently there has been

heavy speculative stock mar-ket activity in Dragados shares, while on Friday Banco Espanol de Credito (Banesto) disclosed that it had sold a 20

Turnover rose 10 per cent to

The explosives division saw

NKr1.36bn.

Banco Central, which indi-rectly controls nearly 30 per Banesto still controls 51 per cent of the company, which is quoted in Bilbao. in Paris on Friday Bouygues cent of Dragados, said that 20 per cent of the construction denied eny involvement in group's shares had changed either company. But fears that foreign interests have bid up hands in the past few weeks. Dragados shares have risen Dragados shares persist and helped calm a hitter Dragados shareholders' meeting in Madnearly 50 per cent overall this year. The bank denied reports, however, that it had been rid on Thursday. Shareholders approached by the hig French tried in vain to shout down a

board proposal to issue Pta15bn (\$130.4m) worth of con-vertible bonds and to make a construction group, Bouygues with a view to joining Central on the Dragados board. vertible bonds and to make a Pta8.5bn capital increase. Dra-gados made a Pta3.5bn pre-tax profit last year, nearly double its earnings in 1984. A disputed claim by the board that it con-trols most of the equity has also left shareholders worrying about a takeover. At the same time, Banesto confirmed it had recently sold 20 per cent of Agroman and that foreigners were among the

buyers. Suggestions that Bouy-gues was among the buyers were not being denied by the bank but officials claimed not to he ahle to confirm it. about e takeover. The sale by Banesto of 20 per cent of Agroman, which ranks second to Dragados in the Spanish construction league, is part of an effort by the bank to raise capital to fund its prob-lematic banking operations. Banesto needs to strengthen its balance sheet after the collapse two months ago of its merger with Banco Central.

It recently sold a stake in the mining group, Asturianas de

Dyno also announced the acquisition of the West Ger-

Zinz, to Curragh Resources of Canada and is considering dis-posing of part of Tudor, its big

posing of part of Tudor, its big battery producer. Dragados and Agroman would have merged had the two banks joined forces. Banes-to's need for funds has also prompted it to propose group-ing its industrial interests under a new holding company.

The upsurge in activity in construction shares has joited the Madrid bourse out of its winter torpor and led to e titanic struggle for control of another of the top five Spanish companies, Cubiertas y MZOV, which is struggling to fight off two other major competitors, Ferrovial and Entrecanales. Between them, these two have

Cubiertas y MZOV

acquired some 37 per cent of

over.

Volker has repectedly rejected any idea of merger. In effect, HBG's majority shareholding in the common gives it little power to influ-ence Volker's management. Earlier this year, Volker beefed np its anti-takeover defences by issuing a two-year option to buy up to 7.5m pre-ferred shares to e trust that in effect is controlled by manage-ment and which already owns ment and which already owns 2.5m Volker voting preferred

This effectively diluted the voting power of HBG, which at present is estimated to control about 6.5 per cent of the votes in Volker, including both com-mon and preferred shares. despite its majority holding of the common stock.

The bulk of Velker's common stock - around 70 per cent - is issued to shareholders in the form of depositary receipts that have limited vot-ing rights. Last week, a Dutch court

denied a Volker bid to deny any voting rights to HBG, which holds a combination of common stock depositary receipts and underlying share

But the majority stake will entitle HBG to consolidate Volker into its annual accounts

For 1988, Volker bounced back to profit, turning a net loss of FI 169m into a surplus

of F1 17.8m (\$8.47m). Its tnrnover totalled F1 1.9bn. HBG made a net 1988 profit of Fl 54.5m on turnover of Fl 3bn.

market crash. The shares have been buoyed recently by their "shell" attractions. J England mada profits of

just £41,000 in the year to June, 1988 and Mr Unwin, who intends to become chairman, expects no increase this year. He wants to expand the food manufacturing and distribu-tion division and he will inject some of his own businesses intitially the ceramic compounds company P E Hines.

timber frame kits for the con-

struction indostry, and achieved profits of £2.3m in

1988. The maximum possible

total consideration, depending on profits, is £25m.

CLF Yeoman moves on acquisition loss

UK COMPANY NEWS

By Vanessa Houlder

CLF YEOMAN, the leasing company, has discovered heavy losses in a sobsidiary acquired through its £88m acquisition of CLF Holdings

last December. It has made a provision of £12m for the loss-making subsi-dary, Technology for Business. A rights issue of £15m has been called in order to restore the balance sheet.

Mr Tony Simkin, finance director, has resignad, although he will assist CLF until his successor is appointed. The problems at Technology

for Business, a computer distri-

bution company, were only dis-covered after a detailed review

of CLF Holdings that followed its acquisition. The scale of its

difficulties emerged after a review by Price Waterhouse. CLF Yeoman emphasised, however, that the problems in TFB did not affect the group's asset finance business, which was the object of last Decem-bark acquisition

ber's acquisition. The division has now been put np for sale. In addition to iosses and non-recoverable debts of about 26m, the com-pany believes it may incur sim-ilar costs in pulling out of the husiness.

It is now reviewing its post tion with respect to legal action over the acquisition. The shares are suspended

pending an announcement at the end of next week which will give further details of the rights issue.

Feedex accounts qualified

By Vanessa Houlder

FEEDEX Agricultural Industries, a property devel-oper and grain merchant, will have its 1988 accounts qualified following a disagreement with its auditors. This was disclosed at the same time as it announced that 1988 profits fell by a third from £3.16m to £2.03m.

Feedex has decided to override the advice of its auditors, Hodgson Impey, over the treat-ment of a transaction involv-

ing a related company. The auditors argued that part of the proceeds from the sale of a development to a 50 sale of a neveropment to a so per cent-owned subsidiary should have been excluded from the 1988 result in line with the first Statement of Standard Accounting Practice. The company said that this view would haved resulted in

an understatement of pre-tax profits by £945,000. Turnover fell from £143.84m to £139.54m.

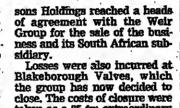

Hopkinsons sharp fall

HOPKINSONS Holdings, the Huddersfield based valve manufacturer, yesterday amounced a sharp fall in tax-able profits from £1.56m to £243,000 for the year to the end of January.

The reason for the plunge lay in a halving of trading profit to £2.1m and an exceptional loss of £3.32m represent-ing provisions for slow moving and obsolete stock. Group turnover remained stabla at £73m. Earlier this week Hopkin-

All these shares have been sold.

This announcement appears as a matter of record only.

taken as a 25.4m extraordinary item which helped depress earnings per share from 1.86p, to 0.27p. Dividend for the year was down from 3.33p to 2.165p, with a 1.165p final.

It is not every day that a new bank is created, especially not a bank with assets of over £22 billion. That, however, is what happened yesterday when TSB Group brought together all its banking operations into TSB Bank plc.

Yesterday, We created

The new organisation places all TSB Group's banking operations under single management, allowing TSB Bank and its customers throughout the UK to gain real benefits from our massive resources and balance sheet strength.

TSB Bank will be organised along retail and corporate banking lines. The retail banking arm will look after the TSB high street banks and the credit card, property services and consumer finance. operations. The corporate and merchant banking services will be provided by Hill Samuel, who will also manage the Group's unified treasury.

TSB Bank has assets of over £22 billion; reserves of over £2 billion; more than 1,600 branches, seven million customers and one of the broadest service ranges of any UK banking group.

The sheer size of TSB Bank plc means that now, instead of the 'big four' high street banks, Britain has the 'big five.'

HRES: In Chaty

 Image: State of the state

To use a seasonal analogy, the Prime Minister may find that if the decision to join isdelayed beyond the autumn the fruit will have ripened to the extent that it has fallen of the tree. European leaders are expected to approve the first phase of monetary union at

their Madrid summit in June. The UK Government has attacked the Delors Committee report outlining moves towards full monetary union of the Economic Community, but Britain

STERLING BECOMPAG a full faces the risk of being left out as an after thought, member of the Buropean Mone. In the cold if it does not make Mr Parsons also

mechanism.

CURRENCY RATES

there is a growing possibility of the UK becoming a full member of the EMS, and points out that it need not remove the ability of the authorities to depreciate sterling in future months. He points out that the Italian lira is allowed a 6 per ceot

divergence movement from its central rate, and suggests the pound may be given a similar limit. Other members are only allowed to move within 2% per cent of their central rate, and whether the UK Government about further menetary inte-gration if it fails to join the would wish sterling to have a wider allowed movement, and perhaps be regarded as a sec-ond class member, may be Mr Nick Parsons, economist at Union Discount, suggests tha compromise allowing Britain to become part of the mechanism could involve

Mr Parsons also believes

open to doubt. If the pound does go in with a 6 per cent allowed movechanges to the common agri-cultural policy, which would be promoted in the UK as a triumph for Government pol-icy, while the complications of ment, it produces quite an attractive scenario however, because it means that sterling could still fall to nearly DM3.00 without going outside its limit. Mr Parsons suggests that a the EMS could be hidden away

realignment of the EMS once a year may be considered accept able. Therefore it is reasonable to look at the differential between twelve-month sterling and D-Mark interest rates, and then compare this with the 12-month forward rate for tha pound against the West German currency. The interest rate on twelve-

month sterling is 12% per cent and on twelve-month D-Marks is 6% per cent, giving a differ-ential in favour of the pound of 61 per cent. The spot rate for sterli DM3. pren give of D meat arous sated by the interest rate d ferential. On this basis ti pound could join the EM mechanism and the Gover ment could allow sterling depreciatewithout being force · to raise interest rates.

Pressure fades for UK base rate rise

INTEREST RATES showed no, regular pattern in Europe last, week. Starling rates fell at the end of the week, with the key three-month interbank rate fin-ishing below the current 13 per higher base rate. Pressure for higher base rates evaporated with news that the UK current account deficit in March was £1.2bn, against market esti-mates of £1.5bn. This was com-plimented by other economic plimented by other economic-news, pointing to a slowdown in the economy.

in the economy. Mr Nigel Richardson, econo-mist at S.G. Warburg Securi-ties, said that the trade figures were not as good as first suggested. The deficit was reduced by erratic items and a favourable shift in the off favourable shift in the oll accouot, but that other eco-nomic factors, including a fall in M0 mooey supply growth were favourable. He still believes bank base rates even-tually will be forced up to 14 per ceot, influenced by ores sure on inflation from Using

lik clearing lanak base leading rate 13 per cost inter Nevember 25

On the other hand the Swed-ish Central Bank acted to cool overheating in the domestic economy by raising its dis-count rate 1 per cent to 95 per-cent. The Government also unveiled a revised Budget of higher indirect taxes. The Irish Central Bank

Dow recovers from early knocks

Wall Street

AMERICA

Y MAY 2 196

THE PUBLICATION of a stronger than expected economic picture from US purchasing managers sent an overer. 2400 tended stock market sharply lower early yesterday but 2300 stocks had recounsed most of their losser by the earl of the 2200 session; writes Janet Bush in New York

The Dow Jones Industrial 2100 Average planged 20 points within the first half hour of 2000 yesterday's session but then stabilised and recovered to close 3.84 lower at 2,414.96. It appears that 2,400 has become a main support level for the Dow: Volume was very low with only 138m shares chang-

ing hands. The recovery came in spite of the continued drift of US

Treasury bonds. The April report from pur-chasing managers indicated something of a rebound in eco-nomic activity compared with April to a level roughly com-mensurate with the first quar-ter taken as a whole: its index

rose to 53.9 per ceni from 50.4 per cent in March. The sharp rally last Thurs-

ASIA PACIFIC

Dow Jones Industrial Average 2500 2200

1900 May 1988 - 89 Apr

had fallen below 50 per cent in April, the level which acts as a dividing line between eco-nomic growth and contraction. In late trading, the dollar was quoted near session highs at Y134.10 and DML8915 while

Both bond and storak mar-kets have performed strongly recently on hopes that a broad decisionation of economic activdecastration of economic activ-ity is underway. Although there were some positive aspects to the purchasing man-agers report, notably a decline in the rate of inflation, mar-kets interpreted it as showing that the economy remains more robust than imagined. This view certainly belined

day to a post-crash peak was: This view certainly helped partly because of rumours that the dollar which rose strongly the purchasing managers index. In spits of more talk about the

cy-making in the Federal Open Market Committee. Also due THE THREAT of a political crisis sent Dutch shares plungtomorrow are April figures for ing in active turnover yestercar sales, which have been conspicuously weak recently. Crucial too will be Friday's

day, while most other bourses in Europe were closed. A coalition row over plans for spending cuts to pay for an environmental scheme pushed April unemployment and wazes release. Takeover situations provided the CBS tendency index down 6.6, or 3.6 per cent, to 177.6 in trade of FI 892m.

some interest yesterday. Ogilvy Gronp, the interna-tional advertising agency, surged \$17% to \$49% in over-the-counter trading after Blue chips were worst hit, with most selling attributed to individual investors. Royal receiving a \$45 a share offer from WPP Group of Britain Dutch fell Fi 2 to Fi 134.80, Analysis believe that WPP is prepared to pay a higher price for the US group. CNW gained \$74 to \$4314 on Unilever lost FI 3.50 to FI 132 and recent favourite Hoogov-ens shed FI 4.80 to FI 100.80.

the New York Stock Exchange prospects of a Japanese disas its board formed a commit-tee to consider the \$44 a share count rate increase and inter-vention by the Bank of Japan and the US Federal Reserve. offer from Japonica Partners.

Kollmorgen declined \$1% to \$23% after the company agreed to be acquired for \$25 a share by Vernitron which had been trying to take over the company for some time.

was quoted about % point lower at the long end, taking the yield on the benchmark Canada long bond to 8.99 per cent. The markets will closely

WEAKNESS on Wall Street WEAKNESS on Wall Street and a bout of profit-taking saw stocks close with a moderate loss in quiet trading. The com-posite index fell 14.71 to 3,613.14 as declines led advances 378 to 244.

US MARKETS

WITH London markets closed, most US markets had slow sessions, record Drexel Burnham Lambert. In the metals, gold, silver and piatinum adged higher on some scattered short-covering after Friday's share decline. Copper lost over 200 points on mostly local activity. In the softs, sugar was the most active market as prices gained 65, basie July, on trade and commission house buying. Prices traded as low as 1138 before soaring late in the session. Speculative selling weakened the coffee market. Cocoa closed higher in quiet trading. The livestock markets had lower beliy futures due mostly the large emount of first day deliveries against the May. An expectation of declining hog runs geve support to the hog futures. Cattle closed unchanged on mixed fundamentals. In the grains, prices rose in all markets as the settlement of the port strike helped firm the futures. Expected Soviet tender business was supportive for the corn market as prices rose 434, basis May. The energy complex advanced on steady trade buying helped by stop orders adding ength. Orange juice futures railied 270 in the May contract on good commission house buying.

Nikkei edges closer to 34,000 level

A QUIET holiday atmosphere and a weaker yen kept a lid on buying enthusiasm but Japanese shares nevertheless rose to a fourth consecutive record high, writes Michiyo Nakamoto in Tokyo.

The Nikkei average moved closer to the 34,000 level, advancing 79.82 to close the day at a new high of 33,793.17. The index had reached a session peak of 33,880.75 and a low of 33,721.58

Advances led declines by 578 337 with 172 - issues unchanged.

The Topix index of all listed shares gained 14.74 to 2,503.26, but turnover at 921m shares was down from Friday's 1,19bn. There was very little news to give the market direction on a day that was sandwiched between the weekend and the second and longer part of the Golden Week holidays, starting on Wednesday. Trading was featureless and the rise in share prices to new heights was attributed to a lack of selling rather then a frenzy of buy-

.

There was a mood of opti-missi, although it was based on little concrete fact. "It is a

pension funds will return to the market, although there is no hard evidence that this will happen soon. The market's fundamental

strength yesterday was reflected in its ability to rise in spite of a weaker yen and a singgish bond market. While interest rate worries have been. 31 quelled for the time being, currency concerns, will remain since investors have no way of knowing what overseas mar-kets will do to the yen over the holiday period from Wednes-day to Friday.

The main brokers were said to be doing their best to pro-inote large capital issues yes-terday and one leading firm reported that Business esti-mates for the sizel companies were likely to be revised upwards. With less worry about interest raies, large vol-ume issues attracted consider-able interest on expectations that they would be sought later to meet the needs of new funds coming into the market.

The most actives list was

funny situation in which peo-ple are arguing themselves into a builish posture," one analyst said. The positive stance stemmed largely from confidence that a lot of money would soon be entering the market from institutions which had pulled out of the market in March to adjust their books for the year-end.

There has also been specula-

tion that funds from post office

Financial Times proposes to publish this

survey on:

This is an exclusive offer to Financial Times readers.

It invites you to be part of a collaboration that will keep you in complete control of your busy personal and professional life.

For only \$34.50, you can buy the prestigious FT Factmaster personal organiser binder

With it-and free-comes a May-to-May page-a-day Diary and a 'Starter Pack' consisting of 11 FT-Pink organiser tabs for the binder in hardwearing plastic and sample sheets of each section.

The Starter Pack also includes full colour London and UK Maps, 14 International city centre maps, a fullytabbed A-Z address section

for clients, colleagues, friends and restaurants, blank tabs with labels for your own section headings, and all the basics for a full Task Management System. If your present binder is showing signs of wear, this special FT offer gives you the perfect opportunity to renew it.

> Don't delay, though, as the offer ends on June 30th, 1989.

It's more than merely practical. The FT Factmaster binder is in an elegant, durable black bonded leather with

pockets and a pen-loop. The portable 6-ring binder gives you the flexibility to

49.00

change or add to the contents. You can load it however it suits you best.

Other refill sections are available, too, details of which we will send you later. Each section (which fits any 6-ring binder) contains approximately 200 pages and is designed to last 12 months. These are offered to FT readers at half-price, \$8.50 per section.

Just the facts, \$15.

If your personal organiser is still looking good, you might only want to replace your tabs and interior sections.

In which case, you can buy the FT Starter Pack and

Diary sections (without the binder), for only \$15.00. To take advantage of this exclusive offer to FT readers, simply

complete the coupon below and post it off to us right away. Alternatively, telephone (01) 799 2274 quoting your credit card

## FINANCIAL TIMES

Why caveat emptor will not suffice

he discovery in mid-Blarch of just two pois-oned grapes in Philadel-phia was all it took to persnade Britain's Gateway grocery chain instantly to sweep £20,000-worth of Chil-

ean fruit off its shelves. "Gateway simply could not take the risk of a single case of contamination," the company said. "We will not stock this

fruit again until we are abso-Intely sure there is no risk." Last weak, three weeks after the first press reports that glass, pins and other contami-nants had started appearing in processed haby foods, Gate-way, Safeway, Sainsbury's and the rest were still displaying products which were suspect.

By any measure, the appar-ent risk from the person spik-ing Heinz and Cow & Gate hahy foods was many times higher than that cffered by whoever was exercising his grndge against the Chilean régime. Yet the risk was allowed to remain.

It could be argued that since the manufacturers' and retail-ers' response to the affair was heavily conditioned by the police, they cannot be hlamed. But appalled parents and the tahloid press have no time for snch niceties. Commercial

damage seems inevitable. Established crisis management techniques have not stood up well to their severest test to date in the UK. Recent experience snggests that standard practice can cope only with the most straightforward cases. Two years ago Matte-sons Wall's withdrew all supplies of its Peperami salami snack after a salmonella scare, and sent ont the clear and sim-

ple message: return all pur-chases for a refund. More recently, the discovery of mercury in a tub of Dairy Crest batter was handled in the same way. In both cases the products were reintrod-nced relatively speedily with little apparent harm done.

Manufacturers must

he phrase "top Swiss banker" conjures up a variety of images in people's minds, depending on how you balance the typical ingredients of solid-ity and power with the less flattering ones of excessive secrecy or just plain dullness. Caricatures range from hland, fat men in grey snits to those infamons gnomes who were once thought to be working for Britain's downfall in caverns deep below Zurich.

Britain's downtail in caverns deep below Zurich. Switzerland's top banker is currently Mr Robert Studer, the president of the executiva hoard of UBS, the country's largest bank, and he fits none of these preconceptions. With his crisp good looks and engag-ing mapper a more ant coming manner, a more apt com-parison is with some dashing *Skilehrer* or an advertisement for Swiss health food. Indeed, he lists his interests as skiing,

jazz, golf and gardening. His style is relaxed and his English fluent. But Mr Studen is having a rough passage at the moment, and much of this interview was about the prob-lems besetting UBS and Swiss banking in general which have forced him and his colleagues into an unaccustomed spot-

light. UBS's international image, UBS's international image, particularly in London, has been tarnished by its clumsy approach to Hill Samuel a cou-ple of years ago when it emharked on acquisition talks with the merchant bank and jilted it at the last moment. More recently, it was shaken by the £115m losses suffered by its securities offshoot, Phillips & Drew.

1938 Born, Lucerna Both these unhappy episodes might be dismissed as local set-backs in UBS's drive to become, in Mr Studer's declara-tion to his shareholders, "one 1979 of the world's leading interna-tional banks." And in other respects his hank is, indeed, continuing to forge ahead. But 1980 UBS is also embroiled in wider controversies which are threat-ening to dispel some of tha

mystlque traditionally suryear. rounding Swiss banking. There is, for example, the money-laundering scandal in which Swiss banks have been

accused of helping drug push-ers conceal their ill-gotten gains, and which has caused has spent most of his time on the foreign exchange and securities side, with a couple of foreign spells in Beirut and New York, rather than in more tra-ditional lending and depositthe downfall of the country's Justice Minister. Swiss bank-ing secrecy is also at issue, though whether you think taking This has given him a reputa-tion as one of Switzerland's more worldly and aggressive bankers. Much has been made there is too much or too little of it depends on whether you are the US Justice Department trying to track down crooks, or a millionaire seeking the safe haven of a numbered account. The Swiss Cartel Commission has provided further aggrava-tion by trying to break open by commentators of his mill-

# The no longer secret life of a Swiss banker

David Lascelles talks to Robert Studer, president of the executive board of UBS

the Swiss hanks' notoriously restrictive pricing and dealing practices. Mr Studer is prepared to admit that there has been a loss of mystique. There have have how an army works, you would not draw any parallels with UBS," he says. "By its nature, an army has to be highly decentral-

admit that there has been a loss of mystique. There have been mistakes, he says, and "we were late in adjusting to the new world." But he thinks When he took over the top post at UBS just over a year ago, Swiss banks were already facing attacks on their secrecy and cartelism, and their time-honoured practices were being the damage has been exagger-ated. "The discussion of these matters that we see in the papers is not close to the pic-ture that we see - at least from our bank." To scotch any idea that UBS might actually have suffered from it all, be exposed to wider moral and judicial strictures. This has forced them to refine their strategies and adopt a more reports that the funds entrusted to its care by clients aggressive stance - a role for which Mr Studer is well-suited.

But these sorts of pressures have also been blamed for UBS's troubles in London, PERSONAL FILE where it was making a belated attempt to catch up. If he was buying P&D again, Mr Studer says be would implant much 1957 Joined UBS 1974 First Vice President 1975 Senior Vice President stronger management controls, and bring Swiss efficiency to Member of Executive bear more quickly on the brok-ing firm's chaotic back offices President, Head of Financial Division which caused a good part of **1988** President of Executive the losses But Mr Studer is unrepen-

tant about taking the plunge in tant about taking the plunge m London. "It is our belief that globalisation of banking is going to take place, and it is our conviction that London is the most important financial centre in Europe and will be in the EC after 1992." Although the losses were nainful be showed record growth last Swiss banks are accustomed to hostility, as Mr Studer has learnt during his 32 years at UBS. Born near Lucerne, he the losses were painful, he argues that they were "reason-able" in the context of the considerable operations UBS now has in the City, and they did not deter his bank from moving into spanking new offices in Broadgate at the beginning

of this year. One reason for the firmness of Mr Studer's resolve is his belief that the world is moving towards Swiss-style universal tary career: he is an infantry colonel who, until recently. banking: the combination under one roof of the major spent more than two months of each year on army duty. But

types of financial service, banking, securities and asset management. London's Blg Bang pushed UK banks in that direction, and now deregula-tion in the US and Japan could have a similar effect in those countries too.

This will give Swiss banks a strong competitive edge, Mr Studer says, hecause they know how to manage universal banking - P&D notwithstand-ing - and have the technology to back it up. "Wa believe you have to have strong logistics to win the war."

Mr Studer also likes to dwell on the "quality" image of Swiss banks and their capital strength. But what of the criti-cism that the undiscriminating nature of much of the money that flows into Swisa banks enables them to charge high fees without providing excep-

"It is partly true that Swiss banks are expensive, but that is because we have high equity requirements," says Mr Studer. Since all the world's high banks will shortly have to abide by the same control where under a the same capital rules under a new international agreement he expects price differences to even out. He is more evasive on UBS's investment record because his bank does not pub-lish performance figures. But he says that UBS's mutual funds have done well. "Wa don't have to fear anybody in asset management. Only some of the London houses are equal to us.

ticipate indirectly.

Many of the pressures amount to demands for greater openness, in co-operating with the investigation of interna-tional crime, in the presenta-tion of financial accounts (which currently fall little short of fiction), and in freeing. up the Swiss domestic banking

Not surprisingly, Mr Studer is wary, scathing even, about many of these demands. While many of these demands. While Swiss banks have already co-operated in some of the more notorious cases (in blocking the Marcos millions, for exam-ple), they have their own repu-tation for secrecy to think about, and Mr Studer is firm "that we should not take on "that we should not take on the policeman's joh." He is also non-committal at this stage as to how much UBS is prepared to reveal about itself in its financial statements, though the decision to disclose P&D's losses marked something of a breakthrough. One factor prod-

ding Mr Studer forward on this front is the relatively low valu-ation of Swiss banks' shares compared to those of foreign banks, particularly Japanese. Greater disclosure might help, but UBS would also have to follow Nestlé and open its registered shares to foreigners, a step Mr Studer is not yet ready to take.

As for the cartel charges, he describes them as contradic-tory, and warns that they will drive up costs for the smaller customer, who has been subsi-dised by profits from hig cus-towers in the next tomers in the past. Mr Studer does not believe that 1992 will isolate Swiss banks; his own is already well established in most EC countries and will be able to benefit from the freedom of movement within the Community. As for the suggestion that Switzer-land might even benefit if the

EC introduces uniform taxes, driving capital into external

shelters, Mr Studer doubts that

will happen. He' is much more worried that Switzerland'a own taxes, and tha tight constraints on. the local labour market, will accelerate the relative decline of Zurich as a financial centre, and hasten the transfer of business to more attractive centres, particularly London (despite stock exchange practices there; which he describes as "the most antiquated in Europe"). He has threatened to transfer more of UBS's securities businote of OES's securities Dist-ness to the City unless Swiss-stamp duty is reduced (the Government is proposing only a marginal reduction).

"For UBS as a group we don't care whether business is chauvinistically, L say it's regrettable. Zurich can never be the number one financial centre, but it must remain in a strong position."

limit public distrust

Anything more complex, however, and systems col-lapse. The egg industry, lack-ing both a policy and an organisation to act as a tronble-shooter had no defences in the recent salmonella affair, and 1s yet to recover.

The food industry at large was defeated by the anti-additives lobhy during a protracted struggle which has resulted in cousumer perceptions of the E number system being turned on their head. Despite international acceptance, additives with the E prefix are now widely mistrusted. The industry was slow to realise the serionsness of the situation, and it was not until the retail-ers apparently sided with the campaigners that real efforts were made. But it was too late, and again, such crisis manage ment methods as were brought to bear proved inadequate. In the short term, the indus-

try expects the current baby food catastrophe to he fol-lowed by a spate of copy-cat crimes. Longer term, there is unlikely to be any let-np in the cycle of scares and crises, especially since all the events mentioned have contributed . whether deservedly or not -to undermining the popula-tion's formerly blind trust in

the processors. While manufacturers prepare plans for investment in new packaging plants, they should also he earmarking funds for management systems to cope with more frequent and more complex assaults on their products, hrands, con-sumers and their reputations,

In the present example, fol-lowing instructions to help investigations – in the pro-cess exposing infants and feck-less or uninformed parents to danger – has yet to be shown to have heen useful to the police. But it can only have damaged the manufacturers' Interests

It is increasingly apparent that clear, swift action hy the baby food makers could have limited this effect and, inci-deotally, prevented the subse-quent fudging of the blackmail investigation hy the flood of

Investigation by the floor of unrelated tampering incidents. In this context it is worth referring hack to the first major incident in tha US in 1982. When poison in Tylenol analgesics killed seven people in Chicago the manufactures in Chicago, the manufacturer ignored pollce advice, and withdrew all stocks. Reintrodnced in more secure packs, Tylenol is now the leading pain-killer in the US market.

sel Stadium in Brussels, when Juventus played Liverpool in the European Cup Final, the failure of the Belgian footballing anthorities to observe basic rules for the conduct of matches with regard to sales of tickets and crowd control, compounded by the absence of prompt action by the police when the disturhance broke out on the terraces, contributed snbstan-tially to the deaths of 49 spectators at tha hands of rioting Liverpool fans. The former head of the Belgian Football Union and the police officer in

charge of crowd control were last Friday both found guilty of criminal negligance in the Brussels Palais de Justice. Fourteen out of the hordes of

violent Liverpudlians were suf-ficiently identified at the end of a lengthy criminal process of a lengthy criminal process to satisfy the hurden of proof of their guilt of involuntary manslaughter. Their sentences, partially suspended in length of imprisonment and suspended indefinitely in their execution pending possible appeals and call-up to undergo imprisonment, present prob-

imprisonment, present proh-lems of enforcement; they have already evoked mixed reac-tions hoth hare and abroad. Delay in the criminal process, time for stoking up natural emotions from the Italian victims' families and from the accused, who have kicked their heels (some of it in custody) for four years, diverse views from commentators about the conduct of the pre-trial proceed-ings and the trial Itself - have conspired to distract attention from the pressing need to provide answers to prohlams of crowd control over fans, gladia-

crowd control over fans, gladia-torially opposed to one another even when geographically sep-arated on the terraces. The Hillsborough disaster a fortnight ago presents a starkly different picture. True it is, for there is no hint of rampant hooliganism, although there have been alle-gations of individual mishehav-iour, possibly of a minor crimiiour, possibly of a minor crimi-nal nature. The public inquiry under Lord Justice Taylor is designed to discover what actually occurred in those few fatal minutes at the heginning of the Liverpool-Nottingham For-est Cup Semi-Final; why It happened; and what lessons can be

learned for the future. At ths preliminary hearing in Sheffield on Friday, at the

## JUSTINIAN

moment that Judge Verlynde was pronouncing judgment in a Brussels court, Lord Justice Taylor announced that be fully intended to comment on his findings before the new foot-hall season begins in little more than three months' time. The lessons of Hillshorongh, therefore, are to be speedily learned and hastily acted upon. As with all public inquiries into large-scale disasters -

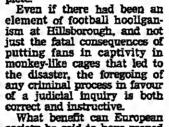

whether it he Zeehrugge, King's Cross, Clapham Junction, Cleveland or Hillsborough - no one is on trial and no The lessons of

### Hillsborough are to be speedily learned and hastily acted upon

apportionment of blame is to be attributed among those who may have been responsible, directly or indirectly, for the violence and unnatural deaths of 95 people. Paradoxically, an English judge will be presiding over a process that is inquisitorial, akin to thet operative in the criminal courts of Western Europe.

The immediate and long-term social benefits from the Hillshorough inquiry are thus apparent. The compelling desire to avoid any future disaster, and to that and to frame urgently a national pol-icy towards the siting of stadia and conditions for audience participation at popular sport-ing events, is the aim of the inquiry.

The desire (if it exists) to find scapegoats in the shape of the Sheffield police or the Shef-field Wednesday football administrators for maintaining the spectform is more veniently and appropriately thrust aside, to be addressed (if at all) after the inquiry is com-CESS.

What benefit can European society be said to have reaped from the protracted trial in Brussels? The pursuit of justice is seen hy many merely to have inflicted injustice, whether it be inadequate pun-ishment of the 14 Liverpudli-ans in the eyes of the citizens of Turin, or an infliction of long-drawn-out anxiety for not just the 14 convicted hut their acquitted co-accused

The Belgian criminal process is neither better nor worse than our own. It seeks to grap-ple with the inherent problem of ensuring rules that balance the overriding demands of fair-ness to accused persons and the public interest in bringing to justice those who have transgressed the criminal law. To achieve that balance inevitably is time-consuming. To try a single accused for his responsibility for a criminal event, the facts of which are not overly complex to unravel, makes no excessive demand on a civilised criminal justice sys-tem. To put on trial, however, multiple defendants on charges that present major evidential difficulties, even in an age of high technology that can mate-rially assist the forensic process, is a recipe for public dis-satisfaction and individual unfairness.

There is no escape from the conclusion that, whenever major public disasters occur, tha wiser course for government is to abandon the crimi-nal justice system.

There are other examples where the criminal process will be so cumbersome, so costly, and ultimately so socially and ultimately so socially unproductive and individually unjust in its ultimate applica-tion that an alternative device for solving social prohlems must be sought. Hillsborough and not Heysel monte up the solution.

points up the solution. The lat-ter disaster should have prompted an Anglo-Belgian public inquiry, rether than the invocation of a Belgian criminal trial requiring the support of the English extradition pro-

## Expatriates

## Earn tax-free interest on your Current Account in the Isle of Man

X Money Market Interest Rates

Interest paid gross (tax free)

Interest calculated daily, paid monthly

If you're presently working or resident abroad it doesn't make sense to retain a bank or building society account based in Britain. But with a Manx Money Market Cheque Account from Bank of Scotland (Isle of Man) Ltd you can retain your British connections and earn a high rate of interest without the tax impositions of the mainland.

Your Manx account cheque book* is used in the normal way and there is no restriction on the amount you can withdraw at any one time or the number of cheques you can issue. On deared balances of £3,000 or more you earn interest at Money Market rates and even on balances below this you will still receive a competitive rate. And, because of Manx tax legislation, interest will be paid gross, without deduction of any tax.

Enjoy all the benefits of a normal current account paying high rates of interest and all from a subsidiary of a major U.K. bank.

. . . .

There can hardly have been a time in the post-war period when the banking climate was as favourable in as many parts of the world as it is now. Virtually averywhere, commercial bankers are reaping the fruits, of healthier markets. And this is showing up in rising profits, stronger balance sheets and

brighter prospects. Those who relish increased competition can also enjoy the benefits of deregulation; which is slowly but surely expanding their operating freedom in most major markets — though for many of them this is also a. mighty uncomfortable process. The mood among the larger banks can be summed up bysome of the epithets used by chairmen in the 1988 annual reports: "An important and good year" (Citicorp); "momen-tous" (Barclays); "memorable" (Amro); "good" (Hongkong and Shanghai Banking Corpora-tion); "highly satisfactory". (Pance Bibao Vizcare) (Banco Bilbao Vizcaya).

To be sure, the picture is not entirely rosy. Third World debt continues to be a worry, and some banks have suffered spec-

BANKERS CAN be a bit like tacular losses, particularly in the notoriously over-supplied lems on the weather, or its London securities market. The US thrift industry is a big worry. But these are pains for which bankers can only blame themselves, they stem from earlier excesses, and are not the blows inflicted by a hostile world. Besides, neither of these problems poses a threat to the banking system of the poten-tially lethal kind that had peo-

ple gnawing their knuckles in the early 1980s. "The debt problem has lost its sharp edges," says Mr Huib Muller, the Dutch central banker who heads the Baslebased committee of international bank supervisors, which is leading the drive to strengthen the world banking system with new capital guidelines. Those guidelines will be fully in force by 1992, creating a common framework for all

the world's major banks. If bankers do have an imme-diate worry, it is that the recent disturbing inflation trends and rising interest rates will tip the world economy into decade. recession, and bankers know

from experience how expensive a hard landing can be. But an economic downturn would also provide an early test for the Basle exercise which, Mr Muller says, was

## INTERNATIONAL BANKING

partly devised to "reinforce the banks' cushion" against the humps of the economic cycle. Arguably, most large banks are now better protected, both in terms of financial strength and management awareness against recession, than they were against the last dip in the cycle at the beginning of this Third World debt could make it worse. But though

major international initiatives to restore countries' creditwor-thiness, like the one recently launched by Mr Nicholas Brady, the US Treasury Secre-

work - for the banks, at least - is taking place at a more hundrum level where bankers are trying to whittle down their exposure and shore themselves up against loss. Tha business of trading Third World assets is becoming highly developed, and is beginning to show results. Overall bank exposure to the Third World is down hy \$26bn, or about 5 per cent.

While prominent hankers continue to offer public sup-

because it fosters a positive atmosphere, they also say that much could be done by technical measures which would enable them to minimise losses from write-offs - which is another way of saying the nnutterable phrase of "debt forgiveness", an issne with which time will inevitably confront them in the end.

As they take longer-term stock of the decade that looms, there are a number of major questions which bankers are having to address, relating to both their markets and their

strategy. Possibly the greatest is the reshaping of their regu-latory environment. Whether this amounts to de- or re-regulation is a matter of some debate. Developments like Basle certainly impose new burdens. But the overall trend is towards removal of barriers, and the process still has a long way to go.

Although London's Big Bang in 1986, when banks were admitted to the securities business, is now viewed as a mixed blessing, because of the losses it caused, it set off a seemingly unstoppable chain reaction of

smaller bangs throughout Europe. Be it Paris, Amsterdam, Frankfurt, Milan, Madrid or Zurich - the talk is of deregulation and reform. Every-where this affects banks' vital interests, either because it opens up new avenues, or because it sweeps away their protective barriers.

Just a few examples: In Switzerland, an attack has been launched on the numerous cartels operated by the banks which protect their pricing, dealing commissions and new issue business;

on banks engaging in insurance is under pressure; In Frankfurt, banks are at the centre of the debate about reform of the German stock exchanges; and In Italy and Spain, govern-

ments are trying to engineer major restructuring of the banking industries.

Arguably, this process is also adding to the pressure for major reform of US banking legislation. Earlier this year, the Federal Reserve Board opened a chink in the Glass-Steagall Act by permitting banks to engage in a limited amount of securities activities through special subsidiaries. This in turn produced the first signs of a similar easing in the world's other great banking nation, Japan. Although full-scale change may still be some way off in

both countries, there has been sufficient movement to prompt visions of banking in the mid-1990s with US and Japanese commercial banks running European-style equities under-writing and dealing businesses in their domestic markets. This could, of course, be as much a recipe for disaster as

the great regulatory breakthrough everyone bas been waiting for. But it would reinforce the view that universal banking (the ability of banks to combine a wide array of ser-vices under one roof) is in the ascendant.

Bankers want to offer securities services to strengthen their position in the corporate banking market, where large corporations need highly sophisticated forms of finance. But this exposes them to different types of risk. The multinational market is also heavily overbanked. A question for the 1990s will be whether this trend has reached its limits.

Many people see in develop-ments like the rapid growth of leveraged buy-out (LBO) finance a symptom of banks' reaching too far into the realms of innovation for their own good. Though few banks compete

any longer in the retail banking business outside their home markets (the few conspicuous players include Citicorp, NatWest, and the Japa-nese banks in California), many of them are turning with fresh interest to their old stamping grounds in the high street.

Chastened by nasty experi-ences abroad, they realise that the private individual can be a loyal and lucrative customer. particularly since be now possesses the fruits of the longest post-war economic boom, and needs a wider array of financial services for which charges can be made. This bas also increased bankers' interest in related services, such as insurance. In the UK, a classic case of a country where bankers are rediscovering their bome market, the process has been has-tened by deregulation of the building societies and a sharp

increase in competition. For European banks, though, the "home market" may have to be redefined, as the Euro-pean Community's plan to cre-ate an integrated market by the end of 1992 gathers pace. So far, bankers have taken a fairly cautious view, believing that while the Banking Directive will make it easier in theory to expand across EC member state borders, the practical difficulties of assalling a for-eign market will remain. No banker bas yet been so bold as to declare his aim of creating the First National Bank of Europe. Nonetheless, 1992 has unleashed an unprecedented

pean hanking market, and it would be surprising if nothing resulted. Bankers need new opportuni-ties. While tougher capital requirements and an invigorating blast of competition may be very healthy developments, both will squeeze profitability, and force banks to build earnings and cut costs. The steady emergence of the Japanese banks as a major force on the world scene is another factor putting bankers on their mettle. Times may be better, but that only adds to the throng.

### The Banker, July 1988

# 3,776,382 million Iranian Rials translated at the closing exchange rate of 67.1 to 1USS as per the Provisional Financial Statements for the Iranian year 1366 (ended 20 March 1988). THE WORLD economy appears to have taken a turn for ths

worse this year. Last year's surprisingly strong growth in the developed world and the newly industri-alising countries of Asia has given way to fears that the cur-rent six-and-a-half year old recovery from the recession of the early 1980s may be about to end in the familiar cycle of

stop-go. Inflation has returned to haunt the major industrial economies, forcing interest rstes higher from the lows set after the global stock market crash of October 1987. The international debt crisis

has flared up sgain. Riots in Venezuela, which left 300 dead in February, were a bloody reminder that Latin America and other parts of the developing world have largely missed out on this decade's growing prosperity.

Serious doubts have resurfaced about the viability of the policy mix pursued by the US. With no sign of compromise between the administration and Congress about cutting the Federal hudget deficit, the recertal nucleum deficit, the Internstional Monetary Fund warned recently that continu-ing strong US domestic demand could trigger a new jump in the US current account balance of payments deficit, with the attendant risks of a sudden drop in the dollar's value and a further twist to the international inter-

est-rate spiral. The state of international trade remains a worry, despite the successful conclusion early in April of the mid-term talks in the Uruguay Round of mul-tllateral trade liberalisation negotiations. The groundswell of discontent in the US about Japanese inward investment is a potent reminder of protec-

tionist pressures. For bankers, therefore, the world economic environment is not very encouraging. According to Mr Rod Barrett, banking analyst with London stockbroker Hoare Govett, banks will only prosper against this back-ground if they concentrate on managing their businesses more efficiently, eliminating peripheral activities and reducing risk.

The fact that monetary policy throughout the industrial world is carrying the burden of curbing inflation is of particu-

lar relevance to banks. Over the past year, the Fed funds rate, at which hanks in the US horrow and lend reserves to each other, had risen by three percentage points to around 9% per cent in mid April. West German short-term interest rates have about doubled. In Britain, bank

The IMF said the US current

account balance of payments last year's very strong 4.1 per

deficit could jump to \$156.6bn next year, from a projected \$139.3bn in 1989. It projected a rise in Japan's current account surplus to \$93.5bn in 1990, from \$84bn in 1989, with West Ger-many's surplus increasing to on next year from \$49.7bn in 1989.

**INTERNATIONAL BANKING 2** 

Soch developments would mark the reversal of the pro-cess of reducing current account imbalances between the US, Japan, West Germany and the newly-industrialising economies of Asia. They could also cause international inves-tors to scale down their demand for US dollar assets. That, in the IMF's view, "would involve a significant risk of instability in financial markets, accompanied hy high inflation and a slowdown in growth There have been many fore-casts of such a "hard landing"

for the US and world economies in the past, and all have proved to be unfounded. But the IMF's latest warning appeared to reflect a gloomy reappraisal of developments during the spring. These

The growing worry is that markets may

regain the upper hand

included the unexpected strength of the dollar, the emergence of upward pressure on long-term interest rates, the apparent stalling of the current-account adjustment pross, and signs of persistsnt inflationary pressure in most industrial countries. Symptomatic of this reap-praisal was the IMF's projec-tion that US consumer price

inflation would rise to 4.9 per cent in 1990, from 4.7 per cent this year and 4.1 per cent in 1988. An early draft version of the outlook report, which was circulated among member gov-ernments some weeks before, projected a drop in US inflation to 4.5 per cent next year from 4.6 per cent în 1989. The IMF had also revised upwards

sharply its projection of next year's US current account deficit from \$137.4bn previously. When the world's finance ministers and central hank governors met in Washington early in April, they appeared to take heed of the increased

risks to the world economy. They backed a US plan to allsviate the debt crisis by encouraging IMF and World. Bank support for voluntary debt reduction schemes. Many details, however, remain to be worked out before its likely impact on the debtors and their bankers can be ass Among the world's seven most powerful nations, the US,

The structure of world banking

## **Profit matters most now**

and parts of Europe, too, banks are learning to appreciate the need for profitability. It appears that the more open the IN THE increasingly deregulated and competitive world of international banking, regulatory environment, the more likely banks are to make profitability a greater priority. Those most reluctant to embrace the new thinking tend to operate in more regu-lated protected systems. West German, Swiss and French banks retain their focus on size

the big players are having to learn to pay more attention to profitability and less to asset and capital growth. Banks are

beginning to realise that in banking size is not everything. Bill Vincent, bank analyst with US securities house Salo-

mon Brothers in London, believes banks are learning to be less indulgent and more hard-headed. "Until five years ago the only important mea-sure of a bank's worth was assets size. Banks wanted to get bigger - for reasons of economies of scale, corporate prestige, to protect themselves from takeovers - and bank managers were directly rewarded for the amount of assets they piled on to the bal-ance sheet." believes banks are learning to and market share. Yet even in these markets there are signs -of a gradual change in think-ing. The French are talking of investor relations for the first tims, and Deutsche Bank recently bosted a presentation for hank analysts in London, an event almost unheard of in

previous times. Japanese banks are also slowly, if reinctantly, wakingup to the need to prioritise profitability. Although the competition to smass ever increasing asset totals appears to be as strong as ever among top city hanks in Japan, says David Marshall, of IBCA Banking Analysis, capital adequacy requirements of domestic and international authorities overshadow the future growth of apanese banks. As Japan's banks increase

equity to meet the new standards, Marshall points out that they need to earn better yields on assets in order to maintain their capital ratios. "Japanese banks are becoming noticeably more concerned about return

on assets." Yet Japanese banks are notoriously slow to change. IBCA's Marshall warns that, "despite the avowed recognition that 'quality' is better than 'quan-tity', the statistics show few signs of the principle being put into practice."

The new emphasis on profitability is forcing banks to look for more effective ways to enhance earnings.

Cutting operating costs is widely regarded as one of the most effective ways of increasing profitability. Staffing levels in particular have come under closer scrutiny. Disposing of unprofitable husiness is another route to

greater profitability. Banks are less willing to suffer losses or poor earnings just to establish or maintain a presence in new markets or products. Foreign

then to move into new markets via entright acquisitions. One example is the link-up estab-lished the Royal Bank of Scot-land and Spain's Banco Santander.

The process of diversifica-tion will also be affected by the drive for profitability. Banks will look to specialise in busi-nesses in which they enjoy the best returns. They will also look to enhance earnings by trading their balance sheet. Assets such as mortgages, credit-card, corporate and sov-ereign loans will be increasingly traded by banks on sec-ondary markets in the search for a better return on assets.

It would be misleading to say that banks the world over have adopted the strategy of manag-ing by sharebolder value. But what is undeniable, is that pation with size and are concentrating more on profitabil-

banks have lost their preoccu-The importance of this change cannot be understated, says Bill Vincent, of Salomon Brothers. Traditional thinking about how to run a bank is heing turned on its head.

"Banks were once run for the benefit of the staff. Then they were run for the benefit of customers. Now banks are being run for the benefit of the people who own them - the shareholders."

monetary policies with cuts in their budget The G aware that banks have been surplus countries - Japan and West Germany - for their part pledged to pursue economic and structural policies that would snstain growth of domestic demand. The objec-tive for both groups of countries was to encourage sus-tained non-inflationary economic growth. But such pledges were noth-

Canada and Italy promised to

complement existing tight

ing new. They have been a fea-ture of practically every meeting of the major industrial countries since September 1985, when the Groop of Five conntries - the US, Japan, West Germany, France and Britain - began an era of more intensive economic policy co-ordination with the Plaza Accord to reduce the value of the dollar.

There is little doubt that, since then, the G5 (which later became the G7, after the inclusion of Italy and Canada) has become skilled at influencing financial markets. With the world economy in its present uncertain state, the growing worry among policy-makers is that the markets may once again gain the upper hand.

Peter Norman

asking them for money, yet providing little in the way of returns. So shareholders increasingly want to know what the money is for, and are demanding a better return on their investment," says Keith Brown. These sentiments are echoed hy Bill Vincent, who firmly believes that the management

of hanks by "shareholder value" will become the dominant force in banking philosophy in the 1990s. "The central aim for a bank should now be to maximise your share rating - get as high a p/e ratio as possible - and produce a high a sustainable return on shareholders' investment."

If a bank wants to continue raising funds for expansion, the argument goes, it has to offer shareholders good dividend growth. And dividend growth can only be guaranteed if profits are also growing.

It is the UK banks which are leading the way in emphasis-ing profits ahead of assets and capital. Lloyds Bank in partic-ular, under the stewardship of its combative chief executive Brian Pitman, is pioneering the concept of shareholder value. In the US, Australia, Canada

### **INTERNATIONAL BANKING 3**

NEARLY A year has passed since international bank supervisors, grouped in the Basle Committee, issued their new capital-adequacy regulations for the world'a banks.

Arguably the most important measure affecting the banking industry in modern times, this has given banks the - perhaps unenviable - dis tinction of becoming the first industry ever to be regulated on a worldwide basis.

Between now and early 1993, most countries will be phasing in the rules, which will subject all banks to the same capital disciplines and ensure that they are competing on more equal terms, at least so far as capital is concerned. The rules do two things: pro

vide a formula, based on the riskiness of assets, for measur-ing a bank's capital adequacy; and lay down minimum capital requirements, currently a risk asset ratio of 8 per cent.

Bankers have hroadly welcomed the rules, because they should strengthen the banking industry and reduce discrepan cies between individual coun-tries' capital rules - an impor-tant competitive factor in the anes

relaxed approach than others, making life easier for their banks. British banks, for examtion to introduce the rules in full this year, rather than

phase them in over four years. The Governor, Mr Robin Leigh-Pemberton, sald a

ations in their equity, a special

decision was required from

"We are confident all major

ada, Belgium and France.

banker had asked him: "Why do you always lead with our chin?". bank capital. These include the US, Germany, Italy, the Netherlands, Switzerland and

However, the Bank was one of the prime movers behind the capital accord, and it is determined to set a brisk pace. Other countries have used

the leeway huilt into the accord to make local modifica-tions. Tha US Federal Reserve Board, for example, has relaxed the capital rules for hank bolding companies because they are not strictly banks, even though their sole subsidiaries may he large banks. This is seen as a hit of necessary rule-hending to belp

banks through the transition stage when some of them. might be below target. In Japan, whose banks are among the least well capital.

ised, the Ministry of Finance has also softened the rules for similar reasons. But Japanese banks have raised enormous amounts of new equity in the last 12 months, and are expecting to be able to meet the new rules on time through a mixture of rights issues and earnings retentions.

According to IBCA, the Lon-Mr Muller says the main don-based bank rating agency. benefits of the accord are that a number of countries already it has raised both the quantity bave, on average, sufficient and quality of hank capital

and focused the market's attention on the fact that off-balance sbeet business (contingent liabilities, for example) contain risk as much as those which appear on the balance sheet.

III

A careful monitoring process is oow necessary, he says, to ensure that nimble financial minds do not undermine the strength of the accord with clever innovations.

Aside from overseeing implementation, the committee intends to carry its work for-ward by extending supervisory co-operation into new areas.

Since the present accord covers only credit risk (the danger that the borrower will not repay the loan), there is a case for extending it to cover position risk (the danger that a bank's trading position in the securities or foreign exchange market's may cause it loss through unexpected price movements). Mr Muller is not yet convinced that the committee has a role to play here, hut working parties are looking

into it. Major supervisory issues are also raised by the growing trend towards financial supermarketry, where hanks con-duct several different types of financial service under one roof - securities and insurance being the main examples. This will require greater co-op-eration between the supervisors of these activities. But neither the insurance nor the securities business has got its regulatory act together at the nternational level as well as banking, so much groundwork still needs to be done.

Third World debt: Stephen Fidler examines the new approach

THE ANNOUNCEMENT on March 10 by Mr. Nicholas Brady, the US Treasury Secretary, of a new approach to the developing-country debt prob-lem was one of enormous significance to international hanks.

In the words of Mr Shafigul Islam, of the Council of Foreign Relations in New York, "the Brady speech marks a qualitative break from the past by treating debt reduction no : longer simply as an appetiser on the 'menu of options', but

as the main course * ..... Mr Brady called for support. from the World Bank and the International Monetary Fund for an accelerated reduction of the debt and debt-servicing burden of Third World debtors that agree to economic adjustment programmes-supported

from the large discounts avail-able on Third World loans in the secondary market.

ిం

<u>ا</u> ا

1K

The Brady approach was presented as a continuation of the Baker principles – a coun-try-by-country, growth-ori-ented voluntary approach to the problem, which would ben-efit only countries that would subject themselves to IMF and subject themselves to IMF and

World Bank conditions. But in many respects it over-turned the Baker Plan. That plan, outlined in 1985 by Mr Brady's predecessor James Baker, envisaged debtor coun-tries' returning to growth with the help of new loans from commercial banks and the World Bank.

The reason the Baker Plan had to be overhanled was that the scale of lending required never arrived, either from the commercial banks or the World Bank.

indeed, the approach was moving deeper into crisis as country after country plugged its external financing gap by resorting to arrears with commercial banks. While many countries learned lessons from Brazil's confrontational moratorium, they were resorting to

the same strategy, but carrying it ont more quietly. It was suggested that the US administration had accorded the problem added urgency because of national security concerns. While Mexico was seen as a particular problem the spectre of a surge of migrant workers arriving in the US after economic dislocation in Mexico is said to exercise the National Security Council - there was also a concern that other emerging western hemisphere democracies would be irrevocably dam-

in Mr Brady's words, debtor countries at least needed to be shown "some light at the end of tunnel". The problem, both critics and supporters say, is that the ideas have the appearance of being half-cooked.

While some highly informal administration estimates sug-gest that debt and debt-service reduction of 20 per cent could be achieved under the proposals, it is still unknown whether the resources from the IMF and the World Bank to support each country's debt pro- remain an unknown of gramme will be big anough to for some time to come

Mr Brady also suggested that the commercial banks should agree to a general waiver of the restrictive clauses in loan agreements, to allow an intense period - perhaps of three years - of debt reduction.

Legal experts in the field say that while, in a strict sense, a that while, in a strict sense, a general waiver of all these clauses might not be likely, or even desirable, it should be possible to operate loan agreements to encourage debt reduc-tion. "The aim will be to replace the principle of equality of treatment of all banks

Given the voluntary framework, the banks may simply decide to sit tight

with one which gives them equality of opportunity," said one lawyer.

Mr Brady also called for an international examination of regulatory, tax and accounting rules with a view to amending those which stand in the way of debt-reduction. The extent to which this will happen is still not known, and it is difficuit to see how banks which are writing down old loans are to be expected to come up with new loans.

Some central banks, for erample, acknowledge that easing some of their rules might come into conflict with the prudential requirements they are now applying. Tax rules applying to sovereign debt often apply to other areas

of banking. The Brady approach should, if it works, recognise more con-vincingly that the interests of international hanks are increasingly divergent. In banks' early responses, a dif-ferent approach is clearly beginning to emerge.

At this stage, though, with so much unclear, including the ability or willingness of countries to take the economic medicine of the IMF and World Bank, its impact on banks' balance sheets seems likely to remain an unknown quantity

OU NEED MAI

In case you're wondering, MAPS stands for Midland Automated Products and Services. We introduced it in 1983 as the first comprehensive electronic cash management service to the UK corporate market. As the market for electronic funds transfer has become increasingly more sophisticated in its demands, Midland has responded to the extent that it is now the major provider.

Through the introduction of innovative, technology-based products and services, we can meet the specific requirements of our customers, in both the domestic and overseas markets.

Our individual products that sit under the umbrella of TelePath provide information reporting (BankTrak, StockTrak), instruction giving (Automated Payments Service, sterling and currency) and advisory services (GlobeTrak and Foreign Exchange Exposure Management System).

As further evidence of our leading market position, 3 out of 5 CHAPS participants are registered with Midland. A figure that has grown over the last two years and continues to grow. (You may like to know that the other 13 settlement banks share the remaining 2/5ths of the market between them).

If you would like further evidence as to why we are now regarded as the Bankers' Electronic Bank, contact one of the people listed below.

KEEN INTEREST tinged with mncb cautioo is the best way to describe bankers' attitudes to the EC and 1992.

IV

As a highly regulated indus-try, theirs stands to gain or lose much from Brussels' pro-posals to create an integrated market. But assessments of the likely impact vary, from predictions of far-reaching restructuring, to comments that banking is already very international and that things will probably stay very much as they are. There are two strands to the

story so far. One is the prog-ress being made in Brussels oo plans for an integrated banking market. The other is the banks' response to them.

The Second Banking Direc-tive, which will form the cornerstone of EC banking law, is making its way through the EC legisletive machine. Its main aim is to create the concept of a single banking licence, to enable any bank recognised by one EC member state to oper ate in all the others without further ado. In order to ensure that states recognise and regulate banks on the same basis. there are additional provisions and directives oo permissible banking activities, capital adequacy, accounting and so on.

Ironically, the most controversial aspect of the proposed legislatioo has little to do with the internal regulation of hanks: barring one or two details, the bulk of it is acceptable to all members. The sticking point is a proposal that all non-EC banks should be subjected to a reciprocity test before being granted admission. This would be to ensure that EC banks have equal access to the noo-EC hanks' home markets.

This proposed provision has become the focus for wider fears that the 1992 plan will eocourage protectionist atti-tudes within the EC. US banks, for example, have denounced it as unfair, and warned that it could provoke retaliatory action by the US authorities against EC banks operating in the US.

But the EC is now proposing to ameod it, to give it less

sweeping effect. However, the reciprocity issue is unlikely to impede

overall progress towards the sought associations through single market. And the ques- cross-sbareboldings, such as cross-sbareboldings, such as the Royal Bank of Scotland with Banco Santander of tion facing bankers is how they should position themselves for Spain, and Amro of the Nether-lands with Générale Bank in

If there is a prevailing school of thought, it says that the wholesale banking markets. where banks deal in buge sums of money for large corporate customers, already effectively operate without national boundaries. And for this end of the business, the removal of country barriers will make little difference. Indeed, the Brit-isb Bankers' Association has said it will merely remove "irritants'

It will be a different matter lower dowo the corporate banking scale and in the retail banking markets, where there has been little cross-border pecetration by EC banks -

The proposed reciprocity test has become the focus for wider fears of protectionist attitudes

within the EC witness the wide difference in the price of banking services betweeo countries. This is now

an area of intense scrutiny by bank strategists. It is an accepted fact of banking life that the highly personal nature of banking rela-tionships makes it hard for banks to break into new markets. Bankers say that their strategies, therefore, must either be based on acquisition of existing businesses, or on the marketing of services which are unique or have some special attraction, such as low

The 1992 plan has triggered very little acquisition so far. Although Deutsche Bank's purchase of Banca d'America d'It-alia in 1987 is cited, that occurred before the plan truly got underway. Since then, there have been some small "mopping up" operations, such as NatWest's purchase of a handful of hank hranches in France, and Credit Lyonnais' purchase of the 18-hranch Banque de Commerce in Belgium. A number of banks have also

from retail banking to concen-trate on corporate finance. Aside from geoutnely reduc-ing barriers, the 1992 plan is concentrating bankers minds on a market which many of them had previously neglected, believing it to be fragmented and inaccessible. Most interna-Belgium, an alliance that will concentrate on the Benelux ares initially. But the single market is also tions like credit cards. Midland Bank is trying yet a likely to widen the gap between large banks, for whom it opens new possibilities, and the smaller ones which will do different approach by strengthening its network of locally-owned investment banks, such best to stick to their local maras Trinkaus & Burkhardt in Germany and Euromobiliare in kets. Whether this leads to the emergence of a new strain of Italy to develop an EC-wide corporate banking capability. If no overall pattern has yet super-banks will be one of the interesting points to watch.

**David Lascelles** the interests of expanding

WITH REMOVAL of the legal with ALENGVAL of the legal barriers between banking and securities businesses high on the political agends in the US and Japan, the question of bow well commercial banks handle their investment banking sub-idiaries takes on a new sidiaries takes on a new

A report last autumn from the US General Accounting Office, the independent watch-dog arm of Congress, provided alarming insights into just that question.

The study was commissioned by members of the House Banking Committee consider-ing the repeal of the Glass-Steagall Act, which has barred banks from the securities business since the great depres-

At the heart of the problem for regulators is whether, in banks' business horizons to allow them more ways to earn money, they inadvertently provide them with a host of opportunities to lose money as well

**INVESTMENT BANKING** 

US regulators see 'culture

- possibly threatening a bank's solvency in the process. Among the GAO study's key findings, after reviewing the UK securities house subsid-iaries of 18 US commercial banks, was that for the 1996-87 year, all the operations either recorded losses or were only marginally profitable. Indeed, some of the operations recorded losses so extensive that an injection of capital by

the parent bank was required. The most extensive losses for US commercial bank subsidtaries in London stemmed from their involvement in Eurobonds, the business where the greatest investment in capital had been made, according to the GAO, Yet it has only been within the past few months that US firms have begun to throw in the towel, conceding thet too many firms are chas-ing too little business for Eurobonds to be profitable, even with the ancillary banking business they may bring with them.

Just a few weeks ago, Chemical Bank announced its withdrawal from Eurobonds, while Citicorp has over the past year, pared its staff back to a marginal number of traders and

GAO auditors, who had access to confidential regula-tory reports from the Federal Reserve and the Office of the Comptroller of the Currency, also found that mangement controls were lacking. For instance, the investment banking subsidiaries were plagued by high overhead and expense problems that went untackled. and inadequate credit and market risk analysis procedures were in place. Accounting and computer systems were over-burdened, while written procedures for accounting, creditevaluation and separation of duties were non-existent. GAO officials concluded that

an element of "culture clash" may account for the difficulties the US banks had encountered. The nature of hanking is entirely different from that of securities," said Allan Mendelowitz, senior associate direc-

clash' in securities zone tor, who worked on the study. "Bankers do things slowly and Bankers to things slowy and by committee, while merchans bankers are used to taking risks, moving quickly to take advantage of market movehans

And American banks are opparently not alone in their difficulties with investment banking subsidiaries. Consider County NatWest, the securities subsidiary of National Westminster Bank, which is now the subject of an investigation hy the UK Department of Trade and Industry into its handling of the £837m rights issue for Blue the 283'm rights issue for back-Arrow used to finance the pur-chase of Mangower. The bank has had losses of more than \$180m in a 2%-year period, partly stemming from the Blue Arrow offering, hut also in other key segments of its busi-

Union Bank of Switzerland's Phillipe and Drew subsidiary d £50,000 in late 1988 was fin by the Securities Association, a self-regulatory organisation. for failing to meet minimum capital-adequacy standards on its reporting date. Furthermore, when its management learned of the breach, it failed to notify TSA; compounding its problems. But at the heart of Phillips and Drew's difficulties was not insufficient capital, but rather, that the firm did not have the management and accounting systems in place to

alert it to the fact that something had gone wrong. However, some banking ana-lysts argue that it may not be fair to jndge commercial banks' success in the securities industry in the current cli-mate. After all, deregulation in several countries - not least of all the UK - have created intense competition, resulting in tremendous pressures on

profit margins for independent securities firms as well. For instance, Morgan Gren-fell, a shareholder-owned merchant bank, withdrew from the equities and gilts businesses last December, aacking 450

And some commercial banks are indeed doing investment banking profitably. Barclays' BZW subsidiary earned pre-tax profits of about £330m in 1968,

while Royal Bank of Scotland'a

Charterhouse unit had a profit of £34m. Mr John Tyce, banking

abusin

industry analyst at Nomura International, argues that the International, argues that the explosive growth in the securi-ties industry in the past lew years coupled with the deregu-lation of the Big Bang means that very few institutions are going to be able to earn profits. "It was always going to be a disaster," said Mr Tyce. In 1985-86, the total capital in London was \$250m, Mr Tyce points out, less than is now invested in the UK government with business alone — and that

gilts business alone - and that business is clearly unprofitable. Since Big Bang, turnover has tripled, the number of employees has more than dou-bled, and salaries have soared. Thus, despite the increase in business, profitability is down. Still, commercial banks argue that there are good rea-

sons for them to want to enter the securities business, partic-ularly with lending profit margins pared to just a few basis points for many traditional banking products.

For instance, many banks, eyeing the growing market in securitised financial assets, see opportunities to manufai assets, see opportunities to take their own assets off-balance sheet while earning fees celling a new product. In particular, US banks would like to offer their mortgages and credit-card receivables in securitised form to eager investors.

While Citicorp is able to offer a Euro-tranche of credit-card recievable-backed securities, it must retain an investment bank to do so in the US.

Others see securities subsidiaries as a way of expanding more traditional bank-lending functions. For instance, mezza nine finance in leverage buy-outs is attracting banks with high margins and befty fees. But banks are limited in their ability to digest the equity components of those deals by Federal Reserve regulations.

Security Pacific, for instance, increasingly active in mezza-nine finance in Europe, is able to share the equity holding with its merchant banking subsidiary, thus enhancing its ability to participate in that market.

expansion of trade finance after the liberalisation of inter-national exchange rates, is being subsumed within general banking services to financial mistitutions . ....

In the early days, the provi-sion of banking services like simple payments facilities and clearing, and settlement of foreign exchange-or securities to corporate clients, involved the setting up of so-called corre-spondent relationships with

banks in other markets. But as Mr. Ron Noakes, dep-uty head of Midland Bank's global correspondent banking operations, says, defining cor-respondent banking is crucial

What little lending there is tends to be short-term financing

for trade positions

to understanding changes in the business. "Our prime clients are other banks. Put another way, we're a bankers' bank." 

The list of correspondent banking functions is long, ranging from transmission of funds, via foreign exchange transactions and letters of credit, to trade finance, bill collections and guarantees.

Increasingly, securities han-dling and custody are also coming under the correspondent umbrella, as banks concentrate management thinking on network control.

Mr Ian Cormack, division executive in Europe of Citi-bank's financial institutions arm. argues that sweeping developmants mean that the definition of correspondent banking needs to be changed.

"We increasingly see a broad customer base which includes. all institutions investing in any way through the securities. industry. Unlike corporate cli-ents and governments. financial institutions have never : been treated as customers. But they are - they have needs and problems, and solving them can generate profits," he.

Examples of clients being helped in novel ways are myr-iad. Cormack cites the imminence of 1992 in Europe, and says this has opened up consid-erable opportunities for banks to sell innovative services to customers. Many of our financial clients have structural problems which they need to solve to meet the changes. We are offering software packages which cut processing costs and double handling capacity," he

بالمرابية فتسترك وسنقرص ال

says. Small wonder, Citibank has placed such importance on its financial institutions division - it is now the bank's most

profitable area in Europe, earn-ing excellent feturis on miniing excenent gaturns on min-mal contal outlay. "The busi-ness is a hige consumer of costs but relatively little capi-tal is involved," says Cormack. This point's echoed by Mid-land's Nonhest "It's a service

orientated basiness, so we spend a lot on computers, systems and communications.

système and communications. Banks have to identify the level of resources they can commit in order to be profit-able in what if a very competi-tive business. Increasingly, aspects of the business are taking on the characteristics of a bulk ser-vice, with the economics of scale attached to any commod-ity or service. There have been stentificant developments in significant developments in significant developments in electronic systems like Swift and London's Chaps, as well as foreign exchange and securi-ties clearing systems. This has raised the general quality of correspondent bank-ing products, but has also concord several blances which

squeezed several players which have decided they can no longer afford to stay in some ser-

vices. For example, Lloyds Bank pulled out of US dollar clearing in New York when it found m New York when it found that it was cheaper to usa Security Pacific. "The key to the business is consistent delivery of service quality," says Citibank's Cormack. Generally, the returns on capital more than justify the

costs. One crucial impact of the Basle agreement is that bank-to-bank risk requires a much lower capital weighting than bank-to-corporate risk. What little lending there is in correspondent banking tends to be short-term financing for trade positions, making sparing use of banks' capital and involving easily quantifiable

As the notion of correspondent banks as potential clients bas come back into vogue. banks have seen it as a business which has to perform. "Historically there was a passive approach to the business, but we have an accurate man-

tional marketing group. "Con-sequently, we are looking to" exploit opportunities to deliver financial products and services to other banks where we may have a comparative advantage. Equally, in principle we are advised on their servicas by agement of the economics," other institutions." says Francesca Barnes, head of Noakes echoes this: "Once,

correspondent relationships were incidental. The business Chase, Manhattan's instituwas never really measured, in fact in some banks it wasn't even seen as a cost. Now that has changed. People want to know their costs."

One of the clearest ways the

### FOREIGN EXCHANGE

Noakes says bas been under-developed. "That takes you straight back to the problem of bow you define correspondent banking," he says. Citibank's Cormack agrees. "In that sense, correspondent banking is a 1970's term."

There is a clear aplit between those banks which are now firmly customer orientated and those which are **Product** orientated. The **HS** banks want to see correspon-

dent services as part of much wider client relationships, while some UK and European and UK banks have retained

banks

ing discipline and risk management.

Across the market there is a growing tendency for all banks to focus key relationships on a smaller number of correspondents. Sharper knowledge of

the costs of various banking relationships allows banks to categorise their partners in a matrix of reward and service.

V

This, too, plays into the wider focus adopted by leading banks. For example, global custody, the business of securities handling, settlemeot and safekeeping, is more and more coming to be seen as a banking facility which bas the same network requirements and similar product characteristics as many correspondent banking services. The heads of many global custody departments now report to the manager of a

financial institutions division.

business is changing is in the new emphasis being placed on the cross-selling of products,

## Profits might not survive currency stability

THE FOREIGN exchange market is possibly tha freest, but certainly the biggest,

casino in the world. With an estimated dollar value of all daily transactions of more than \$400bn, it is also one which few banks that aspire both to provide a full range of services to customers and to improve their profitability can afford to ignore. The margins are small, but

on absolutely enormous vol-umes," said Mr Chris Ellerton, banking analyst at Warburg Securities. "It is a very profitable husiness."

But the nature of the business raises questions for bank regulators and investors, and lends new meaning to the phrase "breaking the bank". Trading foreign carrencies and most banks are trading currencies for their own account, against simply executing customer orders related to trade or investment - is

risky. There are some indications in the US of growing political concern over the unregulated nature of the foreign exchange markets. Mr David Ruder, head of the Securities and Exchange Commission . has . been asked by a Democratic congressman to look into ways to regulate the market, although, given the market's decentralised nature, such a

move is not counted likely. The US Federal Reserve, the US central bank and regulator, last year told Bankers Trost Co, one of the higgest players in the market, to reduce its fourth-quarter 1987 foreign exchange earnings by \$80m, to reflect accurately the size of its positions.

In Europe, concern is also

voiced by central banks about the scale of banks' foreign exchange operations. According to central bankers, most are worried abont the spiralling costs associated with banks' foreign exchange operations, both staff and technology systems necessary for trading and analysis. "Once the resources have

been committed, the temptation is there to use them, and the potential exists to take unsound risks," one European central banker said. "Foreign exchange is getting like securities business. It is more diffi-cult to make a profit from sim-ply speculative trading of the

market. Banks need underlying corporate basiness to trade profitably." "Speculative" trading is one

aspect which also worries bank analysts. They say it increases the volatile element in a bank's earnings, thereby lowering the quality of those earnings.

Mr Terry Smith, banking analyst at James Capel, the hig UK broker, said: "A question overhangs the foreign exchange profits of banks: to what extent are they natural, related to trade flows and asset management? And to what extent are they the result of currency speculation? There is a strong suspicion that the leval of position-taking is growing."

Margins can be so fina that the risks associated with settlement, the counterpart liself and an untoward move in the market before covering the transaction, are such as to make many think banks are now running the risk of breaking a cardinal rule of the game: taking a principal risk

FOREX INCOME AS % OF PRE-TAX PROFITS 1988 1986 1987* Barclays 8.10 13.75 10.74 Lloyda Midland 9.60 8.30 8.00 25.40 10.90 30.60 17.30 5.40 NatWest Bankers Trust 11.00 173.40 16.80 Chase Chemical Bank 26.50 18.70 n/a n/a 21.00 15.80 Citicoro 24.20 n/a22.80 J P Morgan 19.70 69.80 14.20 8.00 Manufacturers Hanover 8.20 n/a "Before loan previsions for LDC debts (UI

Mr Tom Lockett, foreign nificant amount of our turnexchange director at Midland over and revenue come from Montagu, one of the biggest traders of foreign exchange among the major UK banks, said: We try to be selective and careful that our services are not so finely priced that the business is of little value to the bank or group. We look at foreign exchange on its own, and as a part of the whole banking relationship.

Tom tocket: 'we are looking more and more at the use of computers and modelling lechniques'

banks want to keep things. techniques have improved, in many cases allowing us to One European central banker savs:

In the recent past, 1987 was counted one of the best years "Banks can't assume that the cnrrency volatility that they saw over the past four to five years will continue over the next four to five. No one is sitting down aod saying, 'We'll teach the bankers a les-son'; but no central banker nains the core currency of wants the volatility of the past four years in the next four. The banks will have to make money out of mora normal banking business."

Political and economic concerns are all pointing in the direction of institutional change, designed to make currencies more stable. At a global level, the deliberations of the Group of Seven major industrial conntries, are in part designed towards this end: likewise, the moves within Europe to bolster the excbange-rate mechanism of the Enropean Monetary System.

Price stability in markets is anathema to traders, who make money by exploiting the opportunities of price volatility. Stability can mean that they have to take larger and larger postions to make profit-able smaller variations in price.

If central banks are able to manage nominal exchange rates with the success they bave demonstrated over the past year, then it raises the possibility that, at some future date, the profits that banks made from foreign-exchange trading from the late 1970s to the mid-1980s will be seen like an aberration, rather than the norm.

Simon Holberton

Ayor

cost of running an integrated foreign exchange operation, such as Midland, is risk management. "We are looking more and more at the use of compoters and modelling techniques. Management and evalnation of risk is getting better understood, and monitoring

our customer base." He explains that part of the Mr Lockett: "In 1988 and today the pattern of movements has a lack of a clear trend. Most have found trading difficult."

Retail banking: David Barchard on the electronic alternative

## **Revolutionary networks**

RETAIL BANKING used to be regarded as the dullest form of hanking, and the certainly most parochial. But in the 1980s it has become one of the most profitable parts of the industry, thanks to the potential unlocked hy technology, which has made it possible to provide services on a scale undreamed of a few decades

٧I

ago. Mr Rohin Leigh Pemherton, Sank of Governor of the Bank of England, recently told an audience that it would have taken the entire population of the UK to provide retail banking services at today's level using the technology of the early 1960s.

The single most frequent symbol of the retail banking revolution is the automated teller machine (ATM), which for the majority of bank cus-tomers in the US and Britain has displaced the bank branch In the US, the ATM revolu-

tion has been particularly dramatic. Retail banking operations are confined to individual states and, until recently, Americans bad to rely heavily on credit cards to pay for purchases when they were away from home.

However, two ATM networks Plus, based in Denver, and Cirrus, from Los Angeles have emerged in the 1980s, to link more than 7,000 hanks across the US. Plus was established hy Mr Dale Browning, of Colorado National Bank, in 1981. Mr Browning turned a regional ATM network into a national one by getting 24 banks to put up \$100,000 each, and agree on a common set of standards which would drive the cost of each ATM transaction down from \$1 to about 40 cents.

Plus and Cirrus are now used by about 130m Americans a year, and, through the Visa and Mastercard payment systems, they are linking up with other ATM systems that are being organised hy banks in other parts of the world.

In the UK, three separate inter-bank ATM networks have emerged, though Mr John Hardy, head of Link, an electronic payments network that includes most of the country's building societies, helieves the number will eventually fall to two networks, or even one.

In the European Community . as a whole, the Commission in Brussels is encouraging moves by the banks to ATM-interoper-

ability as a step closer to "Citizen Europe" in which national frontiers will no longer impose practical restrictions on indi-

The transformation in retail hanking as a result of electronic technology is only just beginning. It is already beginning to call into question the traditional hranch structure of the banks Fewer staff are needed to

carry out clerical operations. and these can he performed centrally if desired. Midland Bank, one of the big four UK

viduals.

Changes are likely to accelerate in the

1990s: even the ATM may become outdated

clearers, is already believed to be planning massive staff-cuts in its hranches, leaving only a relatively small sales team. and processing accounts in regional offices.

This strategy is not to every-one's taste. Mr Gordon Pell, general manager for retail banking at Lloyds, doubts whether Midland has got its strategy right: "We don't believe in the factory mental-ity. We believe in moving head office out to each region, and taking husiness decisions as locally as possible."

Lloyds does not see this as necessarily keeping costs high. "We have 13 regions and 90 areas directors," says Mr Pell, "hut Lloyds has the lowest costs-to-income ratio of any of the hig British clearers.

even the bank ATM may have been outdated. Mr Brian Allison, general manager of Eftpos UK, predicts that bank customers will be able to use the terminals of Eftpos UK at retailers to draw casb (as well as pay for goods electronically) and to read the balance of their

National eftpos (electronic funds transfer at point of sale) systems are now being designed in other European countries, with Denmark so far the apparent leader. In Germany, there is now a general acceptance that payments

an experiment in using "smart cards" for payment is under way in Regensburg.

Smart cards - relying not on a magnetic stripe on their back, hut on a microchip built into them - are attractive to bank planners, because they may offer a way round some of the problems that currently constrict the development of retail banking.

Banks want customers to use plastic rather than paper for payment, because the processing costs are much lower. For this reason, the British banks have held down the £50 limit on cbeque guarantee cards since 1977, and introduced dehit cards, such as Barclaya' Connect and the Lloyds

Visa cards, which allow holders to pay electronically or by voucher instead of hy cheque However, not everyooe is entirely happy about these

changes or sure that the con-sumar's hest interests are being protected. in Britain, the Jack Committee on customer -hank relations, which reported in March, recommended sweeping changes in banking practice, including greater protection of the Per-sonal Identification Number

(PIN), the "electronic signature" by which a cardholder identifies himself. Many bankers believe - as the Jack Committee appeared to -that the PIN system is inherently inadequate. One Britisb firm, Norton Opax, has

already produced a smart card alternative, which is reason-

account.

systems based on plastic cards will dominated the market, and Banks want customers to use plastic, rather than paper, because the processing costs are much lower

ably cheap (under \$4) and enables customer signatures to be recorded and authenticated ectronically. The need for authentication

is growing as paper-based banking systems turn into electronic plastic-hased ones. In Enrope for instance, the paper Eurocheque looks certain to be superseded in a few years as a method of drawing by its own plastic guarantee card com bined with a PIN.

The globalisation of retail banking is already producing some surprises. "Through ATMs, we are now coming into direct contact with the con-sumer cultures of Italians and Americans, and learning about their habits and expectations," says Mr Derek Wanless, Direc-tor for Retail Banking at National Westminater, the largest UK Bank.

In Europe, integration is also being speeded up by the Com-mission's goal of a single market hy 1992. in retail banking, the area of fastest change after the plastic card is the mort-

Rules restricting German mortgage banks to their own country bave been lifted, tbough so far the Germans have confined their mortgage activities outside Germany to limited funding operations.

Five French banks and two Danisb mortgage banks are already operating in London. The first British Ecu mortgage was recently launched - by tbe Italian Istituto Bancario San Paolo.

THE PAST year has been one of tremendous upheaval for the credit-card industry, with new products, new players and new rules for the game in the inter-national markets.

"We are going through a period of drastic change in all the card markets all across the world," says Mr Pete Hart, who has been president of Master-Card International, since the The areas where the major

credit-card networks are not represented are shrinking. Banks in Taiwan and several Soviet bloc countries have joined the ranks of Visa issners. More important, the major card networks seem poised for a breakthrough in the previously unwelcoming German market.

In Fahruary 1989, Visa announced that ADAC. the German automobile association, was to offer cards to its 9m members. Until now there has been no large Visa issuer in Germany. Despite the fierce hostility of the large German, Dutch, and Belgian banks, it now looks only a matter of time before they take the plunge and become Visa members themselves.

In establisbad markets, changes have been equally drastic. MasterCard has made major gains in the British and Japanese markets. Last month, a group of four large Japanes banks announced plans to set up MasterCard Japan, as an offshoot of MasterCard International. The move was part of a

44.14

broader pattern of growth by MasterCard throughout south-east Asia. in Japan, duality simultaneous membership hy national banks of both the Visa and MasterCard networks -has arrived. MasterCard's reorganisation there is an attempt to take advantage of this shift. Duality has also arrived in the UK. A year ago, Visa appeared to be well ahead of its ring environments its rival, gaining oew members steadily while MasterCard languished. The picture has now been strikingly reversed. All the larger British banks now belong to both networks,

Behind the froth of all the changes, there is a single underlying trend: the days when credit card services were easily separable from the operations of individual banks are over

**CREDIT CARDS** 

New rules, shuffled pack

and Barciays, whose name until recently was synonymous with Visa, has now issued its first MasterCard product. Lloyds, the smallest of the four arers, is already in the market, offering retailers combined Visa and MasterCard services, and Barclays will sbortly he doing the same. National West-minster and Midland plan to take the same route, but it may

take them longer. "Up to now we have been bunting together in a pack," says Mr Andrew Waldman, senior manager for consumer banking at the Royal Bank of

Scotland, one of the four banks which own the Access brand-ing in the UK. "Now we are doing different things." Royal Bank intends to go in for dual merchant acquiring, but - like the other Access banks - it has to be sure its new Visa cards will not com-

new Visa cards will not compete with its established mass - market cards. The result has been a spate of marginal cards, such as Midland Bank's Indigo card, issued mainly to holders of its new interest-bearing

bank accounts. However, Royal Bank is still co-operating with NatWest and

Midland to create a new elec-

tronic - only card payment sys-tem called Switch. Its critics say it has two disadvantages: it can as yet be used only in a few outlets, and its use is confined to the UK. Switch is a deliberate alter-native to Visa debit cards already launched by Barclays and Lloyds Banks. Both have grown rapidly in numbers,

though usage is harder to assess. So far nnly limited numbers of grocery stores and petrol filling atations accept Switch cards. "Wa believe that, in a few

years, retailers will see the possession of Switch as a significant advantage," says Mr Tim Jones, deputy head of card ser-vices at NatWest, "Indeed, we think that banks nffering retailers only MasterCard and Visa services will be at a significant disadvantage."

Another newcomer to the European scene is Amarican Express's Optima card. Launched in February in the UK and France, it nffers existing American Express custom-ers access to a revolving credit at lower rates of interest than are generally available elsewhere. "We feel that this is a service our customers have been asking for," said Mr Steve Goldstein, UK president of

American Express. American Express's decision to launch Optima in Europe was widely expected, and seen . stay. by credit-card organisations as

a tacit acknowledgement of the limitations of operating only a innitations of operating only a travel - related charge card. Meanwhile, Mr Hart at MasterCard is striving to regain the mnmentum tha organisation lost to Visa in international markets over the international markets over the last three years. "Our higgest concern," he says, "is that our image has suffered. Now we want equal visibility for our hranding. We need to be a bit

more purposeful." To claw back its place in the market, MasterCard has eased requirements for card design, and modified its charging atructure. Merchants using electronic processing will be charged a rate of 1.1 per cent, well below the usual rate for voucher transactions.

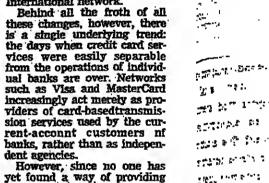

Mr Hart's long-term plans for MasterCard in the Enrofor mastercara in the Enro-pean markets are keenly watched outside the US. Mr Hart's predecessor struck a deal with Eurocard, in which MasterCard allowed exclusive representation in European and related markets to pass of its hands in return for a 15 per cent stake in the European

organisation. The deal, struck at a time when it still looked as if the German banks might be suc-cessful in excluding Visa indefinitely from northern European markets, remains controversial. However, Mr Hart appears committed to soldiering on with the agreement negotiated by his predecessor.

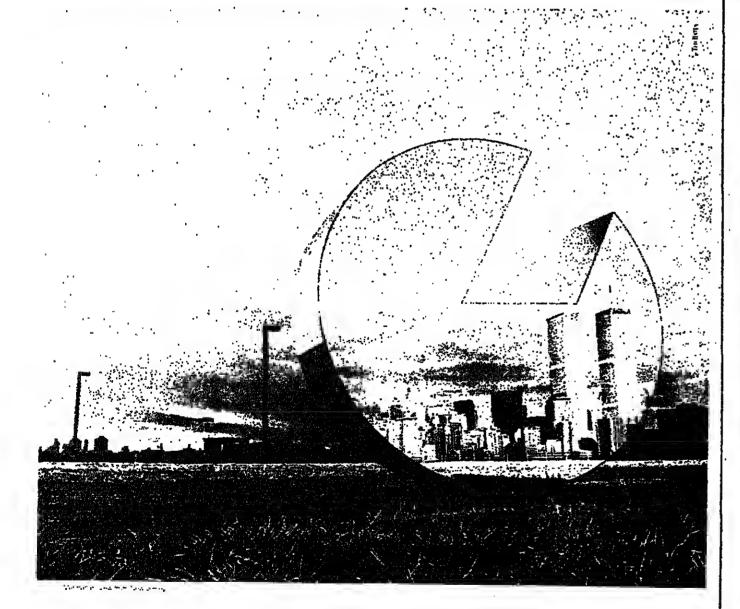

Also in Europe, MasterCard with Eurocard has struck up an arrangement which allows some use by MasterCard hold-ers nf automatic teller machines belonging to the Visa International network.

yet found a way of providing reciprocal card facilities between banks without using the credit-card networks, it looks as if they are here to

Date: Lett

business; in which capital and credit skills were the means of production, is moving steadily toward a record-keeping and accounting business; in which processing skills and systems are the means of production." This new perception of the banks' role in business con-

firms their activities in information technology, which are today focused in two major

First, the creation of new computer-based files which treat customers, both single and corporate, as individuals with their own characteristics and requirements, rather than as anonymous sets of account numbers.

Another way of looking at this trend is to say that the banks are moving from essen-tially batch-orientated processing, where data is amassed during the working day and batched together and processed at night; to on-line transac-. tion-processing (OLTP), where information is continuously available to bank staff (and to their customers), and where data is processed as it becomes available. The files are therefore always up to date.

The drawback with OLTP systems is that they increase dramatically the vulnerability of the enterprise to computer failura - hence the rise of

We like Treating Banks as Customers

We are committed to taking a customer approach to your bank.

For us, this is not simply a concept but a practical moment-to-moment working reality.

Naturally, as a customer you will expect the highest quality service and that suits us fine.

But we believe that providing the very best in value-added payments and securities services is only a place to start.

We go further and build the customer relationships that are the heart of our business.

Through our relationship managers we deliver not only dollar and sterling clearing and a host of cash and custodial services in numerous currencies and permutations - but act as a window onto Citicorp services worldwide.

If you would like to find out more about our customer relationship approach for banks please contact us at Citibank London. Michael McGillicuddy (01) 438 1172 or Alan Noble (01) 438 1787 (S.W.I.F.T. address: ClTIGB2L, Telex: 896581) Citibank, N.A. is a member of TSA and IMRO

A customer approach for banks

## THE US: Anatole Kaletsky delves below the encouraging figures Less robust than it appeared

THROUGH THE eyes of a stock-market investor or an accountant, the last year was e vintage one for US banking. In the 12 months to March 31, the money-center banks ranked number one for stock-market performance out of the 87 industry groups tracked hy Wall Street stockbrokers Smith Barney, providing a total return to sharehoiders of 58.8

VIII

The regional banks' gains were less spectacular, with e total return of 19.3 per cent, just one percentage point ahead of the average for the Standard & Poors 500.

But even this was an impressive performance, considering the events that dominated last vear's financial headlines. After all, 1988 was the worst year in US history for bank failures. It was the year when lobbysits finally had to admit defeat in their decade-ione effort to repeal the Glass-Steagall Act, the archaic law which keeps US banks out of the

securities markets. And it was the year when credit quality concerns began to seep into heart of US commercial and consumer banking from the exotic fringes of Latin America and the Texas real estate market.

At one level, investors' sudden entbusiasm for benk stocks wes only the mirror image of their disdain during the previous two years. From the eccountants' standpoint, the US hanks were indeed doing much better in 1988 than they bad in a long time.

The 200 largest US hanks reported eggregate net earn-ings of \$18.9bn in 1988, against a loss of \$2.1bn in 1987 and a profit of less than \$13bn the year before. Of course, the losses of 1987 were due entirely to the overdue reserves of more than \$30bn in the aggre-gate which US banks established for the Third World debt crisis. Ignoring this eberra-tional yeer, therefore, the banks' underlying return on assets improved to 0.83 per cent in 1988, from the 0.6 per cent reported two years earlier, while return on equity rose to 15.7 per cent from 11.4 per cent in 1986.

Of even more importance than the industry's success in cranking out profits was its ability to boost its capital. Despite the widespread con-cerns expressed by US bankers about the new international capital edequacy guidelines adopted by the Cooke Commit-tee, and the strong feeling that dence of US bankers is largely dependent, therefore, on two assumptions: that there will be no further credit nightmares comparable with the Texas property or Latin American they were designed in a wey highly prejudicial to the US banks, most of the industry has already satisfied the new disasters; and that something requirements, three years ahead of schedule. The few US banks that are still below the will happen to slow the prog-ress of the Japanese and Europesn giants which have emerged from the 1980s as bigkey 4 per cent ratio of tier-one capital to risk-adjusted assets ger, stronger and more eggres-sive institutions than all but a now seem certain to reach the tiny bandful of American banks. new targets well before the

### More important than profit was the boost to capitai

mysterious agglomerations of assets described so lovingly by their Germans, Swiss and Japanese competitors as "the hid-den reserves". In terms of accurate accounting and mana-gerial disclosure, that may be perfectly justifiable, indeed desirable. The fact remains, bowever, that US bank gronps now have less ample cushions to fall back on, if and when some disaster strikes. The vogue for bank stocks and the growing self-confi-

painful for the blg US banks than for their foreign rivals. Keefe Bruyette & Woods, the leading Wall Street bank ana-

lysts bave estimated, for example, that 40 per cent debt-forgiveness would cost the top US banks between \$1.1bn and \$2hn in additional loan loss provisions. Establishing such new reserves would diminish most of the banks' capital by the equivalent of 1 per cent of assets. They would then face again the troublesome issue of raising capital without dinting their long-suffering sharehold-ers' existing stakes.

Most foreign banks, hy con-trast, would have no difficulty Both assumptions remain very much in question. Not only are there new credit con-cerns on the horizon - rangcoping with the 40-to-50 per cent reserves against less-developed country (LDC) loans which KBW says will probably turn out to be appropriate. The ing from leveraged buy-outs to essence of the problem for the US money centres is that, even after the painful reserving action they undertook in 1987 their net LDC loans still amount to between 93 per cent and 199 per cent of equity. For the hlg four British clearers, by contrast, the ratio of LDC exposure to equity ranges from 27 to 82 per cent, while for all bnt one of the Japanese banks it is under 55 per cent. Only the Bank of

Tokyo, whose LDC exposure is 104 per cent of equity stands out among the Jepanese banks as a potential victim of further LDC losses

With foreign banks showing few signs of letting up in their determination to court US multinational companies and expand into the worldwide securities industry, it is hardly surprising that US bankers are pinning their hopes increasingly on the domestic con-sumer and small business markets.

In these markets, however, they run head on into the fast growing, well capitalised and highly rated regional and super-regional banks, such as North Carolina's NCNB, Pittsbnrg's PNC, or California's First Interstate and Wells Fargo. Indeed, with the increasing prevalence of takeovers, sometimes even hostile ones, throughout the banking industry, some of the super-regionals will probably be bigger soon than most of the erst-

in the secondary markets -meaning write-offs in the 50while money-centre giants. to-70 per cent range. But, even Of course, such corporate assuming more moderate losses, the consequences of the Brady Plan could be far more giantism could eventually undermine the regional banks competitiveness and low overhead costs. Even before that occurs, bowever, further upheavals and shake-outs seem likely.

JAPAN Brokers lose ground as deregulation talks quicken IF BASLE, in Switzerland, was

the focus of Japanese banks' ettention in 1988, this year they are concentrating their energies much closer to bome. Last year's chief concern

was the measures needed to conform with new capital-adequacy rules fixed by the Basle-based Bank for Internetional Settlements (BIS). In 1989, the main priority is the domestic dehate over the future shape of the Japanese financial market.

After yeers of piecemeal reform, the Ministry of Finance has quickened the pace of discussion on the central remain-ing issue in the deregulation of the Japanese market - the separation of banking and securities business, under Article 65 of the Securities and Exchange Act.

Banks have long been press-ing for change in order to break into the Japanese securities markets. But stockbroking companies have fought hard to guard their lucrative preserve. However, the stockbrokers' position has been steadily

eroded by piecemeal changes which have allowed banks into certain kinds of securities busi-- particularly overse end permitted securities houses to establish hanking

subsidiaries abroad. Moreover, there has been mounting criticism from Japanese institutional investors about the fect that the Big Four securities companies together account for more than 40 per cent of turnover on the Tokyo Stock Exchange.

Earlier this year, the minis-try published various proposals for allowing banks into the securities markets. These are being considered by a committee of the Financial System Research Council. an advisory body connected to the ministry's banking bureau.

The committee is likely to support an idea whereby banks

### WEST GERMANY

## **Buoyant domestic lending** offsets declining margins

LIKE AN express train speeding through a long dark tunnel, the 1988 results just reported by West Germany's biggest hanks showed the first signs of light after a dark spell.

Y MAY 2 Mg

as

Ken

True, carnings have not regained the record brilliance of 1986, but they are well ahead of the darker figures posted in 1987, when most of Germany's universal banks were depressed by the October stock-market crash.

The extent of last year's recovery has depended largely on two factors: the degree to which profits plunged in 1987, and the banks' aubsequent ability to keep their costs. down

Deutsche Bank, Germany's higgest-financial institution, posted the best increase, with a rise of almost 12 per cent in group partial operating profits, to DM3.1bn (£1hn). Dresdner Bank, the second biggest bank, managed a 4.9 per cent rise to DM1.6bn.

By contrast, partial operat-ing profits at Commerzbank, the third biggest bank, fell 4.3 per cent to DML05bn; while down in Bayaria, Bayerischa Vereinsbank and Bayerischa Hypotheken- und Wechsel Bank (Hypobank), both posted small fails.

However, full operating profits, which include gains from own-account trading, were higher across the board. None of the banks reveals its precise figures, but all reported rises, ranging from almost 5 per cent at Commerzbank to over 30 per cent at Deutsche Bank.

and Dresdner Bank committed

diffuse, although Germany's biggest banks have for some time been trying to put together the pieces of for their

future European networks. Deutsche Bank, which is by far the most advanced, completed another part of its jig-saw after gaining permission from the Spanish authorities to take a majority stake in Banco Comercial Transatlantico earlier this year. Growth in France is proving

ore difficult for all three of the big German banks. All would like to acquire or take stakes in French banks, but their plans have been put on ice on account of the highly political nature of foreign bank takeovers. As a result, organic growth of existing French operations seems to be the name of the game - for the time being, at least. Meanwhile, there has been

increasing debate in Germany about the "power" of the banks in recent months, with the spotlight falling firmly on Mr Alfred Herrhausen, the speaker (chief executive) of Deutsche Bank.

While always highly respect-ful of his talent and energy, the German media has been full of faintly criticial material about Mr Herrhausen, who is portrayed as immensely capa-hle but worryingly ominipre-sent on the financial and industrial scene.

The bank has accounced a campaign to aharpen np its image, which it says research has shown to be somewhat diffuse" in the public eye. Internal bank communications are also to be improved. How much the decision has to do with the adverse attention recently drawn by its chief executive is left unclear.

Profile: Helmut Guthardt and DG Bank

Co-operatives' umbrella is not yet fully opened

SEVEN years ago, in a profile in the Financial Times, Mr Hel-mut Guthardt, then still in his first months as chief executive of Deutsche Genossenschafts-bank (DG Bank), stressed that his goal was not to make the bank into a direct rival of West Germany's big quoted financial institutions, but to retain its special character as the umbrella body for the coun-try's co-operative banking system.

That character, in which DG Bank acts as the liquidity manager for Germany'a 35,000 cooperative banks, which are owned by some 11m depositors, has not changed. What has altered is its

growth into a full-scale universal bank, with an active equity and bond business, as well as a widespread international net-

work. With total assets of retail institutions at the bot-DM135bn in 1987, DG Bank is now the sixth biggest bank in Germany.

tom and DG Bank at the top -

have voiced approval. How-ever, two, including West-If plans unveiled by Mr Guthardt last August go deutsche Genossenschafts-Zentralbank, the biggest of the through, it could soon become. five, are vehemently against. The scheme remains in the bigger still. He has argued that melting pot, at least until a special meeting of representa-Germany's five co-operative central banks, which act as regional co-ordinators for the tives of the co-operative system later this year. retail co-operative banks scattered around the country, should merge with DG Bank to the bull by the horns has char-acterised other proposals by Mr Guthardt during his years create a more efficient and competitive system, especially in view of the challenges from both domestic and forforeign in the chief executive's chair. rivals after 1992.

Take the decision last year not to pursue talks to buy a 75 per The proposal has had a cent stake in Volksfürsorge, mixed reception. Three of the five central banks - which act one of Germany's biggest life insurers, from the country's trade union movement. Buying Volksfürsorge would as the middle tier in the German co-operative banking system, sandwiched between the have consolidated DG Bank's

position in the insurance business, where the co-operative banks already have a controlling stake in R+V, a leading insurance group. Links between banks and insurers have been gathering pace in the past two years as German banks have become increasingly convinced of the merits of "Allfinanz" - wide-scale financial services under one TOOL

IX

Market research showed Voikfürsorge would have been very complementary" with R+V, says Mr Guthardt, not least because of its broad coverage in urban industrial areas where the co-operative banking network is at its thinnest

However, the deal fell through owing to an unwilling-ness on Voiksfürsorge's side to consider changes to pay and conditions, which the bank argued were essential to bring it into line with other insurers. In a terse statement, DG Bank tactfully withdrew from the talks.

Despite that setback, Mr Guthardt is convinced the bank is now fully accepted as an equal by the country'a financial institutions, desplte a tendency to dismiss it in the past. Partial operating profits for last year will probably be somewbat down on the DM573m earned in 1987, but full operating profits, which are not disclosed but include gains from trading on the bank's own account, should be around the same level.

We have reached the level of respect, but not necessarily recognition, of our size," Mr Guthardt says. What still grates is DG Bank's "unsatis-factory" allocation in many of the large and entrenched lending and underwriting syndi-cates, which still dominate many German corporate finance relationships.

Even in the huge new-issues market for federal government bonds, DG Bank still only has an 11 per cent quota, despite regularly placing around 18 per cent of the paper thanks to its access to the huge liquidity in the co-operative system, says Mr Guthardt,

Things are changing, he reckons, with the bank getting a bigger slice of the cake, both in newer domestic consortia and in foreign deals. However, breaking into established groups is much harder work. With issue sizes limited, "it's very difficult to take something away from others," he says ruefully. For all its growth under Mr Guthardt, DG Bank probably still has some way to go.

## **Your Financial and Investment Resource in the GCC Countries**

Gulf Investment Corporation continues to spearhead the spirit of enterprise in the GCC states by turning potential industrial and agribusiness opportunities into profitable equity investments.

We have successfully transformed opportunities into essential key industrial and agribusiness projects ranging from the production of aluminium coil to the maintenance of aircraft and their engines.

We are consistently identifying, evaluating and supporting new and existing projects. encouraging the private sector to participate in the continuous task of industrial and agribusiness expansion, which we additionally support with 'hands on' expertise, lending, and arrangement of financial engineering and advisory services.

Our broad multi-currency deposit base positions us prominently in local and international markets and our comprehensive portfolio incorporates both international bonds and equities. A wide range of investment and advisory services are provided to both the public and private sector.

Gulf Investment Corporation is continuing its efforts for industrial diversification through the sound investment strategies it develops in partnership with local and international interests under the auspices of its owners, the six GCC Country Governments.

The potential for growth and profits in the Gulf is large. We are increasing our efforts to tap these opportunities.

Gulf Investment Corporation is the source of expertise, resources and knowledge.

## **INTERNATIONAL BANKING 10**

#### Profile: Jean-Yves Haberer

FRANCE: finding a bank to buy looks almost impossible, says George Graham

## Return of an exile

х

NEITHER HIS civil service career nor his taste for mone-tary theory would seem to cut Mr Jean-Yves Haberer out for the role of victim of the right and favourite of the left. Yet in 1986, when the right

wing government of Mr Jac-ques Chirac came to power, Mr Haberer's was one of the first heads to roll, replaced at the head of the investment banking group Paribas by Mr Micbel François-Poncet.

And in 1988, when the Social-ists returned to office, Mr Haberer was rapidly rewarded with the chairmanship of Crédit Lyonnais.

Born in Morocco in 1932, Mr Haberer followed the classic path of the French high-flyer; the Paris political sciences institute Sciences Po, the civil service college Ecole Nationale d'Administration, the government finance inspectorate and then the Treasury.

An adviser to Mr Michel Debré at the finance ministry from 1966 to 1967, Mr Haberer followed him to the ministries of foreign affairs in 1968 and defence in 1969, before return-

ing to the Treasury. As Director of the Treasury from 1978 to 1982, he filled e post viewed by many French bankers as rather more prestigious than that of the minister of finance himself: he suc-ceeded Mr Jacques de Larosière, former managing director of the Internetional Monetary Fund and now governor of the Bank of France, and was succeeded by Mr Michel Camdessus, former governor of the Bank of France and now managing director of the International Monetary Fund.

But his spell in office coin-cided with the arrival of the Socialists in 1981. A long-standing friend of Mr Jacques Delors, named as the new finance minister, Mr Haberer presided over the devaluation of the franc and the imposition of exchange controls, hefore leaving to take over at the head of the newly nationalised Paribas in 1982.

"The Treasury in France has always been a nursery for the banks. The day 1 entered the

Jean-Yvas Haberer; a graduate of the nursery

sions.

banker.

THE BANK OF KUWAIT & THE MIDDLE EAST

Treasury I knew that, one way or another, I would end np in a handover at the Credit Lyon bank." Mr Haberer said at the

time His spell at Paribas was not universally praised. All the same, he doubled its profits in four years, and in 1986, on the return of the right-wing gov-ernment, was widely viewed as one of the safest of the chairmen of nationalised banks. He paid, nevertheless, the price for some solid enmities built up both in the reorganisation of Paribas and before at the Trea-sury; and went off into a twoyear exile, though remaining honorary chairman of the

group. Seven monthe after his return to the banking front Crédit Lyonnais in 1987. Mr Heberer hes moved swiftly to reverse the trend, line, he has set himself the same target for Crédit Lyondoubling sovereign debt provinais that be achieved at Pari-bas: the bank's new three-year sions and reaching a rate of cover of 51 per cent on Crédit plan aims to double profits by Lyonnais's exposure to 62 risk countries.

At the same time, be is putting the finishing touches to an adjustment of the Credit Lyonnais's organisation, as be did at Paribas, and before that at the Treasury,

"l am passionete ahout organisation, so I devote a lot of time to problems of organisation, but like all those who believe in organisation, I am both pragmatic and sceptical. I have no system. I try a form of organisation, and if that does not work, I change it," Mr Haberer has explained.

Despite the kind words he and Mr Jean-Maxime Léveque addressed to each other on the

## **Customer loyalty remains high**

FOREIGN BANKS looking at France face a problem: how to penetrete e market already thoroughly covered by domestic branch networks. Direct marketing techniques,

such as those pioneered in France by the Compagnie Ban-caire with its consumer credit, leasing and insurance subsidiaries, may be one answer. Most bankers believe, however, that this approach would only allow them to skim off a tiny, though possibly profitable, proportion of husine

Alliances with a French institution may be another option, but the domestic parter is always likely to keep the dominant role.

Finding a bank or a network to buy, meanwhile, is likely to prove almost impossible, as in most other European countries - the UK may prove to be an xception, because of the possibility of floating huilding societies

nais last year, Mr Haberer has been quick to differentiate himself from his predecessor with the announcement of the With some 25,000 bank and savings bank hranches - one for every 2,150 inhabitants and every FFr170m of gross domestic product - France is not the most overbanked country in Net profits fell in 1988 hy 7 per cent to FFr2.06bn (£186m), the EC; but the major con-sumer hanking networks, result of losses of FFr603m at the London securities arm along with the Post Office, still Alexanders Laing and Cruicksbank, and also a heavy increase in had debt provicover the territory thoroughly, and over 99 per cent of the populetion already possess a current account.

Already criticised for under-A recent study by Banque Indosnez shows that the four largest French banks have 12 provisioning Crédit Commer-cial de France, which he chaired before its nationalisaper cent of the domestic martion in 1982, Mr Léveque had cut had-debt provisions at ket, compared with around 8.5 per cent for the four largest in the UK or West Germany, and around 5 per cent for the four largest in Italy or the Netherlands.

Customer loyalty is high, helped by traditions such as home-loans conditional on After seven or eight years long-term savings accounts. although many bankers say it s diminishing.

in which debt problems were treated by rescheduling, we have arrived at a moment where creditors will be asked to abandon debts - govern-This structure has left many banks, admitting to being overweight in their branch netments, hut also commercial banks," Mr Haberer explained. At Paribas, Mr Heberer used works and somewhat overstaffed, seeking ways of improving their cost/activity ratios by to say how much he enjoyed widening their product range, Insurance has been the main focus. Crédit Agricole led the driving the only sports car in the French banking system. way with sharply rising sales of life insurance policies, and Banque Nationale de Paris (BNP) has gone a step further with a global cross-marketing Now that he is at the wheel of one of the system's heavy lorries, he has a second chance to shake off the criticism that he is a better civil servant than agreement with Union des Assurances de Paris (UAP), the George Graham

leading French insnrer, cemented by crossed shareholdings. Listening to the average

Paris banker, you might won-der why an outsider should want to try the French market: the impression given is that there is hardly a single sector where yon can still make an honest living; unless, of course, that is simply rhetoric ed to discourage the foreign competition.

Margins on corporate lend-ing have been pared to the

### **INTERNATIONAL BANKING 11**

CANADA David Owen on the good news and the apprehension

# Expansion may be ending

AFTER THE traumas of 1987. the Canadian banking industry bounced back with a ven-

For the year ended October 31, the Big Six domestic indus-try participants reported aggregate profits of C\$3.26 bn (1.5bn) to soothe the memory of their C\$634.5m (restated) combined 1987 loss. Then, massive loan loss provisions of close to C\$3.5bn had yashed all but Toronto Dominion deep into the red. In 1988, profits ontstripped even the prior year's exceptionally good oper-ating earnings by 14.4 per cent. The good news has generally persisted into the first quarter of the present fiscal year, with five of the six reporting strong earnings advances of between 20 and 120 per cent.

On a less positive note. depressed securities markets meant that three banks were : obliged to endure losses at their recently-acquired investment dealer subsidiaries. Bank of Montreal (BMO) was

HAVING EXPERIENCED one of the fastest and most compre-hensive deregulations of the OECD countries, Australia's banking and financial sector appears close to a turningpoint in its evolution.

Already it is evident that financial institutions are hav-ing to review their activities and strategies, shutting down-some operations, specialising in others. Despite a surging domestic economy and bnoyant demand for finance, competition has remained infense

Just as important, the aftereffects of the 1987 crash have demanded major adjustments. Some banks have been embarrassed by their heavy exposure to collapsed companies, and the gloomier economic outlook ahead is fuelling expectations of a larger shake-out.

As last year, the principal focus of attention in the medi-um-term remains the uncertain future of the federal government-owned Commonwealth Rank the weakest of the Big Four trading banks. The ques-tion springs from the Labor. ptices, which the banks have used to rulse more capital Regarding expansion, it is government's refusal to inject much-needed capital: Two possibilities arise; priva-

tisation, or takeover by one of the other three - Westpac, the ANZ group or National Austra-lia Bank (NAB). But the Government has put off deciding its overall sell-off policy, and

1. A. S.

the odd man out in the first quarter, reporting a 2 per cent year-on-year profit decline. This largely reflected a C\$45.7m increase in provisions set aside for ball loons. The bank's relative position of steam. bank's relative position remains less than enviable, since it has both the highest exposure to LDC debt (at 87 per nest among those who have participated most heavily in lucrative leveraged-buyout financings. Slower growth is not expected to prevent the banks

exposure to LDC debt (at 37 per cent of common equity) and comfortably the lowest growth rate of domestic loans and mortgages among the Six. With assets at January 31 of C376 bit, BMO is poised to be overhauled by Bank of Nova Scotia (BNS) as the country's third largest bank. Mr Matthew Barrett, the incoming chair-man, will evidently have his work cut out if the bank is to keep pace with its peers in the years ahead. per year for profits in 1989, however. Third World loans are a further source of worry for some; although the banks' exposure relative to their common county base has come down markedly in the last two years. In early 1987, the Big Six had rs ahead With domestic interest rates

In early 1867, the fig Six had more than 130 per cent of their equity at risk in the Third World. This figure has now been whittled down to less at their highest level since October 1984, Canadian bank-ers are scanning economic than 50 per cent. After BMO, those with the indicators with increasing dil-gence for signs that the coun-try's second longest post-war most relative exposure are BNS (75 per cent of common

which financial institutions with commercial links must be widely held, and to detail the degree to which hanks, trust companies and insurers will be permitted to encroach on each others' turf. The controversial expired bill would have required financial companies with commercial links and more than C\$50m in capital to have at least 35 per cent of their stock widely held within five years. Ottawa's hand may be forced

in its latest attempt to formu-late legislation by the rapid deregulation of financial ser-vices undertaken by the predominantly French-speaking province of Quebec. Quebec, which was the first province to allow financial

institutions in its jurisdiction to participate in the securities

business, is actively encouraging financial and commercial businesses to "comingle" Already, trust companies with Quebec charter can be wholly owned by non-financial corporations.

A glimpse of the possible ramifications of the rapid pace of Quebec's deregulation was afforded recently when Montreal Trustco, an institution with assets of C\$10.2bn and 165 branches and offices across the country, received federal approval to surrender its federal charter for a Quebec one. The move paved the way for a C\$875m offer for the company from Montreal-based BCE, Canada's largest commercial conglomerate. Montreal Trustco was previously 63.8 per ceot held by Mr Paul Desmarais' Power Financial.

and Mellon Bank - have effec tively withdrawn from Australia altogether, and a fourth (Morgan Grenfell) has slashed operations.

On the regulatory front, Aus tralia has further advanced the process of deregulation begun in 1983, when Labor came to wer and surprised everyone by floating the Australian dol-lar and lifting exchange controls - a shift that established Sydney as an international financial centre, revolutionised domestic banking and stimnlated major changes across all economic sectors.

In the latest changes, the Government has abolished the distinction between trading and savings banks and aligned their required assets ratios, and has begun to phase out the system of statutory reserve deposits and replace it with non-callable deposits.

In a separate move, the Reserve Bank has issued new capital-adequacy guidelines for Australian banks, in line with internationally-agreed standards. Banks in aggregate are said already to have a capital ratio in excess of 9 per cent. above the 8 per cent minimum and the anthorities say the guidelines will cover 80 per cent of the assets of all financial intermediaries.

Chris Sherwell on North American business

### Profile: Richard Thomson

## Not one of the crowd

WHEN THE Canadian Government requested changes in bank service charge policies last summer, only Toronto Dominion, of the Big Six, did not comply. The decision, though surpris-

ing to many, was entirely in keeping with the independent bent which the bank has exhibited under Mr Richard Thomson's stewardship. The TD – Canada's fifth largest bank – has stood apart

from the crowd in a variety of ways during the lean, bespectacled Mr Thomson's 11 years as chairman. These heve ranged from its handling of the Third World debt and securities business issues to its financial performance, which has long out-stripped that of its peers.

In the quarter ended January 31, TD produced a return of C\$1.29 per C\$100 of assets, against C\$1.02 for its nearest rival, National Bank. Quarterly profit rose 34 per cent to C\$195.8m (196.9m). The bank, which is the only North American bank bolding company rated AAA by Moody's, entered 1989 with its common equity to assets ratio at an all-time high. Assets now stand at C\$61 ho. From his inordinately spa-cious office on the 11th floor of Mies van der Rohe tower block, Mr Thomson, aged 55, proffers a disarmingly simple

explanation for the TD's propensity to find original solu-tions for its problems. "You cannot make a lot of money if you are doing everything the same as everybody else," be says. "You have always got to be slightly out of phase with the crowd." The bank has certainly been

well ont of phase in the rate at which it has reduced its Third World exposure by selling loans to troubled debtors on the secondary market. With exposure now down to 9 per cent of common equity, the bank regards less-developed country (LDC) loans as a discontinued business. Mr Thomson is "very pessimistic" about whether most such loans will ever be repaid.

The LDC debacle is one reason why the bank has pulled in its horns of late to concentrate

XI

opportunities. Fully 94 per cen assets are now concentrated on the sub-continent, down from 80 per cent in 1983, "It is bard enough to be a good lender in your own community - and it gets harder the further you go from it," Mr Thom-son, a Winnipeg-horn engineering graduate and Harvard

MBĂ , remarks. Deceptively soft-spoken, he nooetheless minces few words

when commenting on subjects about which he feels strongly. One of these is the ownership of financial institutions by commercial entities. Canadian regulations governing this area are currently in a state of flux. We believe that commercial

and financial links should not be mixed." be says, citing the importance of ensuring the impartiality of credit allocation to justify his position. "The potential for conflict is just unbelievable," he adds. "Once you go down that line, it means everybody really has to have their own bank. Why would anyhody ever finance a competitor?"

Mr Thomson, whose hobbies include golf and skiing, also has some forceful points to make on leveraged buy-outs (LBOs), a market which the TD (in common with several of its Canadian peers) has entered

with some enthusiasm. "I think we are going to have some casualties," he predicts. "Whether the casualties will cause e loss to commercial bankers is another matter."

in assessing LBOs, he feels, analysts have erred in underestimating the reaction of corporations to "a highly leveraged and therefore potentially sick competitor. "A lot of competi-tors," he adds. "have taken a predatory approach, reasoning that it may not be a bad time to cut margins."

### **INTERNATIONAL BANKING 12**

## Profile: Banca Catalana Providential acquisitions

BIG BANK mergers have held tha headlines in Spain and, amid the major realignments less attention was paid to the absorption last October by one medium bank, Banca Catalana of another, Banca Mas Sarda - although the development appears extremely significant in Spain's fastest growing area Catalonia. The expanded Banca

XII

Catalana has become the higgest bank, in terms of deposits, investment portfolio and profitability, in Barcelona. Its chairman, Mr Alfredo Saenz, has told shareholders that Catalana aimed to be "the premier institution centred on the Catalan economy, and dedicated to its service." The ringing declaration was not without ironies.

Banca Catalana was founded in the 1960s by Mr Jordi Pujol,

'The premier institution centred on the Catalan economy. and dedicated to its

#### service'

Catalonia's nationalist leader and the President of its autonomous government for the past eight years, with the express intention of servicing the Catalan economy. Mr Pujol, bowever, fell victim to Spain's banking crisis at the end of the 1970s after he had. resigned from Catalana's cbairmanship in order to dedicate himself to politics. Catalana collapsed in 1982. One irony is that Mr Saenz.

wbo now ecboes Mr Pujol's words, is a Basque and not a Catalan, Another is that, if Mr Pujol's dream of a great Catalan bank is to be fulfilled. It will not have been because Catalans have made it possible but because of the merger of the two Basque banks, Bilbao and Vizcaya.

"Pujol ran a bank that worked for Catalan culture and for political nationalism, savs one Barcelona financial expert. "Now Catalana is run according to strict profitability criteria.'

Banco de Vizcaya first rescued Catalana on behalf of a pool of private hanks, and then exercised its option to

buy it outright. Bilbao acquired Mas Sarda in 1986, when it was running into

The two acquisitions proved to be providential. Creation of the merged Basque bank, Banco Bilbao Vizcaya (BBV) early last year. was followed up hy their decision to hring together their two Catalan subsidiaries. Catalonia finally had a financial institution with a muscle that reflected the

area's economic potential. Mr Alfonso Saenz was a senior manager at Vizcaya's Bilbao headquarters when he was moved to Barcelona to run Catalana in 1983 at a time when the bank had irretrievable paper assets worth Ptal10bn and doubtful

assets totaling Pta30bn. The turnabout was achieved in less than five years. In 1986 Catalana was back in the black with profits of Ptal.1bn, and raised them to Pta3.8bn in 1987. Provisional figures for 1988, indicate that Catalana made

Pta9bn in pre-tax profits. Last year Vizcaya covered Pta15bn capital increase for Catalana and then floated 15 per cent of it on tha Barcelona stock exchange. This year Catalana plans to pay its first dividend for the first time in seven years, and 12 months

earlier than originally planned. With the Mas Sarda takeover, Catalana's branch network was increased by 55 offices, all bnt two of them in Catalonia, to 437. Catalana now has total assets in excess of Pta800bn, a significant sum given the concentration of its resources in Catalonia

Catalana's key advantage is its strong identification with economically-buoyant Catalonia, an area conscious of its national identity. Although BBV holds 86 per cent of the expanded Catalana's equity, the bank's Catalan identity has been systematically fostered over the past five years. A recent Pta50bn consortium, organised by Mr Pujol's bome rule

administration to promote Catalan business outside Catalonia, and particularly in Southern France, rapidiy obtained a Pta33bn credit line from Catalana,

ity requirements by the SNB.

Off-balance-sheet business and income from commissions

Commission's proposals would not least in tax matters, will be to compel the syndicate run by the three big banks to put pressnre on the Swiss financial markets to fall into en its grip on the SFr40bn step. This mustering of impul-(£14.23bn) a year (1988) primary issue market in Swiss franc sions to adapt has come after a year in which the banks had to bonds

These projects for adjust-ments to Swiss banking prac-tice are very largely motivated by the European Community'a movemant towards the cre-ation of a single financial mar-

ket. The big banks already estabsuffered a setback, as trading on the stock-markets sank to a lower level following the crash. However, the changes to the liquidity requirements, which lished within tha EC can expect to benefit from this move; but Mr Markus Lusser, president of the Swiss National led to a 50 per cent reduction in the banks' cash and other Bank (SNB), among others, has been warning thet harmonisareserve holdings in the first tion of regulations in the EC, nine months, facilitated a

strong revival in lending. With the exception of Bank Leu, which reported a 25 per cent fall in net earnings, all the hig hanks increased their declared profits, but their appreciation of the situation was perhaps best reflected in a common decision to pay

unchanged dividends. Emphasis was very much on holding down costs in 1988, and the previous years' expansion in staff slowed down apprecia-bly. Union Bank of Switzerland (UBS), the higgest bank, for instance, succeeded in keeping the growth in total costs to 3 per cent, which compares with a 5.3 per cent improvement in its cash flow, the largest increase among the big banks. cope with both the afternath of the stock-market crash and the introduction of new liquid-

However, the bank bas also suffered severe losses through its London securities subsidiary, Phillips & Drew. Forecasts for 1989 are cautiously optimistic. The business pattern is expected to remain the same, with lending operations again proving to be more buoyant than off-balance-sheet activity and managements watching cost devel-opments closely.

The pressures mentionad above and variations in differ-ent managements' responses to them appear at last to be resulting in an intaresting breaking up of the monolithic front the big Swiss banks have so far presented to the world.

Traditionally, the three big banks have reported almost Identical changes in their declared profits and dividend payments. This year Crédit Suisse posted a 7.6 per cent climb in net earnings, against 3.5 per cent for Swiss Bank Corporation and 8.4 per cent for UBS.

Moreover, Crédit Suisse announced, together with alterations to its group struc-ture, plans to publish consoli-dated accounts, becoming the first to herald a movemant towards greater disclosure in towards greater disclosure in Swiss bank-reporting that investors and supervisors have been urging for some time.

Crédit Suisse also distinguished itself last year, when it established CS First Boston, a glohal investment banking group with bases in London, New York and Tokyo.

that the 2.05 per cent once owned by the joint venture had been bought by Namrof Assets, an obscure company registered in Panama, but there was some doubt in Madrid as to whether the transaction would satisfy

the Bank of Spain. For the central bank, the end of the merger has been a golden opportunity to flex its supervisory muscle. It is already forcing banks to report monthly on the size of their treasury stocks, and has told them to provide quarterly consolidated balance sheets.

Tha messy merger has overshadowed a remarkable new boldness among the other big hanks. Banco Santander has swept ont of Spain to buy nearly 10 per cent of the Royal Bank of Scotland and other banks in Europe. Banco Popu-lar is forging new alliances in financial services. Banco Hispano Americano is seeking modest European investments. Banco Bilbeo Vizcaya, now unchallenged as the country's higgest bank, has finally bitten the hullet and hegun to do really painful work trimming its staff and branches.

Mr Conde, though, still had to find outside shareholders to

buy up what he could not sell to his employees, abont 6 per cent of Banesto's equity. He managed to trade off a third of the 3 per cent owned by his former vice president to a fastmoving local entrepreneur, Mr Jaques Hacbuel, in return for a 2 per cent stake held by Mr Hachuel in the private Swiss hank, Julius Baer. By mid-April, Banesto had confirmed

## **BfG:Your Bank** for Europe.

#### Adjusting to a wider market.

The nineties will see Europe develop into a single market. All forecasts point to fresh dynamism in economic activity and new opportunities for companies which set about preparing for Europe's future single market in good time. Those who take a pole position now by enhancing their competitive ability will experience no problems in adjusting to the wider market.

#### Talk to us, we are your bank.

As one of Germany's major full-service banks, the BfG is already thinking and acting European today. We are stepping up our co-operation with

our European subsidiaries, while further expanding our international presence. Today, we maintain offices in Amsterdam, Basle, London, Luxembourg, Moscow, Paris and Zurich.

As a member of the Aachener und Münchener Group, we have additional representatives in Belgium, France, Greece, Italy, the Netherlands and the United Kingdom.

The BfG, with its professional and qualified consultancy services, is poised to accompany you into Europe. We are equipped to face the European challenge. So, talk to us, we are your bank.

## LONG TERM SUPPORT FOR YOUR BUSINESS.

The Long-Term Credit Bank of Japan offers advice to help your business grow. We'll give you constant backing, and, when you're ready, we'll show you how to branch into new areas, too. What's more, with our support, you'll continue to flourish.

We were established in 1952 to ensure a steady flow of long-term funds for industrial

growth. Today we're one of the world's top 20 wholesale banks. This is the reward for our belief in following our client's business through from start to finish; for making sure your plans are successfully realized.

We specialize in Long-Term Corporate Financing and Merchant Banking Services such as Project Finance, Mergers and

Acquisitions, Leasing and Investment Advisory Services, as well as a full range of additional Banking Services. We also have over 60 offices worldwide, which means we can offer you both global and local support.

So, if you want to see your business grow bigger and stronger, why not try LTCB?

The Long-Term Credit Bank of Japan, Limited Head Office: 2-4. Otemachi 1-chome. Chiyoda-ku. Tokyo 100. Tel: 03-211-5111 Telex: 24308

### THE NETHERLANDS

## The London factor

DUTCH BANKERS are linking arms in unprecedented unity to defend their territory from foreign competition and to recoup lost ground. A blueprint for action

XIV

"Amsterdam: Financial Gateway to Continental Europe' was initiated by the banking community, and then found broader support. It outlines a step-by-step approach to win back business in guilder paper lost to London, and carve to out international market niches in selected areas of strength.

"We are acting more as a community than as individu-als," explains Mr Roelof Nelissen, chairman of Amsterdam-Rotterdam Bank, himself the driving force behind the plan. "In one to two years we think we can compete in cost and sophistication."

A convergence of factors has prompted bankers to seize the initiative, attracting a wide array of support from the rest of the community. Decisive was the realisation that about half of all business in Dutch government bonds had leaked away to London.

in banking at large, narrowing profit margins, new players on the field, crumbling cartels and the approach of European integration were also crucial In the background loomed a wave of mergers, government privatisation, capital flight and the expected convergence of banking and insurance.

These winds of change are reshaping the landscape of Dutch banking. Amro announced its landmark alliance with Générale de Banque of Belgium last year, followed this year by the merger of NMB with Posthank and planned alliance of Verenigde Spaarbank, the biggest savings hank, and Amev, the third

largest insurer. Verenigde Spaarbank and Amev have swapped shares, with the intention of merging after abolition of the law forbidding cross-ownership between banks and insurers. While other Dutch banks and insurers have been less enthu-siastic about the "financial supermarket" concept, more such alliances seem likely, given the need for economies of scale in a barrier-free Europe.

The vecerable "cloverleaf" of four mainstream hanks – Amro, and its subsidiary Pier-

son, Heldring & Pierson; and Algemene Bank Nederland, and its subsidiary Mees & Hope has been replaced by a new cloverleaf: Amro, ABN, Rahob-ank and NMB/Postbank.

Rabobank, a co-operative bank, increasingly looks and acts like the universal banks that ABN and Amro are. The NMB-Postbank merger, while slowed by union demands, combines NMB's strength in small business with Postbank's mass client base. Nipping at the cloverleaf's edges are a pack of aggressive

Dutch and foreign financial institutions. These mavericks have flouted the gentlemanly rules that bave long governed

**Credit Suisse First Boston** and Swiss Bank Corporation inverted the traditional and lucrative fee structure for domestic bond underwriting. Kempen & Co, an aggressive brokerage firm, has chipped away at the Cloverleaf's dominance of equity underwriting. Under this kind of assault profit margins have narrowed. This is not to say that Dutch banks did badly in 1988. They turned in an exemplary perfor-mance. The new Cloverleaf lifted its earnings hy an average of 19.5 per cent, thanks to buoyant lending and a stockmarket recovery. Since then ABN and NMB have opened branches in Luxembourg (Amro already had one). Mr Onno Ruding, the Finance Minister, is lobhying for uniform hanking secrecy laws in the EC, to stem the flow of money the most tight-lipped countr

Dutch banking and provoked head-on confrontation.

treasurers say Dutch hanks almost never come to them: they have to go to the banker." This applies to some Dutch banks more than others. Amro has paced the pack in hringing equity issues to the market lately.It lead managed the first privatisation tranche of DSM, the state-owned chemicals company, and will do the same for the second tranche. Amro is leading the international flotation of DAF, the Dutch truck-maker, and is the largest Dutch player in swap transactions, Speculation already is running high over which bank will help in the privatisation of NMB/Postbank, expected later this year. Bankers are taking off the gloves when it comes to retail banking. This is where the European Commission has most vigorously broken price cartels, such as those covering

More serious is the need to recover securities business lost to London. Dutch banks account for the lion's share of business done on the Amsterdam stock exchange. Banks have promised to improve securities markets' liquidity and transparency as part of

doors. Yet average profits bounced hack last year, and solvency ratios improved, though fur-ther improvement is still needed, says the Beigian Bank-ing Association (ABB). A 20 per cent increase growth in privete lending last year, compared with a 2 per cent fall in public sector loans, has helped give Belgian banks a better risk spread, and improved profitebility. Luxembourg officials, who now regulate some 140 banks, every six months hy merchant bankers from London - and I mean the top people - saying 'we have this and that'. These

The other main element of reform under way is the removal of special privileges for Belgium's six state-owned credit institutions. Dating back to the turn of the century, these banks were set up for special purposes - investment special purposes - investment in farming, housing, small business and industry - and were given special privileges, such as state guarantee of loans, and special exemptions, such as freedom from the control of the Commission Bancaire or the requirement to publish results or balanca sheets. The Government has now prepared a draft law to put the six on a par with their private competitors.

While Belgian banks see plans for an EC-wide 15 per cent withholding tax on bank and bond interest as a way of getting a reduction in the 25 per cent Belgian tax on such income, Luxembourg hanks dislike the idea of having to introduce such a levy for the first tima on non-residents' income.

However, even more important to them is bank secrecy. Aware of this, the Luxembourg Government slipped through a decree in late March, reinforcing the duchy's bank-secrecy law by giving certain adminis-trative practices the status of law.

Somewhat surprisingly, the EC welcomed this move, on the grounds that it clarifies tha duchy's laws. The Commis-sion's hope is that, reassured on bank secrecy, Luxembourg may prove less hostile to Brus-sels'plan for a withholding tax, designed to prevent large amounts of tax-shy money flowing into the duchy in a ear's tims when neighbours like France are due to lift all exchange controls.

UNCHAINED TO FLY. In the international business world there is always a need for the long view. W Mood of today forecasts can collapse in the cold light of tomorrow. W A bank cannot depend on down-to-earth knowledge alone. ₩ It must also, if it is to deliver all that its customers need, be capable of flight. W It must be innovative, imaginative, manoeuvrable. W It should rise above ground-mists that often obscure the economic view, understand its customers' faith in the future - whilst still maintaining firm financial stability. W Yapı Kredi is such a bank. W In our 588 branches in Turkey and 10 worldwide representative offices we have an exceptional blend of experience and youthful vigour. This com-bination has helped us lead the way. For instance, we finance almost one sixth of Turkey's foreign transactions and have been the leading player in Capital Markets for the last three years. Trained in the facts but also unchained to fly. W If you are looking ahead, you must see the bank that shares your vision.
